

# Implementing Cisco Contact Center Enterprise Chat and Email (CCECE)

## Description

The **Implementing Cisco Contact Center Enterprise Chat and Email (CCECE)** training teaches you how to deploy Cisco® Enterprise Chat and Email (ECE) into an existing Enterprise Contact Center environment. You will learn the steps required to prepare and configure both Cisco Packaged Contact Center Enterprise (PCCE) and ECE environments for integration, as well as gain experience with the operation and administration tasks required for initial ECE deployment. Additionally, you will experience ongoing system administration tasks such as enabling Single Sign-On (SSO), importing objects, preparing queues and workflows, using the scripting tool, generating reports, and enabling system logs for troubleshooting. Finally, you will also learn how to implement features that enhance ECE operations for Agents.

This training also earns you 32 Continuing Education (CE) credits toward recertification.

## How you'll benefit

This training will help you:

- Configure, integrate, and deploy Cisco Enterprise Chat and Email into existing Enterprise Contact Center environments
- Grow your understanding of Cisco ECE administration and features
- Earn 32 CE credits toward recertification

## Who should enroll

- Deployment Engineers

## Technology areas

- Collaboration

## Objectives

- Describe the ECE solution as deployed with Cisco Contact Center Enterprise (CCE)
- Define the components of ECE that make up the available deployment models available for enterprise solutions
- Utilize the Classic ECE interface to differentiate between partitions

- Utilize the Classic ECE interface to differentiate between processes and instances
- Configure the PCCE requirements necessary to integrate ECE
- Configure the requirements necessary to integrate ECE with the Single Pane of Glass used with PCCE
- Configure the requirements necessary to integrate ECE with email services
- Add the ECE Agent gadget to the Cisco Finesse Desktop layout
- Describe the installation requirements for a high-availability deployment of ECE
- Describe a basic email and chat call flow through the ECE/PCCE environment
- Understand the general operational requirements for adding CCE Agent, skill, and scripting objects and importing them into CCE
- Navigate the administrative tabs in both the Business Partition and Department view of the Single Pane of Glass
- Add and import objects into the ECE
- Describe the configurations options found in the Email and Chat Queue
- Describe the configuration and verification of chat functionality in a CCE ECE environment
- Configure and verify ECE settings
- Configure an entry point for a chat queue and introduce template sets
- Customize the chat experience
- Define and verify the configuration requirements to deploy callback and delayed callback
- Describe the benefits of implementing Agent Single Sign-on in the ECE/CCE environment
- Configure the requirements necessary to implement Agent Single Sign-on in the ECE/CCE environment

## Prerequisites

There are no prerequisites for this training. However, the knowledge and skills you are recommended to have before attending this training are:

- Strong knowledge of computer networking components: Windows A/D, SQL
- Strong understanding of IP networks
- Advanced experience administering Cisco Packaged Contact Center Enterprise
- Experience deploying Cisco Packaged Contact Center Enterprise

These skills can be found in the following Cisco Learning Offerings:

- [Understanding Cisco Contact Center Enterprise Foundations \(CCEF\)](#)
- [Implementing and Operating Cisco Collaboration Core Technologies \(CLCOR\)](#)
- [Understanding Cisco Collaboration Foundations \(CLFNDU\)](#)
- [Administering Cisco Contact Center Enterprise \(CCEA\)](#)
- [Administering Advanced Cisco Contact Center Enterprise \(CCEAA\)](#)
- [Implementing Cisco Contact Center Enterprise \(CCEI\)](#)
- [Implementing and Administering Cisco Solutions \(CCNA\)](#)

## Outline

- Deploying Cisco Enterprise Chat and Email
- ECE General administration
- Cisco ECE Email administration
- Cisco ECE Chat administration
- Cisco Enterprise Chat and Email features

---

## Lab Outline

- Navigate CCE discovery architecture and components
- Navigate ECE and CCE discovery architecture and components
- Navigate ECE Email and Cisco Finesse integration
- Add and Import CCE Resources into ECE
- Personalize the Email Trail
- Build a Department Workflow
- Build CCE Script for Email
- Agent Verification of Email
- Configure and Verify Chat Operation
- Customize Chat
- Explore Reporting for ECE
- Support Single Sign On (SSO) for ECE
- Troubleshoot ECE

---
