Improving business performance depends on improving collaboration among your employees, customers, and suppliers. That’s why an IT staff expertly trained in collaboration and unified communications not only provides a great user experience, but it also gives your organization a competitive advantage.

Cisco Digital Learning Collaboration provides on-demand training to help your IT staff design, implement, manage, and troubleshoot your organization’s collaboration and video infrastructure. This comprehensive technology subscription includes full-length, interactive certification courses, product and technology courses with labs, and thousands of reference materials. And we update content on a regular basis, adding new releases and revised versions of existing courses.

**Benefits**

- **Accelerate** expertise by building your organization’s knowledge of unified communications and collaboration technologies
- **Reduce** unplanned downtime with a highly trained workforce
- **Increase** your ability to deploy and support unified communications and collaboration infrastructure
- **Support** career paths for your team with access to Cisco® collaboration certification courses
- **Redeem** Cisco Learning Credits to pay for your subscription
Interactive, flexible, convenient

Cisco Digital Learning Collaboration offers full-length, in-depth certification courses with hands-on labs. You’ll also have access to a collection of just-in-time content, including best practices, design guides, and webinars.

Here are some of the courses included in your subscription:

Cisco Digital Learning Collaboration includes:

• Implementing Cisco Collaboration Core Technologies (CLCOR)
• Implementing Cisco Collaboration Applications (CLICA)
• Implementing Cisco Advanced Call Control and Mobility Services (CLACCM)
• Implementing Cisco Collaboration Cloud and Edge Solutions (CLCEI)
• Implementing Automation for Cisco Collaboration Solutions (CLAUI)
• Hundreds of hours of courses and labs

Plus, your team can earn Continuing Education credits when they complete select certification and technology courses.
