

Cisco Active Advisor

Everything you wanted to know about your network, but didn't know where to look.

A free, cloud service

that manages the lifecycle of Cisco's network products.

Automatically create a network inventory and find:

End-of-life products

Expired Warranty and Service Contracts

Security advisories

With Cisco Active Advisor you can:

Reduce Risk

Improve Network Health

Save Money and Time

In fact, if everyone used Cisco Active Advisor to create a network inventory of all the switches, routers and wireless access points Cisco shipped in the last 5 years, they would **save 13 million person-hours.**

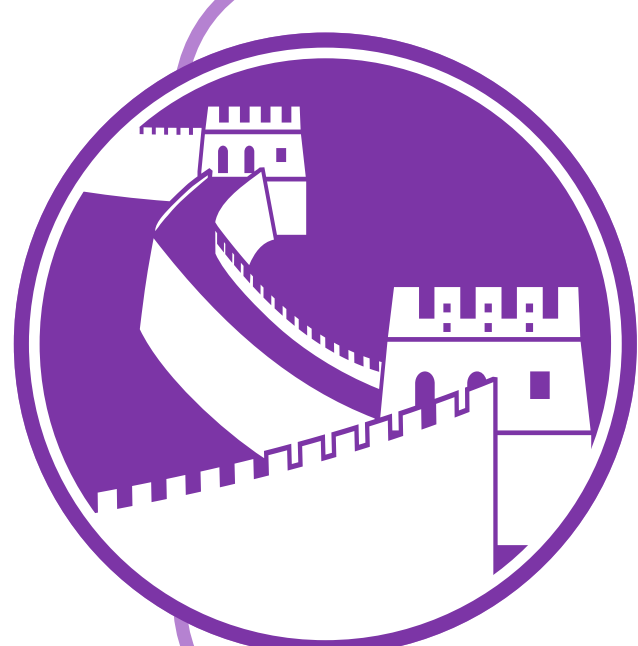

What could you do with 13 million person-hours?

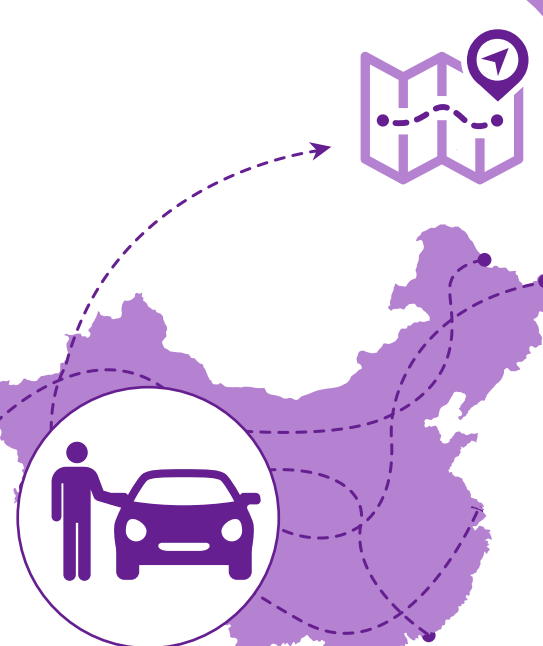

Give the entire working population of London a 4-day vacation.

Build the Empire State Building in New York.

Tour China's entire 4.1 million km road network 260 times.

Register now to try the free Cisco Active Advisor service:

1. Visit www.ciscoactiveadvisor.com
2. Log in with your Cisco.com account
3. Click Scan Network
