CISCO Connect

Unleashing the Agentic SOC with Splunk

Michael Fignon
EMEA Security Specialist Director

Forward-looking statements

This presentation may contain forward-looking statements regarding future events, plans or the expected financial performance of our company, including our expectations regarding our products, technology, strategy, customers, markets, acquisitions and investments. These statements reflect management's current expectations, estimates and assumptions based on the information currently available to us. These forward-looking statements are not guarantees of future performance and involve significant risks, uncertainties and other factors that may cause our actual results, performance or achievements to be materially different from results, performance or achievements expressed or implied by the forward-looking statements contained in this presentation. For additional information about factors that could cause actual results to differ materially from those described in the forward-looking statements made in this presentation, please refer to Cisco's periodic reports its other filings with the SEC, including the risk factors identified in Cisco's most recent quarterly report on Form 10-Q and annual report on Form 10-K, copies of which may be obtained by visiting the Cisco Investor Relations website at investor.cisco.com or the SEC's website at www.sec.gov. Any projections in this presentation are based on information currently available to Cisco, which is subject to change. The forward-looking statements made in this presentation are made as of the time and date of this presentation. If reviewed after the initial presentation, even if made available by us, on our website or otherwise, it may not contain current or accurate information. We disclaim any obligation to update or revise any forward-looking statement based on new information, future events or otherwise, except as required by applicable law.

In addition, any information about our roadmap outlines or our general product direction is subject to change at any time without notice. It is for informational purposes only and shall not be incorporated into any contract or other commitment. We undertake no obligation either to develop the features or functionalities described, in alpha or beta or in preview (used interchangeably), or to include any such feature or functionality in a future release.

Security from the Agentic Frontier

The AI Transformation is here
and we must transform for it

The New Reality of SecOps

The Pressures

AI-driven threats
Geopolitical volatility

Regulation

Exponential data growth

Cyber Skills Shortage

The Challenge

Blind spots

Reactive firefighting

Outdated, ineffective operations

The Goal

Complete visibility

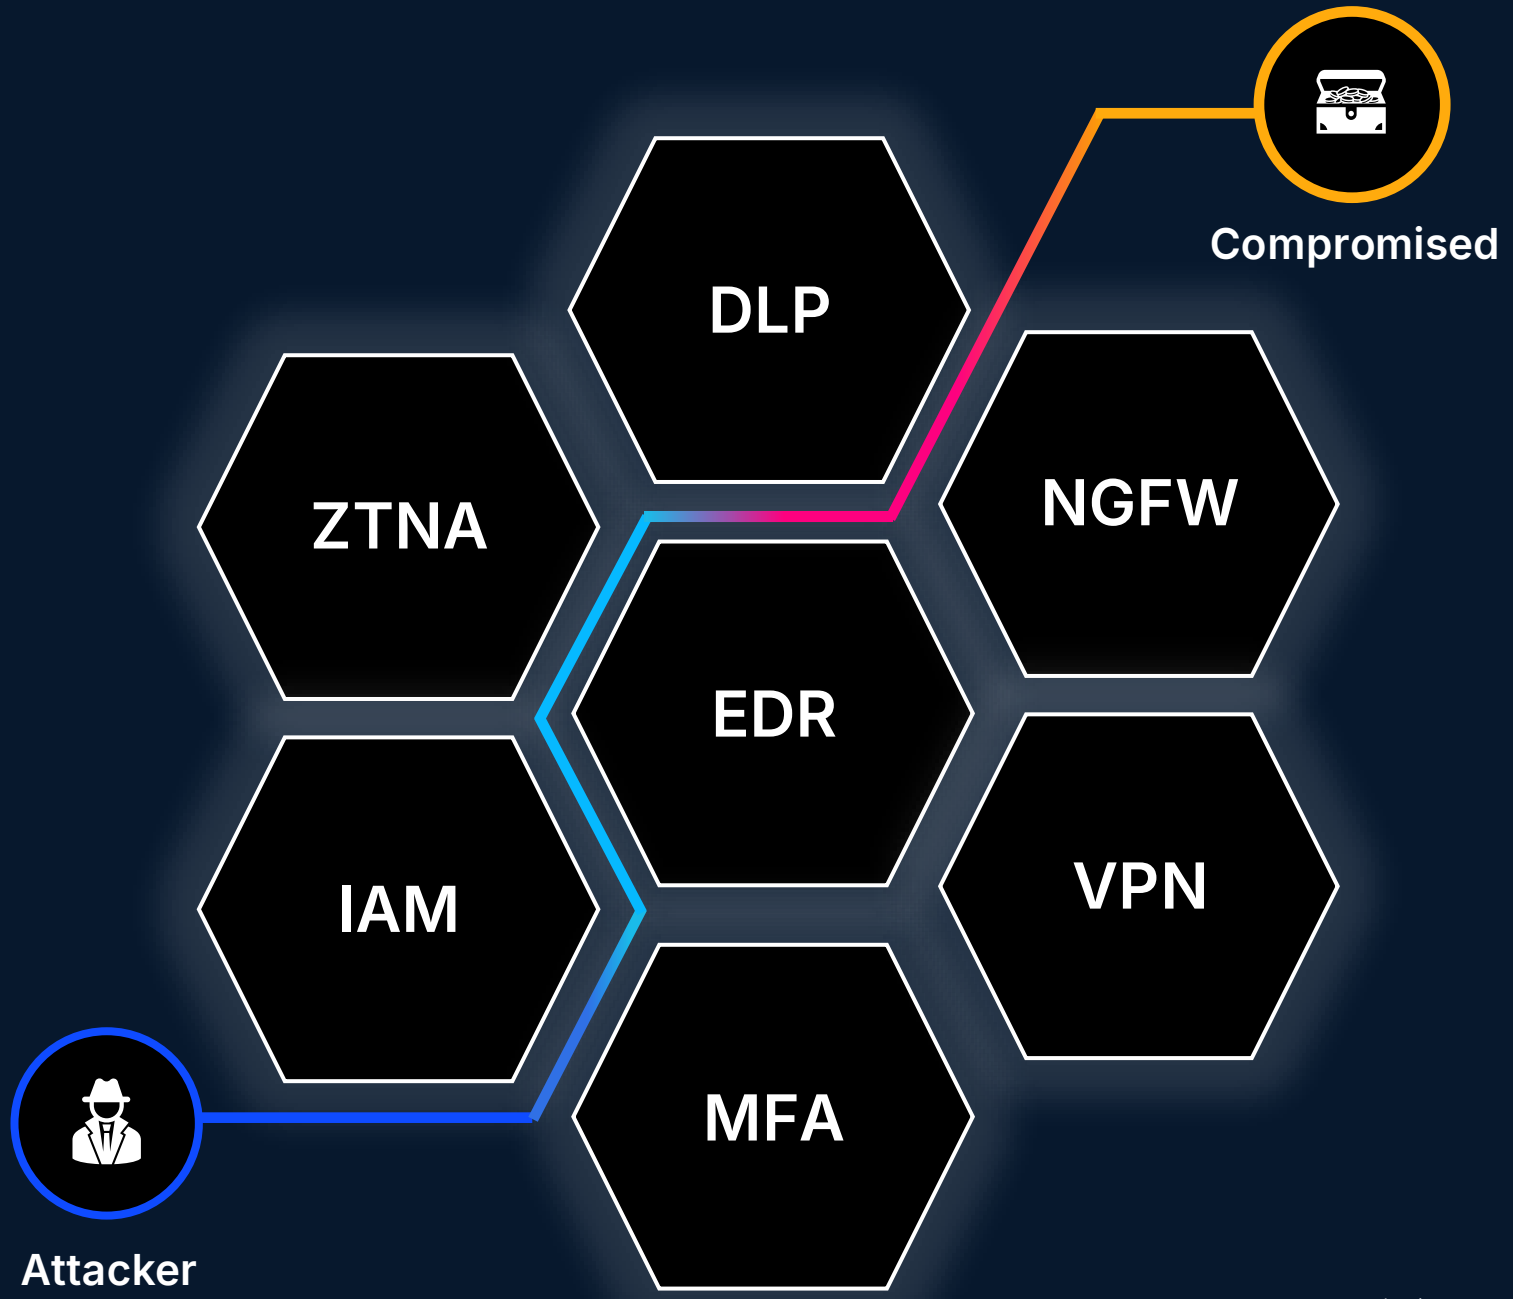
Hyper-agility

Proactive resilience

cisco

Attackers don’t go through these tools, they go around.

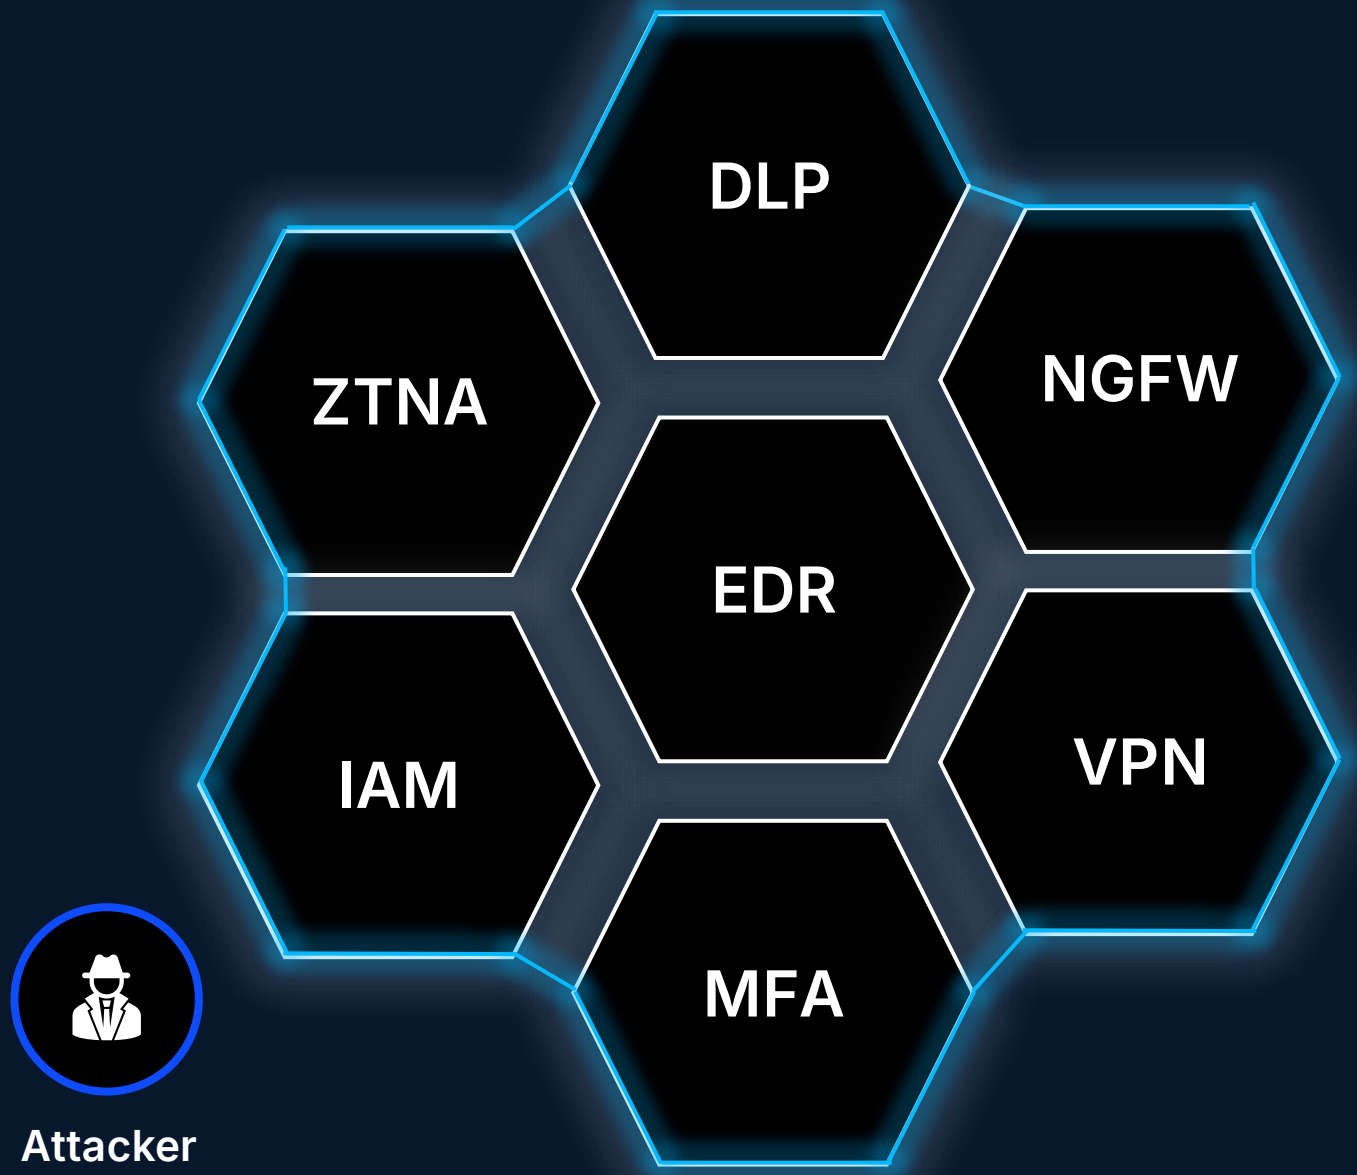
Consider the whole picture, beyond the closed ecosystems and between the margins.



Remove silos and see the full picture

- All sources
- Internal applications
- Network layer
- Behavior Analytics

Defend against AI attacks now and in the future



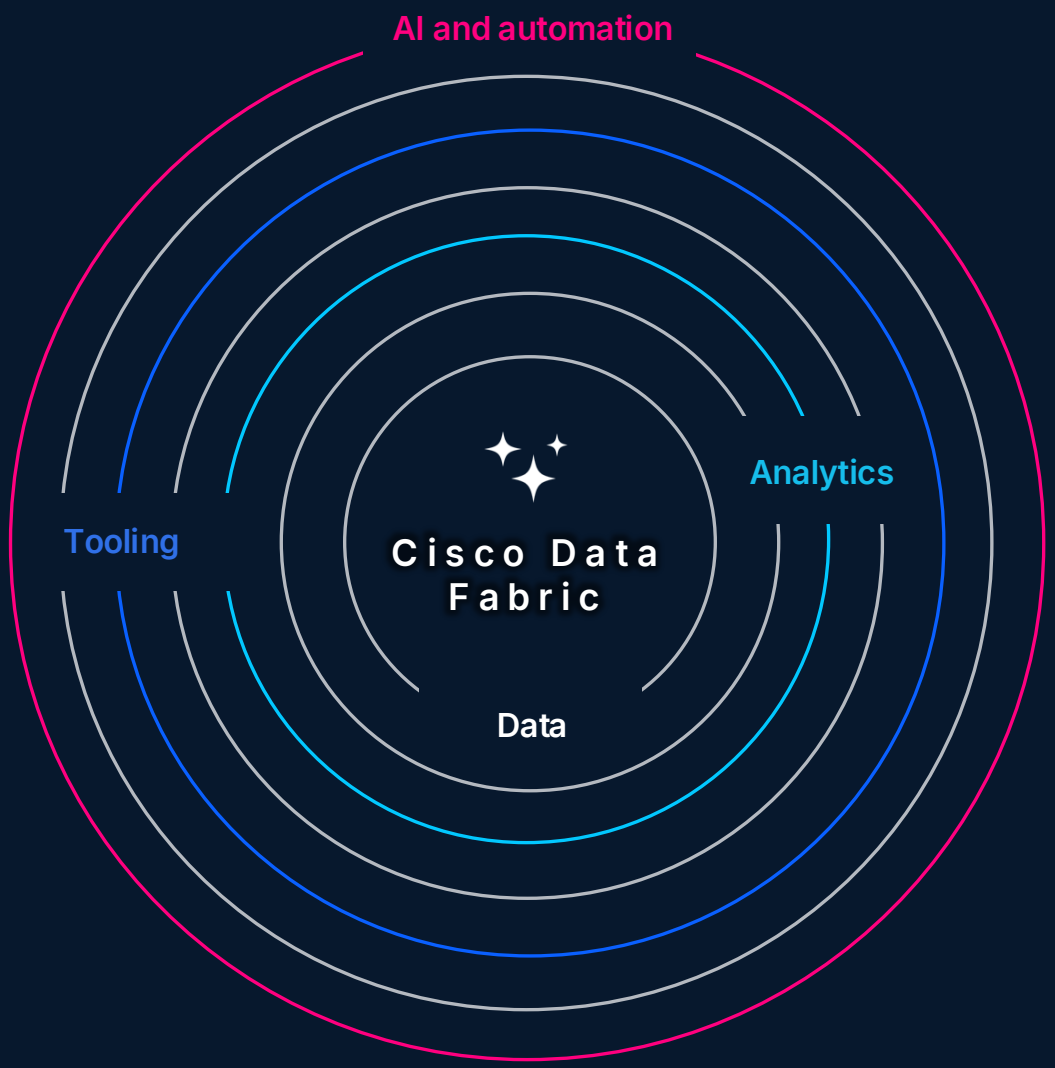
The way forward

A New Operating Model

An integrated system bringing together Data, Analytics, Tooling, and AI for a powerful analyst experience.

Agentic SOC

- Complete visibility
- Contextual understanding
- Intuitive analyst experience
- Machine speed & scale



A Foundation of High-Fidelity Data

Data fabric
Data management
Data pipelines

Analyzed at Machine Speed

TI enrichment & context
Correlated detections
Investigation & hunting

With Intuitive SOC Tooling

Single work surface for TDIR
Team coordination
Integrated workflows

And Human-led AI & Automation

Customizable agents
Reasons and acts decisively
Prevents emerging threats

Dedicated and purpose-built Security AI Agents

Detection agent

Malware Reversing Agent

Triage Agent

Orchestration/ SOP Agent

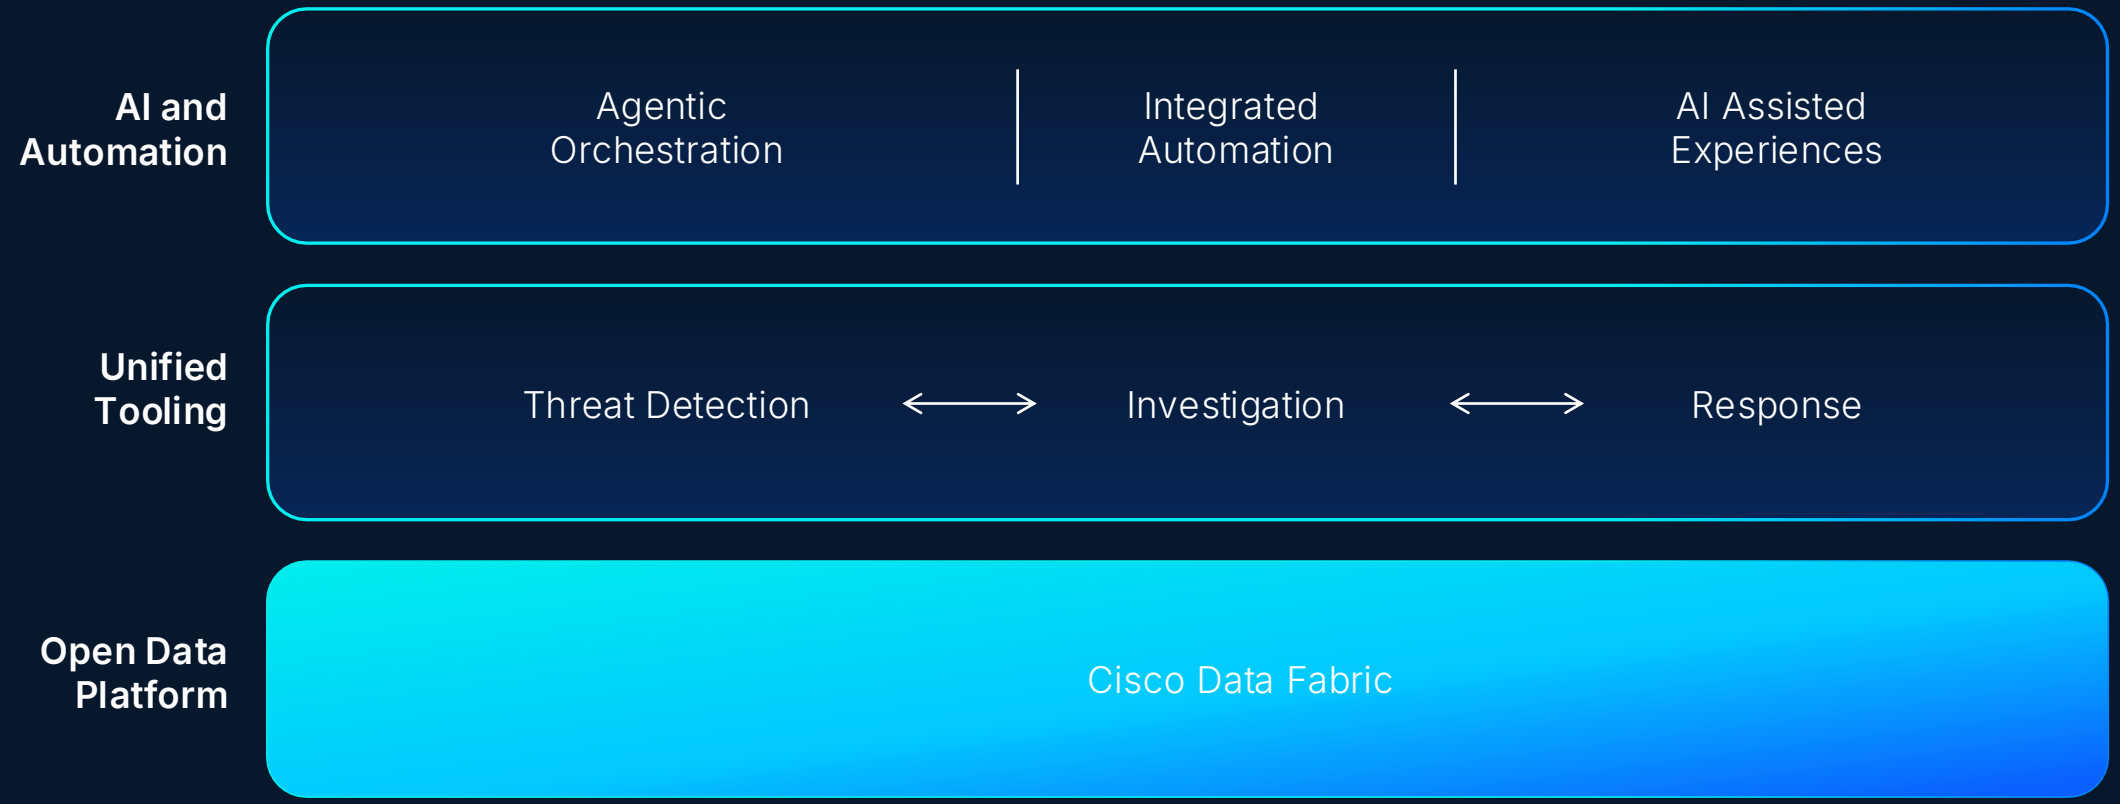
Guided Response + Automation Agents

SPEED

Detection → Triage → Investigation → Response

cisco

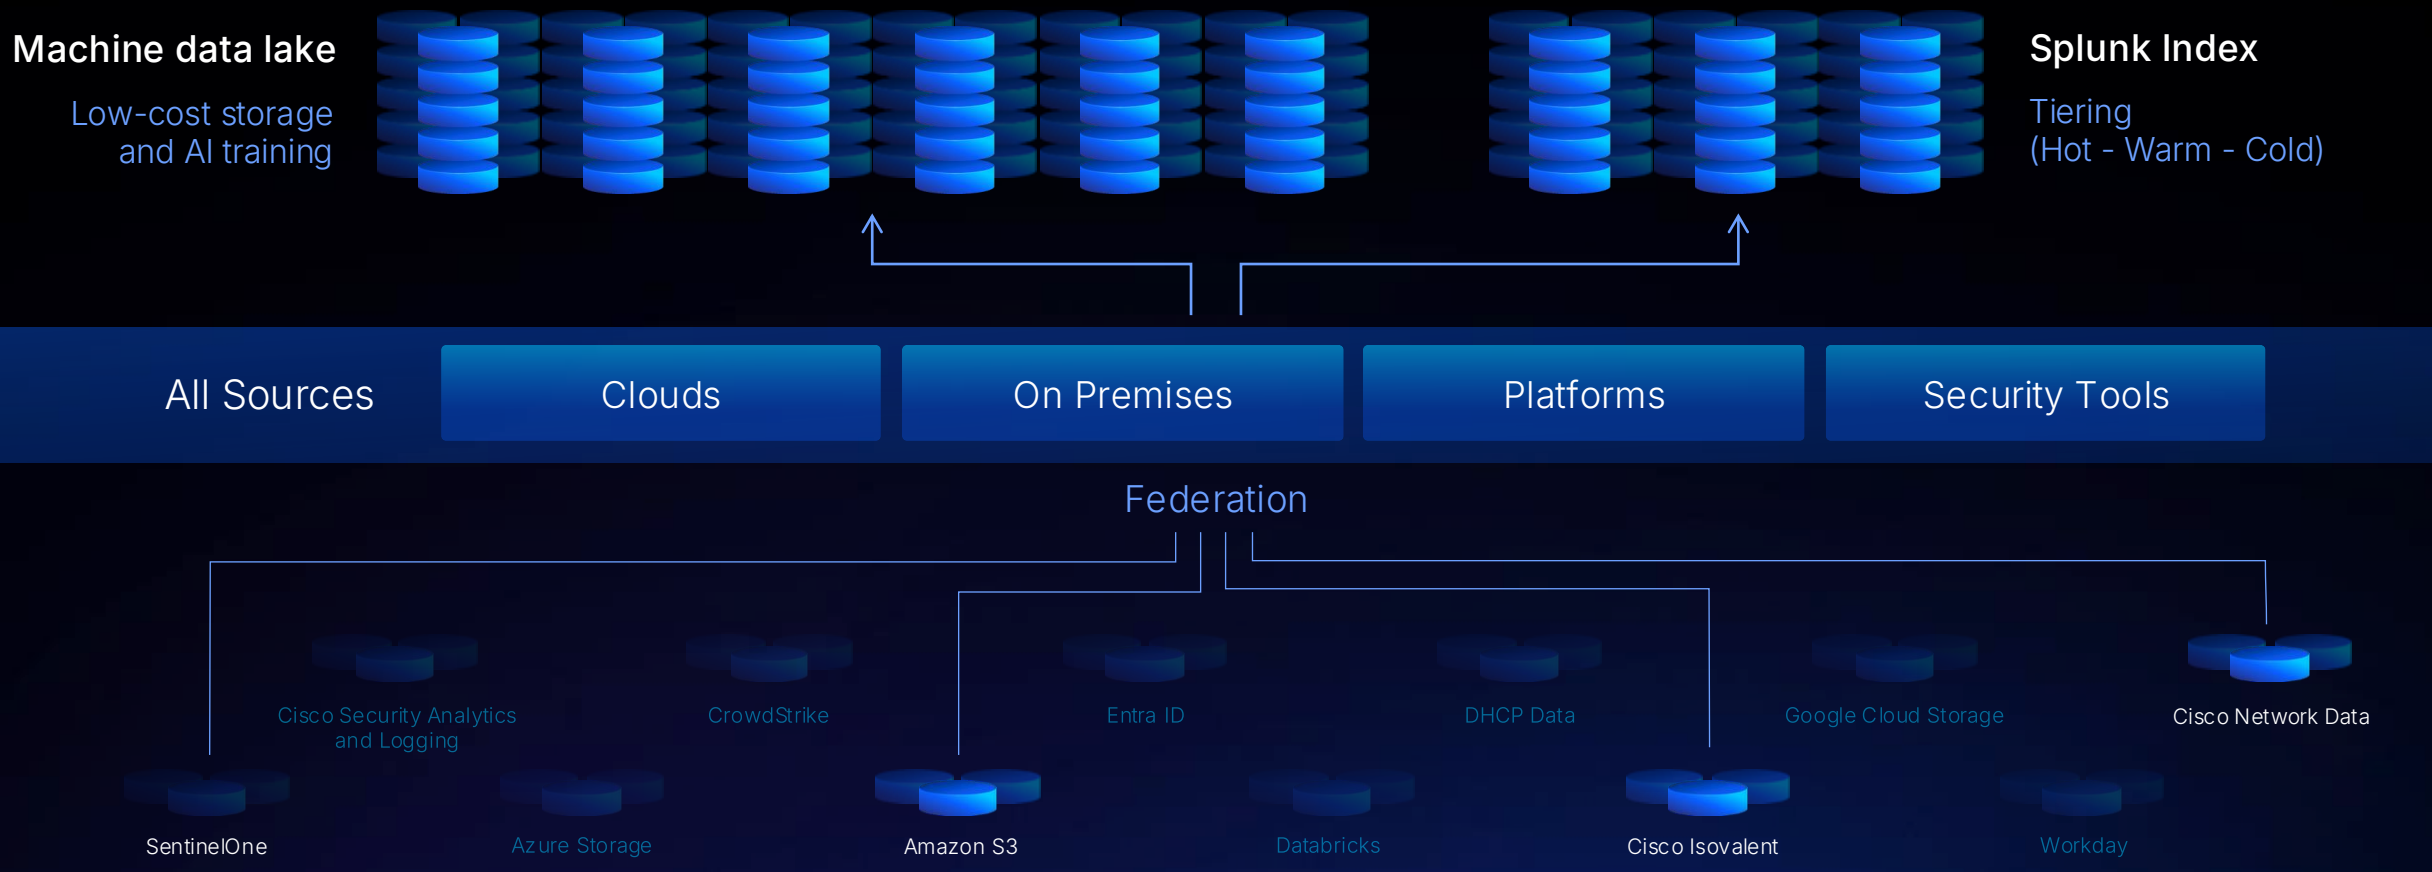
The new operating model for security in the Agentic era



OPEN DATA PLAFORM

Turn ludicrous amounts of data into your security advantage

Cisco Data Fabric



Enterprise Security

Now available in two editions

Essentials

- SIEM
- TIM
- Detect Studio
- Exposure Analytics

Premier

- Agents
- Attack Analyzer
- UEBA
- SOAR

Unmatched Strengths that Set Splunk ES Apart

An open, data-native foundation data federation and a unified TDIR platform backed by the industry's deepest ecosystem

Data Efficiency

Federated detections

Optimized for sovereignty

Cisco Data Fabric

Cost effective data management

Agentic SOC

Automated, machine-speed defences

high-fidelity context

AI for every step

End to end SecOps workflow

Enhanced Value

Detection Studio

Exposure Analytics

Attack Analyzer

UEBA

Increased Product Utility

Simplified TCO

OOTB

Tool consolidation

Transparent pricing

Enterprise Agreements

Lower TCO

Splunk is a recognized leader in cybersecurity

Splunk Security provides an unparalleled foundation to power the SOC of the future

Gartner

Eleven-Time Leader

2025 Gartner® Magic Quadrant™ for SIEM

Ranked #1 in all three Use Cases

2025 Gartner® Critical Capabilities for SIEM
