Cisco Live San Diego
• June 9–13
• Cisco Service Provider Booth Located in World of Solutions Hall
Market Segmentation

Communications Service Providers (CSPs)
- Tier 1
- Tier 2 & 3

IT Service Providers (ITSPs)
- Global Managed Service Providers
- Pure-Play MSSPs
- Regional Managed Service Providers
- Managed Detection & Response (MDR) Providers
Trends, including the cloud, are enabling everyone to push the technology envelope

<table>
<thead>
<tr>
<th>Apps continue to move to the cloud</th>
<th>Distributed endpoints and mobile workforce</th>
<th>Growth in digital traffic and volume of data</th>
</tr>
</thead>
<tbody>
<tr>
<td>For service providers, that means the ability to quickly turn on new services</td>
<td>For service providers, that means cloud as a business enabler and transformer</td>
<td>For service providers, that means monetization of data services and extended offerings</td>
</tr>
<tr>
<td>For end customers, that means cloud as a business enabler and transformer</td>
<td>For service providers, that means more opportunities for integration and synergy</td>
<td>For end customers, that means increased ability to leverage analytics for insight</td>
</tr>
<tr>
<td>For end customers, that means the need for consistent security to match access</td>
<td>For service providers, that means monetization of data services and extended offerings</td>
<td>For end customers, that means increased ability to leverage analytics for insight</td>
</tr>
</tbody>
</table>
The same trends that empower businesses are also generating risks

<table>
<thead>
<tr>
<th>Increased attack surface</th>
<th>Unpredictable costs</th>
<th>Increased threat sophistication</th>
</tr>
</thead>
<tbody>
<tr>
<td>Complexities continue to rise</td>
<td>Regulations and Compliance priorities</td>
<td>Shortage of expertise and talent</td>
</tr>
</tbody>
</table>

Managed Security Services Market

Drivers

- Need for cost effective cloud-based managed services
- Reduce internal IT infrastructure cost and complexity
- Lower cyber security risk and meet regulatory compliance requirements

Global SME managed service market size will grow from USD 46.86 billion in 2018 to USD 76.76 billion by 2023, at a higher CAGR of 10.4%.

Source: marketsandmarkets: Managed Service Market Global Forecast to 2023
Cisco’s security portfolio makes it easier for MSSPs to create and sell managed security services.

- Integrated and comprehensive security portfolio
- Accelerated service creation and delivery
- A strong partner for service profitability
Integrated and Comprehensive Security Portfolio

Take advantage of Cisco’s security architecture and innovations to protect customers’ corporate data and brand reputation.

- Differentiate with an integrated architecture of security solutions
- Stop global threats with integrated intelligence and threat hunting
- Create cross architecture solutions
Differentiate with a comprehensive architecture of security solutions

Better together:
- Integration
- Scale
- Efficacy
Stop global threats more effectively with integrated threat intelligence

MASSIVE VOLUME

- 20 billion Threats blocked daily
- 1.5 million Daily malware samples
- 16 billion Daily web requests

UNPARALLELLED EXPERTISE

- 250+ threat intel researchers; 24 – 7 – 365
- Over 100 Threat intelligence partners

Cloud – Public, Private
Cisco Threat Response
Unleashing the power of the Cisco Integrated Security Architecture

Key pillar of our integrated security architecture

• Automates integrations across Cisco security products
• Reduces the time and effort spent on key security operations functions:
  ▪ Detection
  ▪ Investigation
  ▪ Remediation
• Included as part of Cisco Security product licenses
Cisco Threat Response in your SOC
Complements your existing investments and supports your IR team

Multiple Cisco Products and Intel/Identity Context

Cisco Threat Response
- Detect
- Investigate
- Remediate

Existing SIEM

SP GTM Lifecycle

MSLA Three-Year Term

A Utility-Based Buying Program - Shared Risk, Shared Success

- Initial three-year term
- Accommodates reuse and upgrades
- Greater licensing flexibility

- Utility pricing with monthly postpaid billing
- Shared risk with lower barrier to entry
Managed Security Services Offers
What is available on MSLA today?

**Network**
- Managed Firewall (ASAv)
- Managed Next Generation Firewall

**Endpoint**
- Managed Endpoint (AMP for Endpoints)

**Cloud**
- Managed DNS Security (Umbrella MSSP, Easy Protect, Mobile Protect)
- Managed Behavioral Analytics (Stealthwatch Cloud)
- Managed Email Security (SMP with ESAv)
Accelerated Managed Service Creation and Delivery
Create, manage, and scale security offerings easily with cloud-enabled and hybrid technology

Speed time to market with solutions that integrate into your existing infrastructure

Build a unique value proposition with service creation experts

What’s on the truck?
Managed Security Services Offers
Protection with reliable recurring revenue

- **Network**
  - Managed Next Generation Firewall
  - Managed UTM (Meraki MX)
  - Secure SD-WAN (now with Umbrella)

- **Endpoint**
  - Managed Endpoint (AMP for Endpoints)
  - Managed Email (Email Security Appliance)

- **Cloud**
  - Managed DNS Security (Umbrella MSSP, Easy Protect, Mobile Protect)
  - Managed Behavioral Analytics (Stealthwatch Cloud)
  - Managed Email Security (SMP with ESAv)

- Managed Threat Hunting | Intelligence Services (Cisco Threat Response)
What’s in the pipe?
Meraki MR + Umbrella

- Simplest way to deploy Umbrella across a wireless network
- Conveniently enable Umbrella policies directly in the Meraki dashboard
- Create granular policies on a per-SSID basis or by using Meraki group policies
Shaw – Accelerated time to value through Meraki deployment

Partner Success Story

“Without question, working with Cisco/Meraki has been critical to being able to provide innovative and disruptive managed services that are designed specifically to grow the SMB market.”
- Ron McKenzie, SVP & COO, Shaw Communications

Cisco Engagement
Leveraging the Cisco Meraki portfolio, Shaw Business Solutions developed a compelling suite of SMB-targeted managed service offerings, changing the Western Canada business services landscape for connectivity and security.

CASE STUDY

“The use of a ‘best in breed’ platform like Cisco Umbrella allows TIM, first in Europe, to offer a cloud based, extremely effective and directly embedded in the network, security service to our customers.”

Lorenzo Forina
Executive Vice President, Business & Top Customers Director
TIM

Users: 700,000

Business Driver: As its customers grew increasingly vulnerable to the threat of ransomware, data breaches, and other malicious malware attacks, Telecom Italia sought an innovative solution to effectively and efficiently protect the network and data of its business users.

Objective: Safeguard small business users from malware, phishing, and other malicious cybersecurity activities

Solution: SP Easy Protect, built on Cisco’s industry-leading Umbrella Service (branded TIM Safe Web)

Impact:

• Improved security and quality of service for approximately 700,000 TIM business customers
• Delivers a “clean pipe” to end users
• Protection active on every system connected to the customers’ LAN for the application of the security policies at DNS level
Telindus – Ten Minutes to Security Value with Stealthwatch Cloud

Test Results

“Stealthwatch Cloud was able to pinpoint the needles in the haystack: unusual IPs, traffic to strange countries, denial-of-service attacks, and password brute-force attacks were detected in a test environment.”

Benefits

“The number-one benefit to Stealthwatch Cloud is that it is independent of the hosting environment. We are not just focusing on our clouds, but also enable on-premises and public cloud environment usage. We need something that works in such hybrid environments, which is where our customers need us to be.”

Company profile

Luxembourg-based information technology integrator, cloud, and telecom service provider.
Canalys: Cisco is the largest cybersecurity vendor by revenue in a fast-growing market.

Questions?
Cisco Threat Response reduces complexity across the growing Incident Response toolset

- Marries external threat intelligence to internal log data
- Combines data from multiple Cisco and 3rd party sources
- Single location for most common IR tasks across multiple tools
- Use cases before, during, and after an attack
- Reduces investigation, triage and mitigation time
Cisco Threat Response in action
Three simple ways to get started

1. Intelligence Sources
2. Casebook via Browser Plug-In
3. High-Fidelity Events

Observables:
- File hash
- IP address
- Domain
- URL
- More...

Investigate (search interface)
