

Leveraging IIJA for Energy Infrastructure

How to align the new federal funding to your needs

Our nation is undergoing a unique transition to more sustainable energy. But maintaining reliability and security, while meeting regulatory mandates, can be a challenge. Fortunately, the Infrastructure Investment and Jobs Act (IIJA) provides significant funding for investing in clean and equitable energy. By leveraging the “technologies of tomorrow” you can expand access to energy efficiency and clean energy for your communities, businesses, and families.

1 Today's needs

Modernize grid

Modernize power grid to improve reliability and efficiencies, while improving customer satisfaction.

Improve threat awareness/response

Enhance safety and cybersecurity to keep field and plant facilities, plus networks and users, secure.

Leverage new energy models

Integrate new energy sources and consumption models that improve sustainability and resilience.

2 How Cisco can help

IT/OT convergence and automation

Enable the digital grid via remote command, control, and diagnostics while maintaining strong regulatory compliance via secure, highly reliable communication infrastructure.

[Get started >](#)

Industry-leading security

Protect operational infrastructure with defense in depth spanning both enterprise and utility operations. Ensure data privacy while maintaining operational reliability/uptime.

Renewables integration

Meet global and local carbon reduction initiatives by securely connecting/monitoring distributed renewables as they are integrated into the electric grid.
