

Cisco HyperFlex Systems with Citrix XenApp and XenDesktop

Deploy VDI solutions easily and cost-effectively using hyperconverged systems

The combination of Cisco HyperFlex Systems with Citrix XenApp and XenDesktop solves the toughest digital workplace issues. Maintain business control with an infrastructure that enables both pay-as-you-grow and consistent performance delivery as you scale. At the same time, enable users with BYOD support and simplified access that brings secure desktop and application access to any device over any connection, anytime.

Implement with confidence using a validated virtual desktop infrastructure (VDI) architecture that integrates with a highly flexible networking fabric.

Do all this while achieving greater application and data protection enabled by centralized data and execution; which means fewer

attack vectors, simplified backup, and greater control over sensitive information.

Cisco HyperFlex has been shown to reduce storage costs by 80%, while Citrix XenApp reduces management costs by as much as 90%.

Hyperconverged integrated systems (HCIS) enable rapid VDI deployments for resource-constrained organizations through scalability, simplified management, and lower upfront costs. Cisco HyperFlex Systems are part of the broad, validated UCS architecture in use by over 50,000 customers and Citrix is trusted by 98% of Fortune 500 companies.

Cisco HyperFlex Systems with Citrix XenApp and XenDesktop—benefits of our joint solution

Simple to use

- Implement, manage, and protect business applications more easily with a simplified, streamlined architecture that can be managed from a single, unified Citrix XenDesktop console
- Deploy faster with a validated, pre-packaged solution that enables pre-configuration of access rights and controls using service profile templates
- Keep your data safe by maintaining sensitive information in the data center and using virtual apps and desktops
- Reduce complexity by removing the need for separately attached storage

Efficient

- Delight end-users while exploiting the full potential of system resources with management tools that deliver greater insight, and more intelligent utilization of network, compute, and storage
- Deliver a better user experience with fast and intuitive self-service access to applications and an infrastructure that maintains performance at scale
- Optimize infrastructure and reduce costs with independent scaling of rack and blade servers while making the most of existing end-point devices
- Secure end-points with safe access to desktops, apps and services for users using granular access control policies

Flexible

- Take advantage of accelerating business change with a future-ready architecture that enables faster deployment, varied device types, easier adaptation, and rapid expansion
- Make the most of end-user devices, including BYOD and mobile, with virtual application delivery
- Scale while maintaining business control with an infrastructure that enables pay-as-you-grow
- Ready your business for the future with virtual delivery that makes deploying new business applications fast and easy

About Citrix

Citrix (NASDAQ:CTXS) aims to power a world where people, organizations and things are securely connected and accessible to make the extraordinary possible. Its technology makes the world's apps and data secure and easy to access, empowering people to work anywhere and at any time. Citrix provides a complete and integrated portfolio of Workspace-as-a-Service, application delivery, virtualization, mobility, network delivery and file sharing solutions that enables IT to ensure critical systems are securely available to users via the cloud or on-premise and across any device or platform. With annual revenue in 2015 of \$3.28 billion, Citrix solutions are in use by more than 400,000 organizations and over 100 million users globally. Learn more at www.citrix.com.

About Cisco

Cisco designs and sells broad lines of products, provides services and delivers integrated solutions to develop and connect networks around the world. Over the last 30 years, we have been the world's leader in connecting people, things, and technologies, changing the way the world works, lives, plays, and learns in an increasingly digital world.
