15 March 2018

## DATA CENTER TECHNOLOGIES TRACK

Time	Session
1.00 PM	<p data-bbox="520 792 1374 828"><b>Customers' Perspectives of IT Transformation with Cisco</b></p> <p data-bbox="445 880 1453 1111">The Data Center landscape is changing rapidly. Customers want their DC to be cloud agnostic and yet at the same time deliver exactly the same performance, security and availability. Join us in this session to understand more about Cisco Data Center strategy, vision and priorities to help you achieve these outcomes. We will share how customer have benefited with proven track records.</p>
1.30 PM	<p data-bbox="616 1198 1278 1234"><b>Delivering Intent for Data Center Networking</b></p> <p data-bbox="448 1285 1445 1516">Cisco's intent-based networking (with ACI) represents a fundamental shift away from the manual and time-intensive methods by which networks are traditionally managed. These intent-based networks capture and translate business intent into network policies, and activate them across the infrastructure. With the introduction of assurance capabilities, they can now continuously verify the network is operating as intended.</p> <p data-bbox="440 1568 1453 1798">The Cisco Network Assurance Engine (CNAE) will enable always-on assurance in the data center network by combining mathematically accurate models of the network with more than 30 years of codified domain knowledge. It will help enable IT teams; predict the impact of changes, continuously verify network behaviour and assure security policy and compliance.</p> <p data-bbox="456 1850 1437 1995">Cisco is introducing powerful new assurance solutions that further demonstrate how intent-based networking systems move at the speed of digital business. Find out how we can help you achieve greater operations maturity, faster and simpler deployment.</p>

# Cisco Connect 2018

## IT's All You

Kuala Lumpur, Malaysia  
15 March 2018

2.00 PM	<p><b>IT Infrastructure for Any Application, Any Cloud and Any Scale</b></p> <p>Applications are at the heart of the digital business transformation. The changing landscape demands support for both traditional, monolithic workloads as well as distributed microservice architectures. Learn how you can deploy all of your applications on a Hyperflex platform that is ready for any application, any cloud and at any scale.</p>
2.30 PM	<p><b>Schneider Electric Presentation</b></p>
3.00 PM	<p><b>Break</b></p>
3.20 PM	<p><b>Dimension Data Presentation</b></p>
3.50 PM	<p><b>Veeam + Netapp Presentation</b></p>
4.20 PM	<p><b>Building a Secured Data Center with Big Data Analytics</b></p> <p>What is a Secured Data Center? What are the strategic and operation consideration for building a secured Data Center? Find how you can achieve secure zero-trust infrastructure, with network security forensics and policy compliance capability.</p>
4.50 PM	<p><b>Optimizing Your Cloud Strategy</b></p> <p>How can you easily deploy applications across Multi-Cloud (without learning all the clouds' API)? What are the strategic and operation consideration for Multi-Cloud? Can you make use of Artificial Intelligence to make sure all you</p>

# Cisco Connect 2018

## IT's All You

Kuala Lumpur, Malaysia  
15 March 2018

	workloads are optimized across Multi-Cloud? Join us in this session to find out the answers to your cloud questions
5.20 PM	Wrap Up and Close
5.40 PM	Networking and Happy Hour
