15 March 2018

INTENT-BASED NETWORKING TRACK

Time	Session
1.00 PM	<p>Solve problems before they become problems with Cisco DNA</p> <p>Could you anticipate network issues instead of reacting once they occurred? Now you can with Cisco DNA Analytics and Assurance. It continually collect network information, performs advanced analytics on events, quickly identify the most likely root cause and offer best practices for resolving issues. It greatly save you time and increase your network uptime. Come to learn how next-generation Assurance and Analytics enables a more intuitive, automated way to monitor and troubleshoot your network.</p>
1.45 PM	<p>Automate your network for greater agility and better security</p> <p>Cisco Software-Defined Access (SDA) provides a transformational shift in building and managing networks: faster, easier and more secure. By decoupling network functions from hardware, SDA helps ensure policy consistency and enables faster launches of new business services. Come to get a look into the Cisco SD-Access architecture and the underlying technologies! Also learn how Wireless is seamlessly integrated in SDA, automated and managed through a single management tool (DNA Centre).</p>
2.30 PM	<p>Security designed to work together</p>
3.00 PM	<p>Break</p>
3.20 PM	<p>Gold Sponsor Presentation</p>
3.50 PM	<p>Turn your WAN from a hindrance to an enabler of digital business</p> <p>With the migration of enterprise apps to the cloud, traditional WAN architectures can no longer meet the needs of enterprises. A new approach</p>

Cisco Connect 2018
