

Benefits of Migrating to Cisco Catalyst 9400 Switches

Why migrate to the Cisco Catalyst 9400 Series switches? Simple, Secure, Ready.

Digital disruption is changing how we think about our networks. Whether customers or employees, the “experience” has become a strategic imperative. The Cisco Catalyst 9400 Series modular access switches are designed to help you change your network from a platform of connectivity to a platform of services.

The first purpose-built platforms designed for full fabric-control with Cisco DNA and Software-Defined Access (SD-Access), these switches deliver stellar performance and functionality and extend Cisco’s networking leadership with significant innovations in security, mobility, IoT and cloud.

Finance your switching migration with Cisco Capital

Let financing from Cisco Capital make migrating your switches and accelerating your digital transformation even easier. Cisco Capital Easy Pay makes this transition as easy as possible with no upfront costs and predictable monthly payments. You pay 90% of the total over a three-year period that is completely interest free. At the end of the term, you have the following options to return and refresh the equipment, extend your lease or purchase the solution at 10% of original cost. Take advantage of this market leading interest rate and use your budget for other investments.

Improve your results with our services

No matter where you are in your journey, Cisco and our partners offer services expertise to help you accelerate your digital network transformation – from migration and optimization services to award-winning support. We help you speed your migration deployments, reduce risk and complexity and provide business continuity as you refresh your network. To simplify and support your migration Cisco offers services to streamline the process and help you get the most out of your investment. The Migration Service helps control costs, improve operational excellence and mitigate risk during your refresh.

Learn more about all [Services for Switches](#).

- Reduced cost and complexity with Cisco Software-Defined Access by automating policy, enabling fast service creation and providing complete visibility into the wired and wireless access networks.
- Create better customer and employee experiences through higher performance and improved support for mobility and new apps.
- Advanced end-to-end security to handle threats before, during and after attacks.

The Catalyst 9000 Series is also the first in the line to offer the Cisco IOS XE and Cisco ONE subscription-based software licenses, allowing customers to purchase the features and capabilities they need. See the benefits you could be receiving now by comparing the Cisco Catalyst 9300 Series to older switches (see table 1).
