

Security helps my business

grow

Cyberattacks can damage much more than just your IT systems. Security helps protect your brand, your revenue and your future.

29%

lose revenue

22%

lose customers

23%

lose opportunities

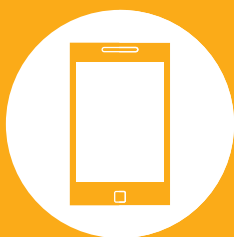

"Security helps my business focus on our products and outcomes and avoid wasting time due to attack and data loss."

Paollo Della Mea, Network Leader, General Electric

be more productive

Working from anywhere and on any device can help employees become more productive. But how can you do it securely? Here is what security professionals find very challenging to protect:

mobile devices

58%

cloud

57%

user behaviour

57%

"Security helps my business go beyond logistics and geographical constraints. It allows us to securely connect to a private location from anywhere and from any device."

Francisco Menezes, Solutions Architect, Maticmind

be compliant

The General Data Protection Regulation (GDPR) will come into force in May 2018. Are you ready?

70%

security professionals expect more scrutiny from regulators over the next year.

31%

organisations that had public breaches disclosed it to comply with regulations.

"Security helps my business remain compliant and prevent bad publicity."

Harne, Network Engineer, Equens Worldline
