

Threat-Centric Security for Service Providers and Data Center

Cisco reimagines service provider and data center security by integrating class leading threat-centric security tools as well as those of its security partners. With the vision for intelligent security service stitching and the ability to have security policy follow workloads and data flows across physical, virtual, and cloud topologies, Cisco uniquely optimizes both threat defense and network performance. This approach supports the full realization of open and programmable networks. Security policies consistently follow data flows and workloads across the network fabric.

Security is central to the Cisco® Evolved Programmable Network architecture for service providers.

The architecture protects data and availability, furthermore Cisco's agility and rapid provisioning makes new security services practical to deploy, thus enabling the full realization of the promise of open and programmable networks and their attendant business benefits.

Today, Cisco's unique approach is available being first realized in hardware with our Cisco Firepower™ 9300 and 4100 Series, a scalable, carrier-grade platform designed for service providers, and data centers, and others environments requiring low latency and exceptional throughput, such as high-performance computing centers and high-frequency trading environments.

Firepower 9300 and 4100 Series Acceleration Program

Cisco Capital® can assist you when acquiring solutions enabled by Firepower 9300 and 4100 Series with affordable, flexible financing products that provide the following benefits:

- Access to the latest security and features without incurring upfront cost
- Higher ROI – payments can be structured to match costs to revenue
- Spread payments over time for optimized cash flow
- Flexibility to add or replace technology in order to maintain software and services updates
- Bundle hardware, software and services into one payment

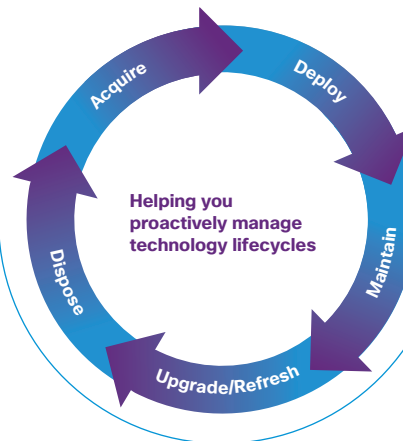

Financing Your Technology Acquisition Offers You Significant Business Benefits

- Bring investments forward to accelerate competitive advantage and ROI
- Get the most out of your Cisco investment and optimize the technology lifecycle
- Lower the total solution cost with regular technology refresh milestones
- Protect capital and alleviate budget pressure
- Spread total costs over time by incorporating implementation, service, and maintenance overhead into ONE solution

Firepower 9300 and 4100 Series Acceleration Program

The Firepower 9300 and 4100 Series Acceleration Program can help you maintain the best security solution through lifecycle management. It gives you flexibility in acquiring hardware, software, services, and complementary third-party equipment.

All of these benefits are provided with just one predictable payment.
