

Be a Cisco Apprentice

Did you know: that in 2015

1 million

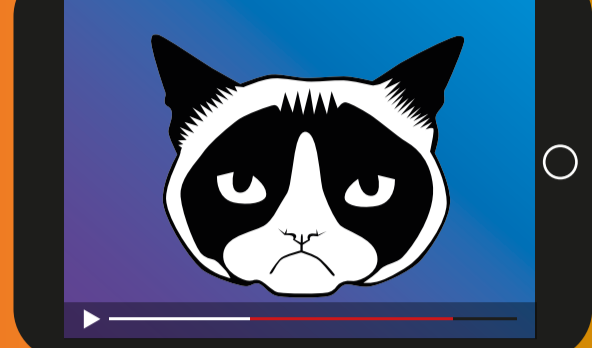

years' worth of video traffic crossed the internet every month. Yes, seriously.

Hello, we're Cisco.

We bet that you, along with billions of people everywhere, use the internet every day without really thinking about what makes it tick. Whether you're streaming music, blogging, chatting to friends, sharing cat videos or perhaps even applying for jobs - Cisco powers the technology that connects you to the world.

Why not consider joining us? As a Cisco Apprentice you'll be part of a team that cares about its customers, has a lot of fun, and even takes part in changing the lives of those in our local communities.

There are now more mobile devices than every human being on the planet! The internet is the future of everything.

The Apprenticeship

We know university isn't for everyone, and securing a graduate role can be pretty tricky without decent work experience. Luckily for you, our Degree Apprenticeship is a great way to kick-start your career, gaining invaluable work experience whilst earning the same qualifications as a university graduate.

Over the 3 years you'll explore a huge variety of roles within Cisco; giving you the knowledge and experience to specialise working directly with technology or supporting the people that make it happen.

But what does it really mean to be working for one of the world's leading technology companies?

You'll...

- be at the cutting edge of our exciting technology; watching things evolve and new things created
- get to meet hundreds of Cisco employees from all over the world; building contacts, working with the best and learning from the experts
- partner with international brands to deliver solutions to their business problems
- manage projects that ensure we deliver on our contracts with customers, communicating with stakeholders and hitting deadlines
- design, test, and deploy our technology and understand the engineering behind it in order to break and fix it
- analyse and unpick what our data means to inform what and how we do our work
- help local communities by 'giving back' to fundraise, volunteer time and raise awareness of local causes

To top it all off you'll have a strong base of support, thanks to a brilliant group of current apprentices, mentors, managers and more, all ready to guide and advise you.

What You'll Do:

As an apprentice you'll be given support and guidance to understand how your passion and skills best fit within Cisco. By seeing and doing what our teams do, you'll start to see where you can go and get the experience that's relevant to be successful.

YEAR 1

- You'll be finding out about Cisco; what we do and how we do it.
- You'll complete an induction bootcamp giving you the skills foundation you'll need to build your exciting career with us.
- 3 month induction and business orientation
- Up to 3 role assignments across Cisco
- Produce a portfolio of work that demonstrates what you're learning from your roles

YEAR 2

- You'll start to specialise and discover your ideal career with Cisco.
- 2 role assignments across a department
- Develop a work based project including strategy and research that demonstrates the work you're doing every day

YEAR 3

- You'll define your career path and deliver work and results to the business, in preparation for graduation!
- 1 role assignment
- Complete a major project pulling together everything you've learnt and how you're using it to be successful in your role
- Graduation, with a BSc in Digital and Technology Solutions

Our Apprenticeship is award winning...

Awards

...as are our apprentices!

James and Jess, Thames Valley Higher Apprentices of the Year 2015, Winner and Highly Commended

The ingredients of a Cisco Apprentice

Qualifications are important but the right attitude and desire to work for Cisco count more. We look for a minimum of 160 UCAS points as an indicator of your ability to learn but you should be able to show us that you are:

Ambitious
Innovative
Customer focused
Organised
Curious

Resilient
Methodical
Logical
Pragmatic
Persuasive

Commercially-minded
Analytical
Logical
