How do you decide what kind of multicloud is right for you?

The era of multicloud is here—are you ready?

Orgs are turning to cloud for the increased performance, availability, and security it offers while delivering a seamless user experience with less cost.

Did you know?

How do you decide what kind of multicloud is right for you?

Taking a strategic approach is vital to building and managing a multicloud that drives success—and in today’s market, security is more tantamount than ever.

90% of enterprises say their cloud skills gaps have doubled in the last three years.

30% of CIOs cited cloud migration as a key challenge.

99% of cloud security failures by 2025 will be due to human error.

97% of enterprises use cloud services at least once a month.

90% of business-critical workloads are multi-cloud.

Expertise for the first-and every-stage of your multicloud journey

Cloud Transformation Strategy: Align strategies and cloud capabilities based on your corporate vision and IT objectives.

Cloud Journey Assessment: Create a strong foundation and a road map of initiatives for your cloud strategy to help speed your journey to cloud.

Cloud Security Assessment: Determine areas of improvement to help secure your cloud and improve threat management.

Zero Trust Assessment: Identify critical assets and their relationships to internal and external entities so you can secure your business with a zero trust model.

Do you have the cloud skill sets you need to develop a solid and secure strategy for your successful move to multicloud? Cisco® can help.

Contact your local Cisco account representative or authorized Cisco partner today to begin the conversation.
