

Strike the right balance: Do-It-Yourself, or a turnkey solution?

Do-It-Yourself automation

- Nexus 9000 running NX-OS
- Open APIs for integration
- Identify your 3rd party tool of choice; Ansible (Red Hat), Puppet, Chef, etc.

Have the knowledge and time, write your own scripts.

Cisco ACI

- Simplified management: single, integrated physical and virtual network
- End to end network automation
- Consistent application policy across your multicloud

It's done for you.

Deploy apps up to **6x faster** with ACI at cost savings of up to 47% over other SDN solutions.¹

Customers achieve huge gains with Cisco ACI

- **Cisco IT Services:** Reduced network provisioning time by 58%
- **Du Telecom:** Deployed 150 node network in less than an hour
- **Integra:** Reduced employee time by 90% to provision hosted services
- **Symantec:** Reduced application development lifecycle time by 87%
- **Ameritas:** Reduced CapEx between 30-40%
