The bridge to possible

Infrastructure Transformation

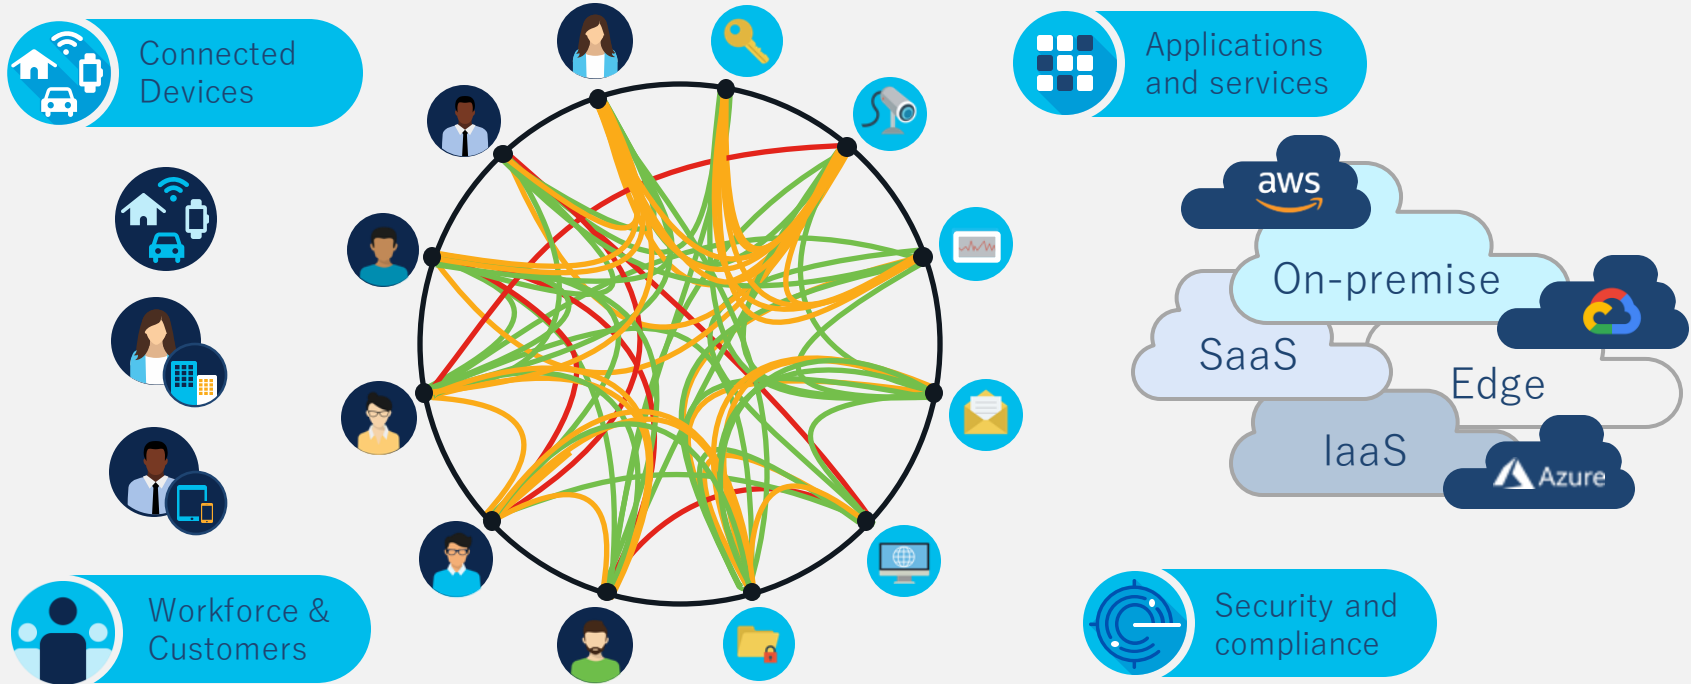

Ramon Vinals - Systems Engineer Director, LatAm
@rvinals

```
print "Current date and time"
str method of datetime object:
print str(now)

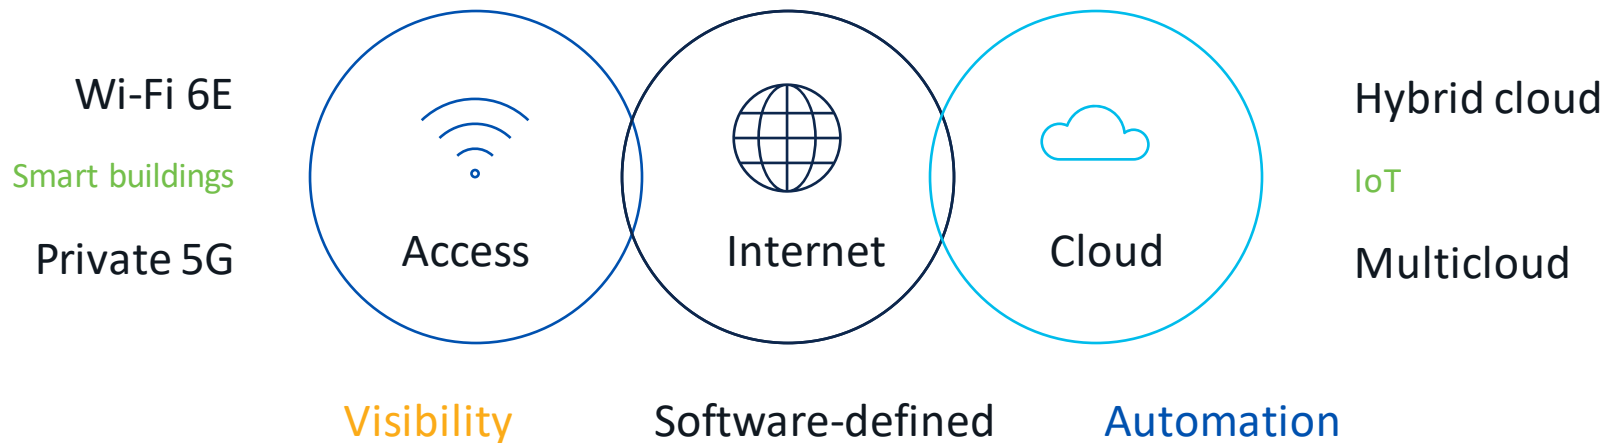

print
print "Current date"
attributes:
print "Current year"
print "Current month"
print "Current day"
print "Current hour"
print "Current minute"
print "Current second"
```

*Everything has changed...
... so why do we keep doing the same?*

Is your network keeping up with the pace of change?

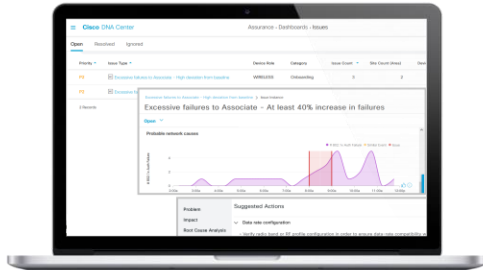

The network has transformed

The underlying network keeps **expanding**
and increasing in **fragmentation** and **security risks...**

Simplify IT with Cisco DNA Center

Scale at the speed of business

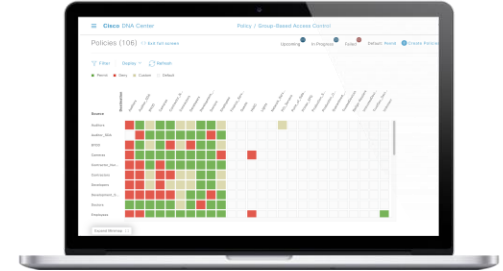

Get **more** work done, **quicker**,
with **accuracy**

Deliver optimal user experience

Get ahead of the **issues**
with **predictive** analytics

Secure the digital enterprise

Simplify **Zero Trust**
for the workplace

When the IT experience
suffers....

... the **user**
experience suffers
