# CSIRO: Australian Science, Australia's Future

**Tom Minchin – Client and Infrastructure Services**  
**Desktop Video and Video Conferencing**  
**A Pillar of Our Communications Platform**

# CSIRO today: a snapshot

**Australia's national science agency**

**One of the largest & most diverse in the world**

**6500+ staff over 55 locations**

**Ranked in top 1% in 14 research fields**

**20+ spin-off companies in six years**

**160+ active licences of CSIRO innovation**

**Building national prosperity and wellbeing**

# Recent achievements

**CSIRO astronomers have revealed the hidden face of an enormous galaxy called Centaurus A**

**The most comprehensive and complex water modelling project ever undertaken in Australia and perhaps the world**

**Breakthrough research into the genetic blueprint of cows could lead to major improvements in Australia's farming industry**

**World-first air cargo scanning technology will help protect against illicit and dangerous goods in consolidated air cargo**

**274 new marine species and 80 undersea mountains discovered**

# Revenue

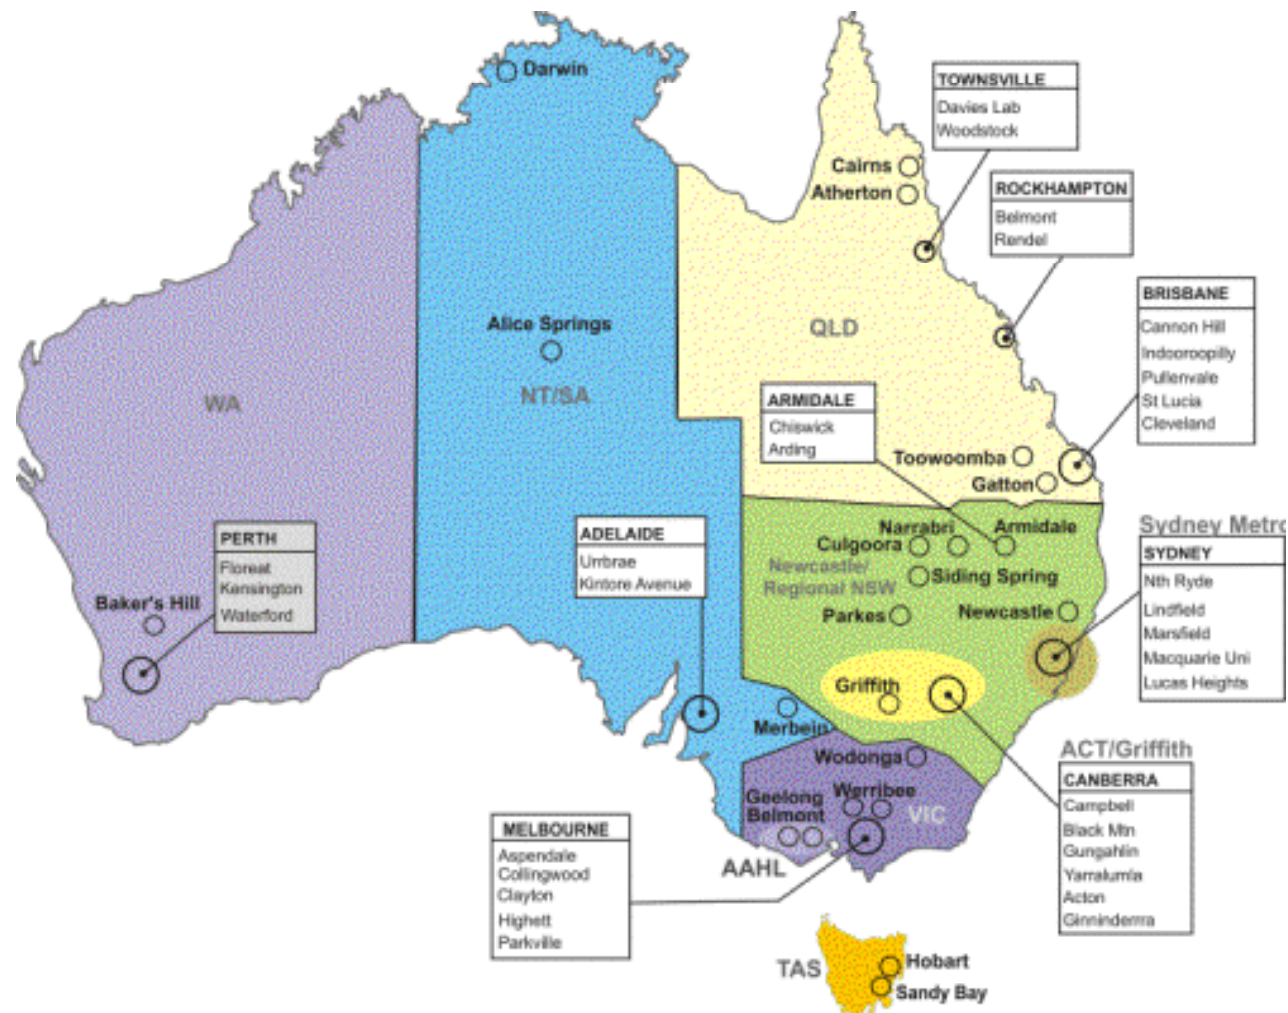

89% of funding is directed to Australia's National Research Priorities

## CSIRO in 2008-09:

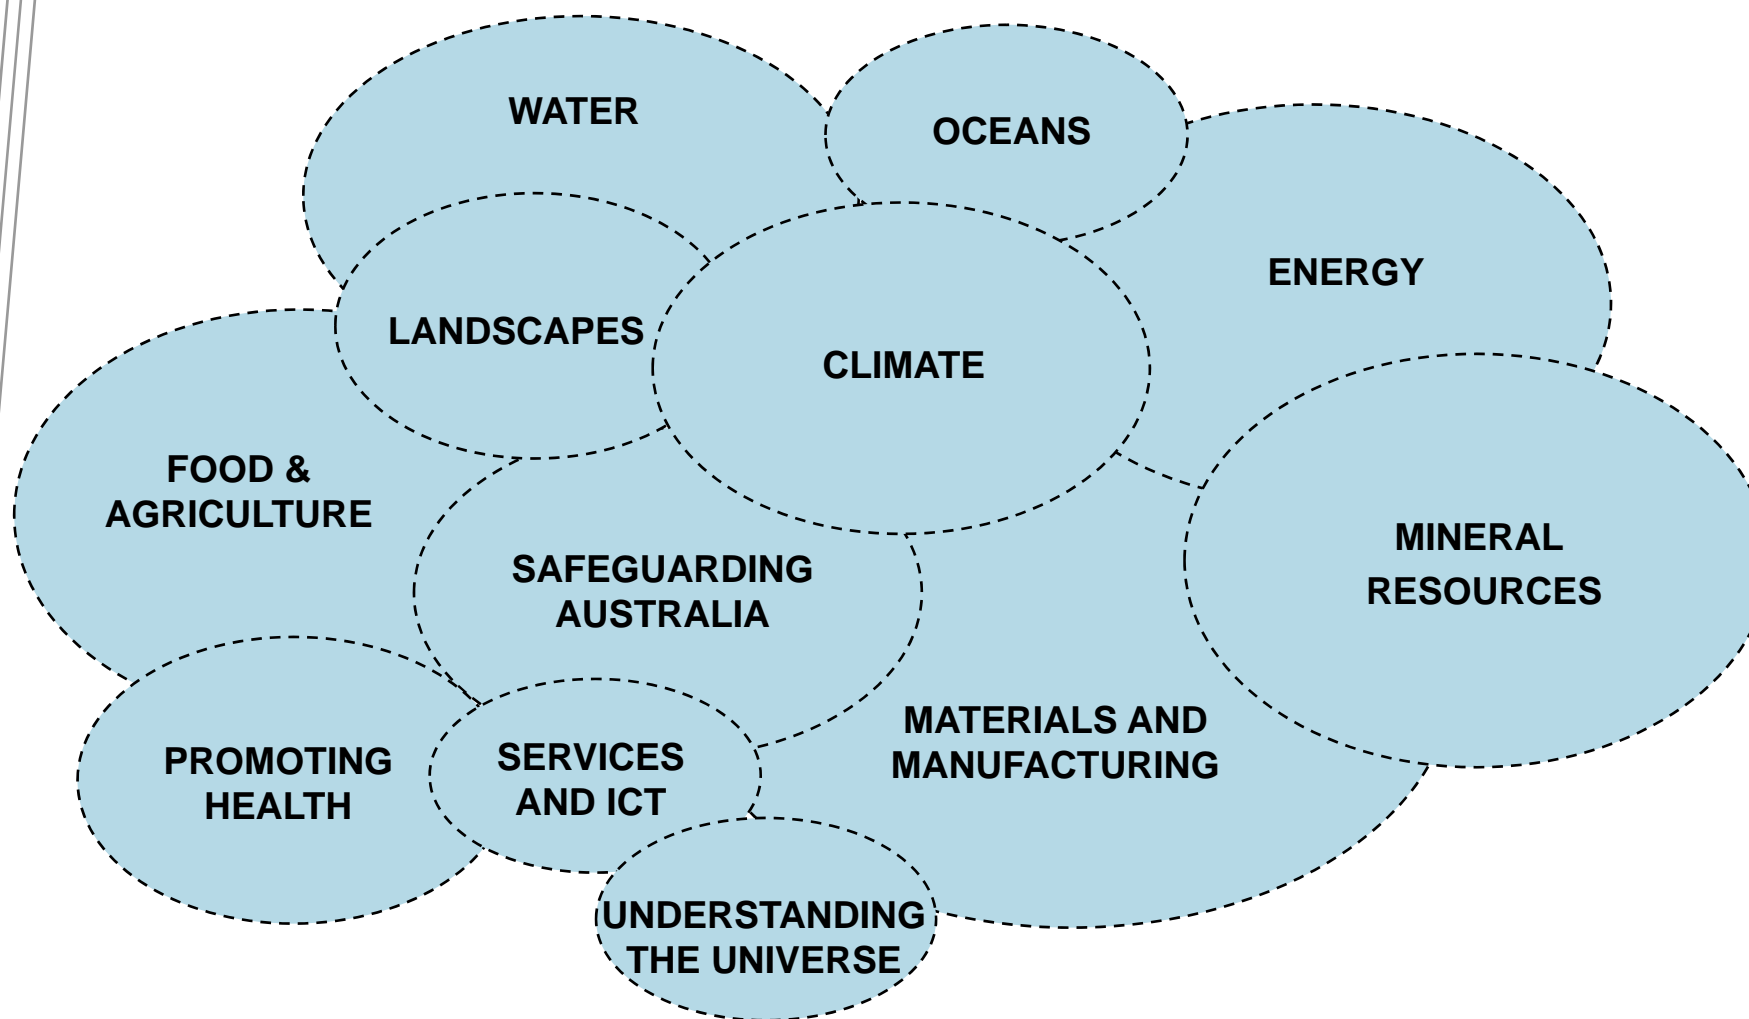

- Total revenue of \$1.3 billion
- Federal funding of \$668.1 million
- \$634.8 million external revenue
  - With \$229.6 million from IP revenue

# CSIRO is Australia-wide

# Delivering our science: key outcome domains

# Our operating model

## CSIRO Research Capabilities

**Agribusiness**

**Energy**

**Environment**

**Information &  
Communications**

**Manufacturing,  
Materials &  
Minerals**

## One-CSIRO Support Functions

# Leveraging our operating model

## CSIRO Research Capabilities

## One-CSIRO Support Functions

# National Research Flagships

**Climate  
Adaptation**

**Light  
Metals**

**Sustainable  
Agriculture**

**Energy  
Transformed**

**Minerals  
Down Under**

**Water for  
a Healthy  
Country**

**Food  
Futures**

**Preventative  
Health**

**Wealth  
from Oceans**

**Future  
Manufacturing**

# Historical View

- CSIRO has had a range of varied technology
- 18,000 Ericsson PABX handsets (only 6200 staff?)
- Every brand of Video Conference unit available
- Some sites had voicemail, others not at all
- Video Conferencing – only for the courageous
- Switch and router fleet non-standard
- AARNET2 and inter site microwave and Telstra DDS
- Range of old and new computers
- 30% of fleet are laptops

# Business Requirements of UC

- Video UC must integrate with existing audio (telephony)
- Reducing cost for the organisation and IMT
- Leverage geographically distributed skills and teams
- Ability for self service
- Additional available features
- Integration with other applications and collaboration systems
- There is no magic formula for enabling innovative collaboration – all you can do is encourage and enable

## Some past highlights

- Single IP Network for Data and Voice/Video
  - Single Dial Plan (6 digits)
  - Use of Cisco IP Contact Centre
  - Implemented Cisco Meetingplace
  - Integration with 120 Polycom SD video conference units
  - Email integrated voice mail via Unity
  - Cisco Unified Workplace Licensing
- 
- Standard switch and router rollout
  - AARNET3 and National Optical Network

- Network Bandwidth – QoS or not
- Latency, packet loss and jitter reductions
- VC reliability and quality using H.239
  - Leveraging IP network, no more ISDN
- Content sharing using Meetingplace
- VC scheduling using Meetingplace Outlook Plugin
- How do we know it's working?
  - 8400 hours a month of Video (36%) and Audio Conferencing (44%)
  - Range of collaboration types: tenders, job interviews, remote equipment servicing, conferences, lectures, training, budget planning, science papers review, lab results, telemetry...

# VC Scheduling

## Cutover from Concierge VC Bookings to Meetingplace Self Service

# Work in progress and current challenges

- Moving to Cisco IP Telephony (70% completed – 86% by EOFY)
- Deployment of Cisco Video Advantage (1500)
  - For both video conferences as well as ad hoc point to point video calls
- 15 HD video conference units
- Green IT
- Power Infrastructure
- Numerous “low value” handsets
- Reduction in carrier voice costs
- Problems with CVA vs Windows
- “Alternative technologies” – eg Skype, EVO

# Future Projects

- Broaden video collaboration to include telepresence features:
  - Immersive
  - Room based
  - Desktop
- Desktop collaboration:
  - Cisco MOC vs Personal Communicator
  - Both?
  - Remote Access
- QoS – for video in particular
