

Cisco CyberSecurity Academy

Enabling the next generation of Cybersecurity Specialists

Cybercrime is estimated to cost businesses worldwide up to \$2 trillion by the end of 2019. Cyberattacks damage much more than just your IT network; they can also affect your brand reputation, your revenue and your future. Swiss companies tend to underestimate cyber threats. Consequently, we are experiencing an alarming shortage of Cybersecurity Specialists in the Swiss market.

53% of attacks resulted in damages of \$500'000 or more*

55% of companies had to manage public scrutiny due to a breach*

58% of the companies breached had to manage an outage of more than 5 hours*

It is not a matter of “if” but “when” your company will come under a cyberattack.

That's why for the first time in Switzerland, Cisco offers a comprehensive Cybersecurity Program that leads to the Swiss Federal Diploma. This program aims to bridge the gap caused by the frightening shortage of Cybersecurity Specialists we are facing in the Swiss market. Our goal is to contribute to protecting our economy and families from the growing number of cyberthreats.

What you can expect from Cisco CyberSecurity Academy

Prepare your organization for digital transformation

Protect your customers and employees from breaches
