

5 steps to an effective digital workplace

Whatever your business size you need your network to deliver an exceptional experience for every employee. It's the secret to being at your most productive, innovative and successful. Cisco helps businesses of all sizes build a network that enables everyone to work smarter, and to innovate.

1

Ensure productivity everywhere.

With a Cisco network you have the confidence that the right people have the right access to the devices, applications and information they need, when they need it. It means your teams are connected, secure and productive. So they aren't slowed down and have time to focus on innovation.

“Since implementing our Cisco network and applications, the whole dynamic of the company has changed. People are working in different ways. Things are being done faster and on time. It's been an absolute transformation.”

– Kristian Elmore ICT Director, Robert Heath Heating

2

Keep everyone and everything connected.

We make it easy with our high-performance, reliable and affordable Cisco switches, routers and wireless products. Solutions that fit together, meet your current and future needs, and won't let you down.

3

Provide mobility as standard.

Today everyone expects the same level of flexibility, availability and service at work that they get with their personal devices. With Cisco Wi-Fi you get enterprise level quality and reliability that are simple to install and manage. At prices to fit your budget.

4

Bake-in security at every level.

To help you have the best possible security, we build it into the network. Helping you to better detect threats, reduce risk and minimize the impact of attacks if they happen. And so you don't need to simply rely on a perimeter firewall.

“Cisco helps us scale our solutions and networks for things we haven't even thought of yet, while taking advantage of new technologies.”

– Simon Furber, network and data centre manager, Brunel University

5

Be prepared for the future.

With the pace of digital change, you need the right network in place to be competitive and keep ahead. And innovate. We can help you build a network to operate more efficiently, grow revenue and improve your business results.

The right choice for your business

Let's connect. Learn more about how you can create a digital workplace for innovation with Cisco solutions for smaller sites.
