

# A smart network for a smart campus

Wipro Limited is a leading global information technology, consulting and business process services company. It harnesses the power of cognitive computing, hyper-automation, robotics, cloud, analytics and emerging technologies to help its clients adapt to the digital world and make them successful.

Wipro was looking for a smart network that would be secure, while ensuring mobility.

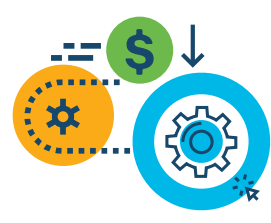

## Objectives

Invest in digital capabilities and assets to improve user experience

Develop applications and services to open new revenue streams

Simplification through hyper automation of IT to lower costs

## Solutions deployed

- 1 Cisco DNA Center
- 2 ISE
- 3 Catalyst 9K

## Outcomes

### Time-to-market

Move resource faster to new project, one week to minutes

### Workforce mobility

Policy follows user, no longer tethered to desk

### Client security and data privacy

Easily maintained network segmentation

### Cloud apps simplicity

Simplify Office 365 updates for higher user productivity/uptime

“When it came to DNA, we wanted all of this and found that it is working fine. We wanted to do a pilot with one campus. Now we are convinced and happy with the results, and want to scale it up”

– Raja Ukil

Senior Vice President and Chief Information Officer, Wipro Limited.
