

Financing HyperFlex Systems

Cisco HyperFlex Systems combines your computing, storage and networking into one simplified, easy to use platform.

Gain new levels of agility, efficiency and adaptability

Avoid the compromises often found in first generation products with Cisco® HyperFlex™ Systems, the first hyper-converged platform designed with Cisco Unified Computing System™ (Cisco UCS®) servers; end-to-end software-defined infrastructure.

The agile network is essential in hyper-converged systems because it provides storage platform performance, ease of automation, and network security.

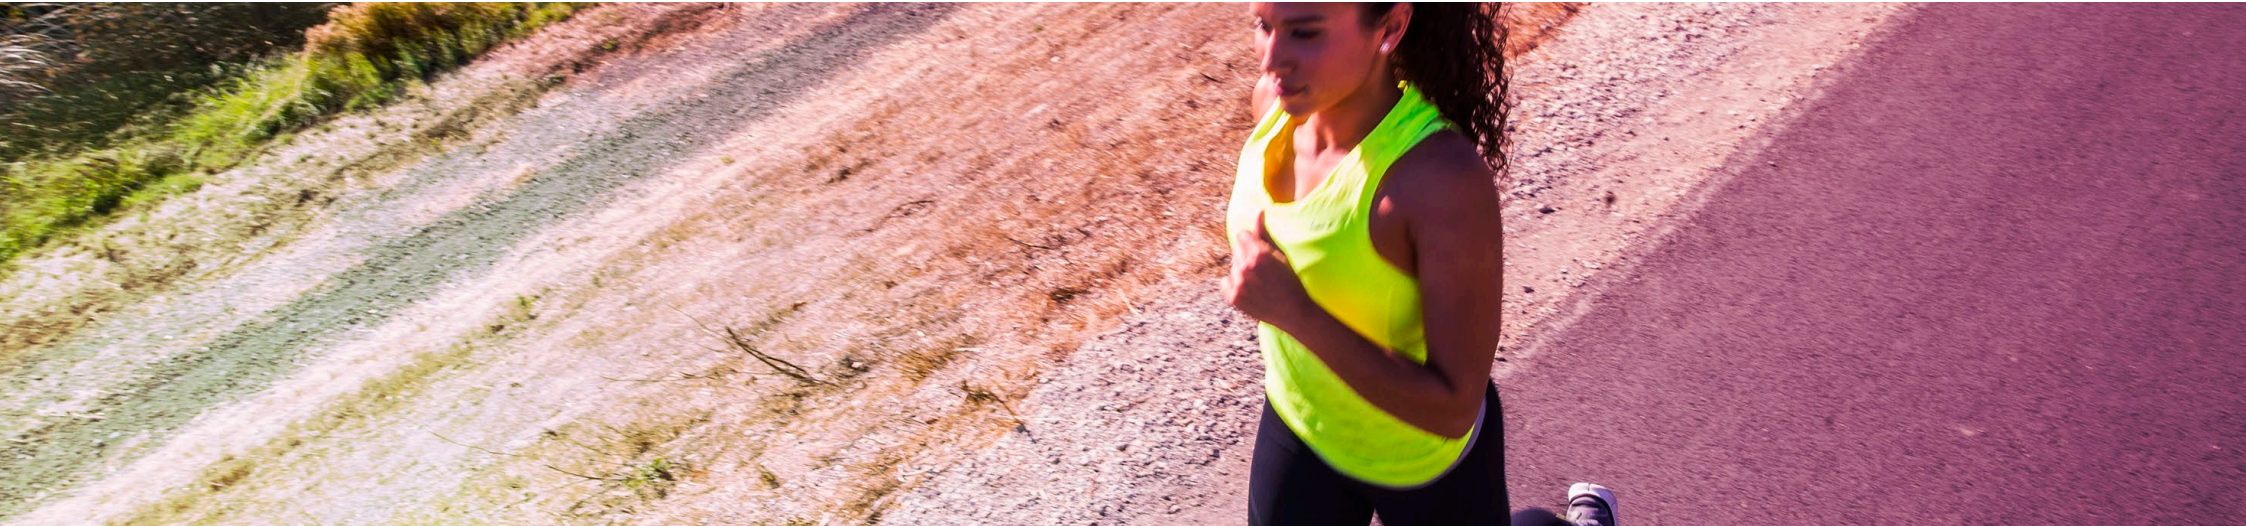

Through a pre-integrated cluster with a single management point it is easy to order and can be **up and securely running in an hour or less.**

Financing Cisco HyperFlex Systems

Financing your Cisco HyperFlex Systems with Cisco Capital® can make it easier with:

- Competitive pricing which can help reduce your TCO by up to 15-20%.
- Immediate access to the first hyper-converged platform with an in built refreshment plan at the end of the term, helping you avoid obsolescence.
- A range of financing structures such as payment deferrals or step payment plans which can be tailored to suit your business priorities.
