

Secure Remote Workers

The abrupt shift towards massively supporting remote workers creates a series of security challenges – keeping your business running in a very different environment or at a greater scale than ever before. This is putting a sudden strain on both your security and IT teams who are being tasked with quickly providing support for an unprecedented number of offsite workers and their devices – without compromising security.

Taking into account this new reality, you need a simple and easy way to secure remote workers at the speed and the scale of your business. The Cisco Secure Remote Worker solution unifies user and device protection at scale, making it easy to verify, enable secure access and defend remote workers at anytime from anywhere. This integrated solution helps accelerate your business success with security that works together, delivering the power of Cisco Duo, AnyConnect, Umbrella and AMP for Endpoints.

Duo

verifies the identity of all users before granting access to corporate applications.

[Learn more](#)

AnyConnect

enables secure access to the enterprise network for any user, from any device, at any time, in any location.

[Learn more](#)

Umbrella

provides the first line of defense against threats on the internet wherever users go.

[Learn more](#)

AMP for Endpoints

provides the last line of defense, enabling protection, detection and response on the endpoint against known and unknown threats.
