

Remote Support

Diagnose and solve customer problems faster with remote capabilities support.

Improve Technical Support Representative (TSR) productivity with easy-to-use remote support capabilities.

Accelerate diagnosis and problem solving by viewing and controlling customer desktops.

Decrease call times, increase first call resolution, minimize costly on-site service visits — and reduce support costs overall.

Meet or exceed service level agreement (SLA) objectives and increase customer satisfaction.

Serve your clients with the most manageable, reliable, and secure remote access support.

Improve the speed and quality of your support, even as you reduce support costs. Empower your support team with WebEx™ Remote Support.

Invite customers into support sessions, then view and control their remote desktops in real time. Upload files to install patches and updates or download files for in-depth analysis. Ask subject matter experts to join calls instantly. WebEx Remote Support makes it easy — and it will measurably improve your productivity and customer satisfaction.

Solve more remote problems on the first call.

Quickly launch a support session right from your browser or CRM application to see exactly what's happening on a remote desktop. Then demonstrate functions or take action to provide an immediate fix. Your customers get fast, intelligent support without having to endure multiple calls to diagnose simple issues.

Deliver hands-on support without costly site visits.

Eliminate the need to travel offsite for most problems — and avoid the frustrating back-and-forth of talking customers through solutions by phone. Slash both your call resolution times and your support costs significantly. Use the detailed reporting function of WebEx Remote Support to analyze and optimize your support processes for even better results.

Count on WebEx for a secure, scalable solution.

WebEx Remote Support is delivered on demand over the WebEx MediaTone™ Network, a private global network. No new software or hardware is required, making it easy to implement and easy to scale as your support needs change. The MediaTone Network offers better than 99.99% reliability, as well as robust security. Your information is never persistently stored on our servers and 128-bit SSL and AES encryption ensures all your support calls are private and secure. And WebEx is SAS 70 and WebTrust™ certified.

“The ability to see what is happening on the end-user's machine with WebEx is quite powerful. The customers ask for WebEx because they get back to productive use faster. In just one call center, we are saving well over 100 hours per month in call time.”

— Harry Coit, Director of Technical Support, Epicor

Get the features you need to resolve more tech support issues in less time.

Two-way Desktop and Application Control or View

View or control a customer's desktop or applications or let a customer view or control your desktop or applications.

File Transfer

Transfer files to and from a customer's system to apply patches and updates during the session or retrieve customer data files for in-depth analysis. No complicated process. Just drag and drop.

Log on to Customer's Desktop as an Administrator

Sign on to a customer's machine as an administrator to access and install new applications and perform other activities that require administrative privileges.

One-Click Invite and Session Start

Start a remote support session and invite your customer instantly right from your desktop.

Session Recording and Editing

Record sessions manually or automatically for archival or training purposes.

Remote Printing

Redirect printouts from a customer's printer to a local printer for offline analysis.

Integrated Video

Stream live video to personalize or enhance support.

Scale to Fit

View the customer's desktop without scrolling to speed the support process.

Floating TSR Control Panel

Access all session controls during desktop or application sharing without obstructing view or switching screens.

Call Escalation

Bring subject-matter experts in instantly when needed.

Chat

Communicate easily with customers and other TSRs during a session.

Transfer and Conference

Transfer calls or conference in subject-matter experts for faster resolution.

System Information

Collect system information with one click. Print and save system information for future reference.

Annotation

Let both TSR and customer annotate the screen to better explain and solve issues.

Persistent Reboot

Allow a customer to join the same session even after a reboot.

Firewall Friendly

Work through most firewalls without opening additional ports. Support Center operates through standard http and https ports.

Post Session Survey

Survey customers at the end of sessions and use data to improve TSR performance.

Management Reporting

Measure help desk and call center statistics, including number of sessions, session time, and session feedback to track and improve performance.

CRM Integration

Initiate support session directly through your CRM solution. Get out-of-box integration with Salesforce.com and Remedy.

It's incredibly easy to start a support session using WebEx. Just send a quick invite for your customer to meet you online.

Transfer files and folders in an instant. Just drag and drop.
