

# Leveraging IIJA for Cybersecurity

## How to align the new federal funding to your needs

Our nation's critical infrastructure is under increasing attack. The Infrastructure Investment and Jobs Act (IIJA) can provide your agency with funding to secure and protect it with simple, easy-to-deploy solutions. This is a unique opportunity to fix blind spots, more easily meet mandates, and overcome any skills gap.

### 1 Today's needs

#### Establish trust

Make sure any user and device on your network can be trusted.

#### Secure your workforce

Protect your workforce with simple, powerful access security.

#### Increase threat awareness

Identify, detect, and block threats before it's too late.

### 2 How Cisco can help

#### Start with two Simple Solutions

Take your first steps to a Zero Trust architecture by leveraging two easy to use and deploy Cisco solutions for secure access and deeper visibility into your critical infrastructure.

[How to start >](#)

#### Secure Access by DUO

Enables secure access for any user and device, to any environment anywhere. Features complete device visibility and faster threat response via a scalable SaaS solution.

[Discover more >](#)

#### Cisco Umbrella

Provides intelligence to uncover current and emerging threats while giving you deeper visibility across all devices, ports, and cloud services anywhere.

### 3 IIJA funding is available for State, Local, and Tribal governments

#### Needs:

- Protect users/devices
- Fix blind spots
- Address threats

#### Funding:

- CARES, ARPA, IIJA, BRIC, and other funding programs
- Budget Redirection (CFO)

#### Solutions:

- DUO
- Umbrella
- AMP
- Thousand Eyes

#### Protect your network connections and resources

#### Needs:

- Establish trust
- Meet mandates

#### Funding:

- CARES, ARPA, IIJA, BRIC, and other funding programs

#### Solution:

- Start your journey to a Cisco Zero Trust architecture

The bridge to possible

Let us help you leverage IIJA funding opportunities  
Our Cisco funding and technology experts can help you accomplish your cybersecurity goals and maximize your limited resources.
