

The Nimble Storage Adaptive Flash Platform

A Single Storage Architecture for All Enterprise Applications

The speed of flash technology has made it an essential component of the modern data center. But, flash's superior performance comes at a steep price, making it impractical for all but a handful of today's enterprise applications. This forces businesses to erect infrastructure silos—resulting in complexity and sprawl—to meet their basic performance and capacity requirements. Nimble Storage's Adaptive Flash platform eliminates this trade-off with a single storage architecture that can address the needs of all critical applications, and delivers performance and capacity in the most efficient way possible.

Adaptive Flash

The Nimble Adaptive Flash platform provides enterprise IT organizations a single architectural approach to dynamically tune storage resources to the needs of demanding workloads. Adaptive Flash is based on CASL™, Nimble Storage's patented Cache-Accelerated Sequential Layout architecture, and InfoSight™, the company's automated cloud-based management and support system. CASL allows performance and capacity to be scaled seamlessly and independently to accommodate efficient data center growth. InfoSight ensures flash will be deployed intelligently to satisfy the fluctuating requirements of enterprise applications, eliminating the wasteful overprovisioning of storage resources.

Our Customers Require Up To **10x Less Rackspace**

Our Customers Get **Blazing Performance**

Our Customers Enjoy **Virtually Zero Downtime**

About Nimble Storage

Nimble Storage (NYSE: NMBL) is redefining the storage market with its Adaptive Flash platform. Nimble's flash storage solutions enable the consolidation of all workloads and eliminate storage silos by providing enterprises with significant improvements in application performance and storage capacity. At the same time, Nimble delivers superior data protection, while simplifying business operations and lowering costs. More than 6,200 enterprises, governments, and service providers have deployed Nimble's flash storage solutions across 50 countries. The Power of Adaptive Flash

Adaptive Flash instantly adjusts to address all critical application requirements.

Adaptive Flash can:

- Provide multiple service levels to eliminate storage silos with a single architecture for all applications
- Grow seamlessly by scaling compute, cache, or capacity independently and non-disruptively
- Minimize risk with integrated SmartSnap snapshots and consistent backups, SmartSecure encryption, and efficient SmartReplicate disaster recovery
- Improve IT productivity with push-button deployment and the proactive, analytics-based support of InfoSight

Adaptive Flash customers realize dramatic benefits, including:

- Up to 10x reduction in data center footprint
- 60% less spent on power and cooling
- Up to 500K IOPS performance
- Greater than five-nines level of system availability
- 60-90% less administration time
