

Data at the Heart of Digital Resilience

Lauren Wilson, Field CTO Splunk

Forward- looking statements

This presentation may contain forward-looking statements regarding future events, plans or the expected financial performance of our company, including our expectations regarding our products, technology, strategy, customers, markets, acquisitions and investments. These statements reflect management's current expectations, estimates and assumptions based on the information currently available to us. These forward-looking statements are not guarantees of future performance and involve significant risks, uncertainties and other factors that may cause our actual results, performance or achievements to be materially different from results, performance or achievements expressed or implied by the forward-looking statements contained in this presentation. For additional information about factors that could cause actual results to differ materially from those described in the forward-looking statements made in this presentation, please refer to Cisco's periodic reports its other filings with the SEC, including the risk factors identified in Cisco's most recent quarterly report on Form 10-Q and annual report on Form 10-K, copies of which may be obtained by visiting the Cisco Investor Relations website at investor.cisco.com or the SEC's website at www.sec.gov. Any projections in this presentation are based on information currently available to Cisco, which is subject to change. The forward-looking statements made in this presentation are made as of the time and date of this presentation. If reviewed after the initial presentation, even if made available by us, on our website or otherwise, it may not contain current or accurate information. We disclaim any obligation to update or revise any forward-looking statement based on new information, future events or otherwise, except as required by applicable law.

In addition, any information about our roadmap outlines or our general product direction is subject to change at any time without notice. It is for informational purposes only and shall not be incorporated into any contract or other commitment. We undertake no obligation either to develop the features or functionalities described, in alpha or beta or in preview (used interchangeably), or to include any such feature or functionality in a future release.

Cisco powers how people and technology work together across the physical and digital worlds

AI-ready data centers

Transform data centers to power AI workloads anywhere

Future-proofed workplaces

Modernise everywhere people and technology work and serve customers

Secure global connectivity

Digital resilience

Keep the organisation securely up and running in the face of any disruption

Accelerated by Cisco AI

“It’s down”

Unprecedented threats to digital resilience

External Cyber Threats

Adversaries are more capable, better equipped, and relentless.

Speed

Faster execution
Faster innovation

Scale

Mass automation
More attackers

Sophistication

Enhanced attackers
Access to tooling

Internal IT Outages

Complexity, dependency, and change increase the risk of disruption.

Complexity

Interconnected systems
Hybrid environments

Dependency

Business reliance on digital services
Third-party providers

Change

Continuous transformation
Faster release cycles

Unified Impact

Operational disruption and downtime

Financial loss and inefficiency

Customer impact and trust erosion

Digital resilience is challenged from every direction

External Pressure

Nation States
Cyber Criminals
Hacktivists
Supply chain risk
Regulatory Pressure

Internal Inhibitors

Data Silos
Internal Friction
Complex workflows
Budget Battles
Disparate Tooling
Skill shortages
Continuous Change
Growing portfolios
Shadow AI
Burnout
Tech Debt
Competing Priorities

Digital Resilience is a \$400B problem

Rapid Data Explosion

Data volume will reach 390+ zettabytes by 2028 and 55% will be machine generated.

Context Gap

Only 34% of organisations have clean centralised data with real time integration for AI agents.

Trust and Governance Gap

Only 24% of organisations have implemented guardrails and live monitoring to govern AI.

TRUE Resilience = Prevention
+ Detection
+ Investigation
+ Response
+ Recovery

The ability to detect,
investigate and respond is a
data problem.

Data isn't just what we protect,
it's **how** we protect.

Better **data** → better **visibility**
→ better **context**
→ better **investigation**
→ better **decisions**
→ less **downtime**

Where is the data you need?

Data from everywhere

Answers that drive action

Cisco Data Fabric brings...

Federated Search powered by Splunk

Breaking down data silos for a unified view

Gain real-time insights for distributed data without the pain, cost, or delay of data movement.

Streamline access, insights and costs

One data source, cross-domain to enhance resilience

If AI can't see all your data,

how can you **trust** it to make
good decisions?

We stand on the brink of an **AI-driven enterprise transformation**

>60%

have active agentic
pilots today

1.3 billion

agents expected to be
in operation by 2028

LLMs

GPUs

LLMs

Reasoning

Operational Data

Intelligence

GPUs

Processing Power

Contextualised machine data is the fuel for AgenticOps

Turn machine data into **real-time operational truth**
that agentic AI can act on accurately, at scale.

Move us from reactive to predictive

Anticipate issues to
protect customer
experience

Accelerate resolution with
guided, confident
decisions

Automate with guardrails
to focus on driving
innovation

Accelerate Your Journey to the Agentic Enterprise with Splunk

Foundational

Optimised AI-ready
Data Foundation

End silos and govern
telemetry so AI decisions
are accurate, auditable
and reliable.

Augmented

Faster, Democratised
Expertise

Contextual assistants
empowering more people
to answer the why, without
specialist knowledge.

Agentic

Orchestrated
Action at Scale

Supervised agents to
execute repeatable
playbooks at scale
cutting time to resolution
and operational toil.

Innovative

Build a Proprietary
AI Advantage

Train custom models to
unlock unique, hard to
replicate business
outcomes.

For over
two decades,
top brands have
trusted **Splunk**
for Digital Resilience

Splunk Go: Dublin & London

Join our *complimentary, user-focused experience* where you'll explore how Splunk's latest AI innovations and the Cisco Data Fabric can help you build digital resilience at agentic speed.

Learn how to detect, investigate, and troubleshoot faster in the AI era. Walk away with proven strategies you can put into practice immediately. Experience expert-led sessions, live demos, and product deep-dives that showcase the latest solutions that provide the unmatched visibility, security, and control needed to build resilience for AI, with AI.
