

SASE integrace Cisco Meraki MX Cisco Umbrella SSE

Tech Club Webinář 23.5.2023

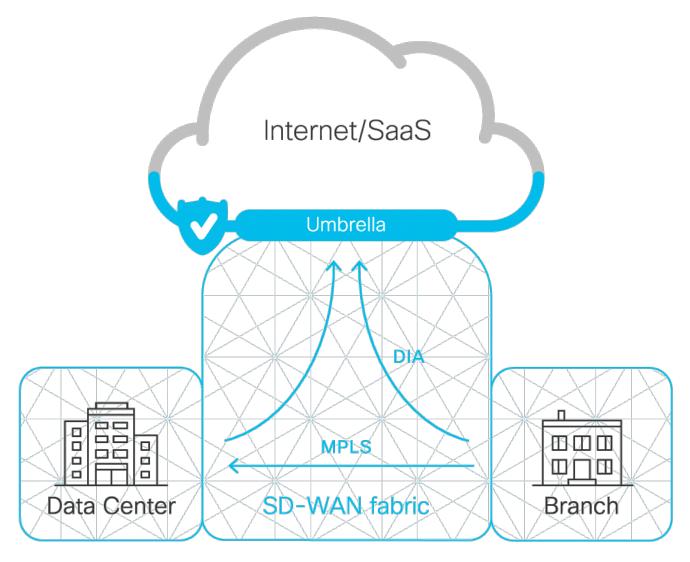

Andrej Jeleník Systems Engineer Cisco ČR

Secure Access Service Edge (SASE)

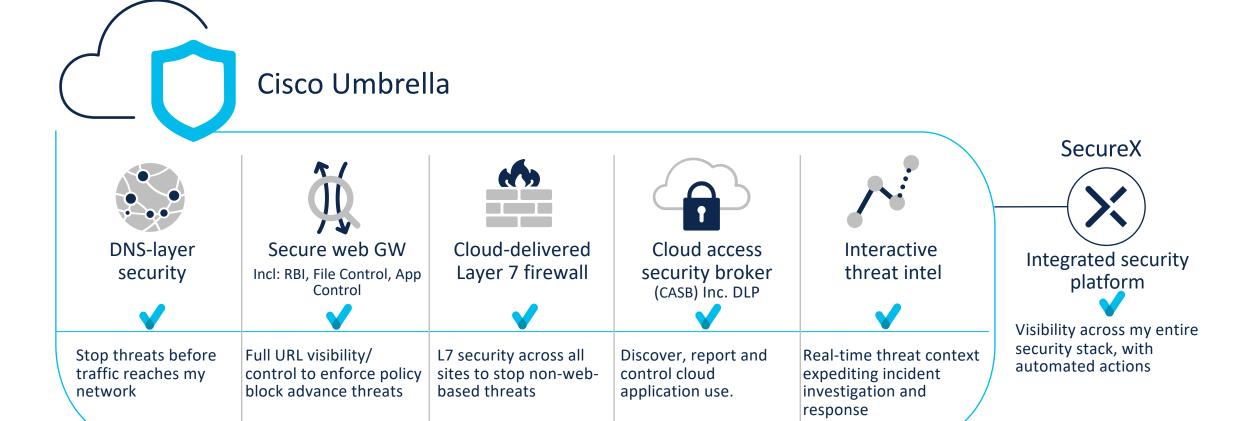

Meraki / Umbrella SASE Integration

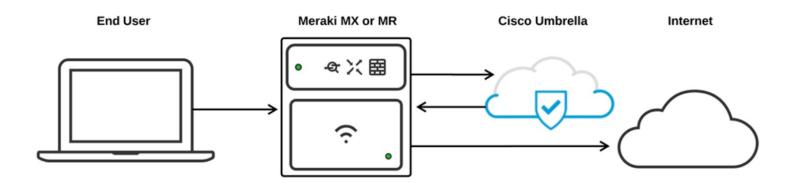

SASE cloud security capabilities / SIG

#1 Manually Integrating Meraki with Umbrella using API key

Firmware Requirements

- MX Platform requires MX firmware version 15 or newer.
- MR Platform requires MR firmware version 26.1 or newer.

Licensing Requirements

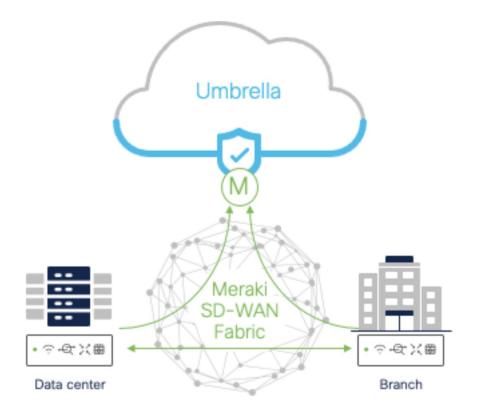

- MX Platform
 - This feature is available for an MX with Advanced Security license
 - Z3 with an Enterprise license (as Z3 does not support <u>Advanced Security license</u>).
- MR Platform
 - Manual Integration: Enterprise License
 - Automatic Integration: Advanced licenses.

Linking the Meraki and Umbrella Dashboards

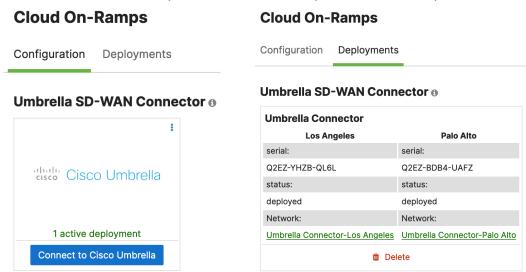

- 1. Generate the Umbrella API Key
- 2. Apply the Umbrella API Key to a Meraki Network
- 3. Linking and Applying an Umbrella Policy
 - ✓ Linking a Meraki Group Policy to an Umbrella Policy (MX & MR)
 - ✓ Link the Meraki Group Policy with Umbrella
 - ✓ Apply an Umbrella Policy to the Group Policy
 - ✓ Applying the Group Policy to Clients
 - ✓ Linking an SSID to an Umbrella Policy (MR Only)
 - ✓ Apply an Umbrella Policy to the SSID
- 3. DNS Exclusion

#2 Using Connector Deployment SASE (On-Ramps) integration

- Create Umbrella Management API Keys on the Umbrella dashboard
- 2. Enable Cloud On-Ramp (one-click integration) in Meraki dashboard
- 3. Once fully deployed, the Connectors will be pre-configured
- 4. Connect your branch MX to the Connectors on the Site-to-Site VPN page
- Umbrella Network Tunnel Validation
- 6. Umbrella SIG Features and Policies
 - DNS Policies, Firewall Policies, Web Policies, DLP
