Superior User Experience Enables Anywhere, Anytime Collaboration to Transform Teaching and Learning

Cisco Webex Meetings, Cisco Webex Teams and Cisco Webex Board bring high-quality, easy-to-use collaboration to every classroom, workspace, desktop, pocket, and application. Cisco offers a complete high-quality, easy-to-use collaboration suite for K-12 schools, colleges, and universities. Webex Meetings fosters rich, interactive classes and meetings with voice, video, and live content sharing. Through Webex Teams, educators, students, administrators, and staff can create, meet, message, call, and share on any Webex Teams app-enabled device. Webex Board—an all-in-one, touch-based device—offers video conferencing, wireless presentation, and digital whiteboards to help foster even greater student-educator collaboration.

- Join a class or meeting from anywhere, on any desktop, mobile device, or video system to see, hear, and share content with everyone.
- Make or receive calls where you want through the Webex Teams app via an IP phone or video endpoint in a classroom, office, or conference room.
- Annotate content in the Webex Teams app or take the all-in-one collaboration capabilities to the next level with Webex Teams Board.
- Record classes or meetings to review and share later via Webex Meetings.
- Initiate and manage meetings from Microsoft Outlook, Lotus Notes, or your learning management system (LMS).

Use Cases of Cisco Collaboration in Action

- **Expanded distance and online learning:** Increase enrollment by extending courses to students across town or around the world.
- **Improved student experience:** Expand the culture of collaboration in the classroom and create an active learning space that invites student engagement before, during, and after class. Erasing traditional classroom boundaries invites homebound or remote learners to work with their peers and class content as if they were colocated.
- **Improved student productivity:** Provide Webex Teams student accounts to enable virtual collaborative work groups. Learn about student privacy requirements.
At a Glance

- **Extended office hours:** Offer a convenient way for educators, students, administrators, and parents to collaborate outside the learning environment with virtual office hours, tutoring, and parent-teacher conferences from anywhere.

- **Transformed professional development and curriculum creation:** Reduce costs and increase attendance by enabling anytime, anywhere professional education. Collaborate with colleagues to work on curriculum ideas and content.

- **Accelerated research:** Connect professors and students across universities to collaborate on research projects, accelerating innovative outcomes.

- **New administration efficiencies:** Increase productivity and efficiency, lower costs through remote IT support, and broadcast meetings to the public to increase attendance and community participation.

Why Cisco?

- **Reliability and performance:** Cisco has built a global network that ensures fast, reliable, real-time performance of collaboration applications.

- **Security:** Cisco understands the importance of security everywhere. That’s why we offer end-to-end data encryption, meeting password protection, secure single sign-on (SSO), and network and data center security.

- **Complete solution:** Cisco offers a complete integrated collaboration portfolio solution with audio, video, web meetings, virtual workspaces, whiteboarding, and recording, as well as LMS integrations from Cisco solution partners.*

- **Easy to use:** Cisco understands that if collaboration technology isn’t accessible, teachers and students won’t use it. Cisco Webex Meetings and Cisco Webex Teams are easy to understand and operate.
