

The bridge to possible

Simplify Your Data Center Network Experience

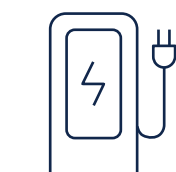

Modernize your data center networks with

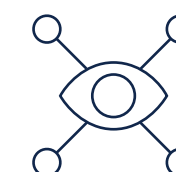

Operational simplicity

AI/ML networking and 400G/800G switching

Greater sustainability

Easy-to-consume licensing with rich visibility across all tiers

Complexity

The primary challenge in network and data center operations is complexity.*

* Cisco 2023 Global Networking Trends Report survey

AI/ML networking

20% of all data-center switch ports will be allocated to AI servers by 2027.*

* Dell'Oro Group

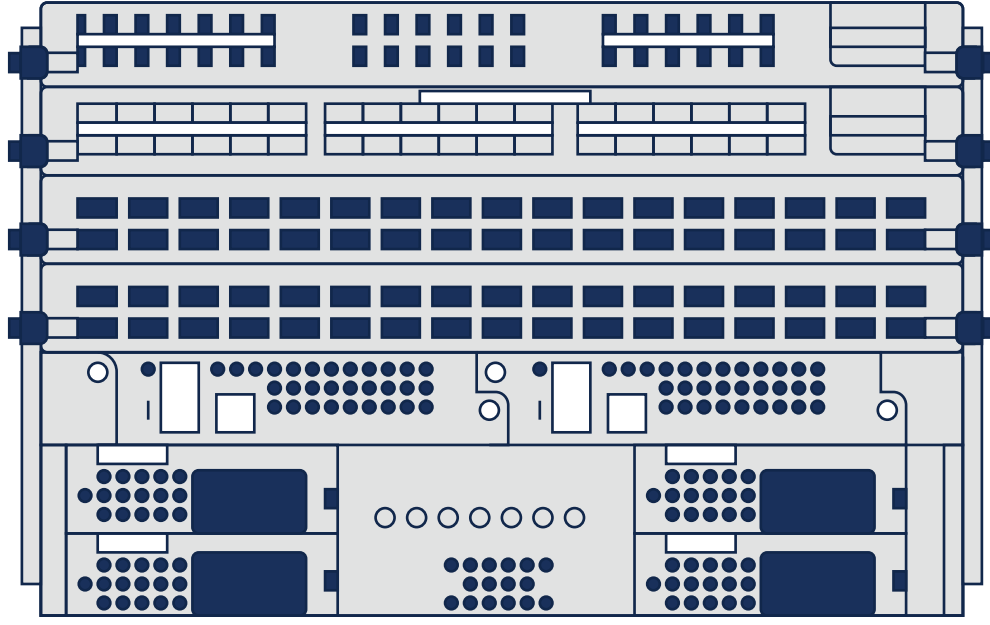

Energy consumption

More than 2% of global energy consumption comes from data centers.*

*energy.gov

Cisco Nexus Switch Series

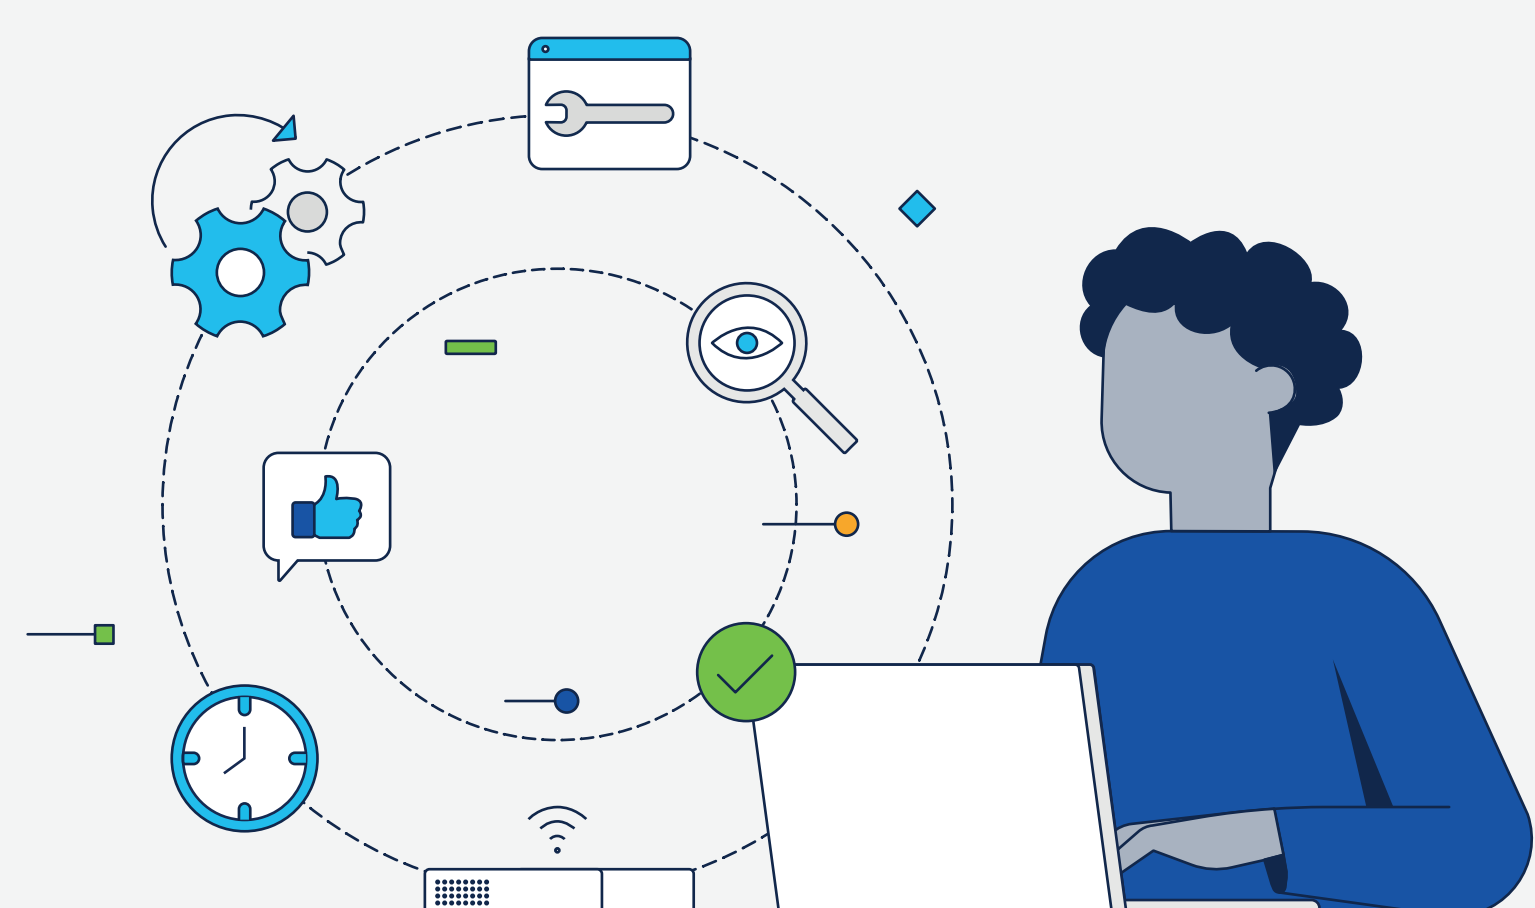

Cisco Nexus Dashboard

Cisco Data Center provides operational excellence, AI/ML networking, and greater sustainability empowering businesses to accelerate time to innovation with automation and minimal risk through advanced analytics.

Modernize your DC environment with *Cisco Nexus 9000 Series Switches* and *Cisco Nexus Dashboard* (included with every switch license purchase).

- Unify network operations
- Become AI/ML network ready
- Ensure business conformance
- Increase visibility
- Proactive troubleshooting
- Minimize risk and downtime
- Accelerate net-zero posture
- Ensure compliance
- Achieve high-performance with data-center switching hardware

350% 3-year ROI of 350% on Cisco Nexus Dashboard

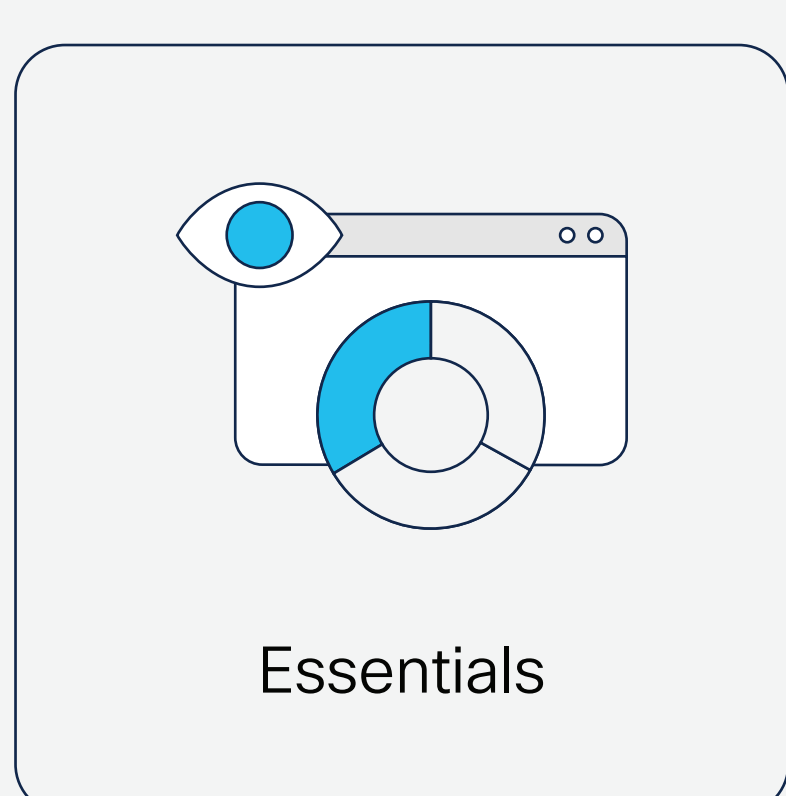

52% 52% more efficient help desk operations

26% 26% more efficient infrastructure teams

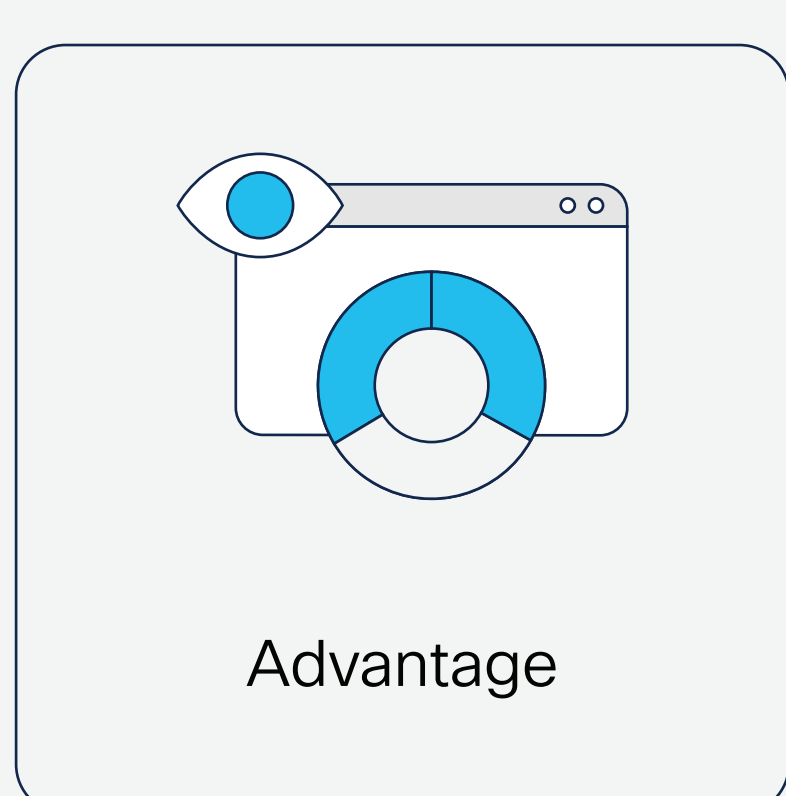

59% Cisco Nexus 9800 59% more sustainable than previous versions

50% 50% reduction in unplanned downtime

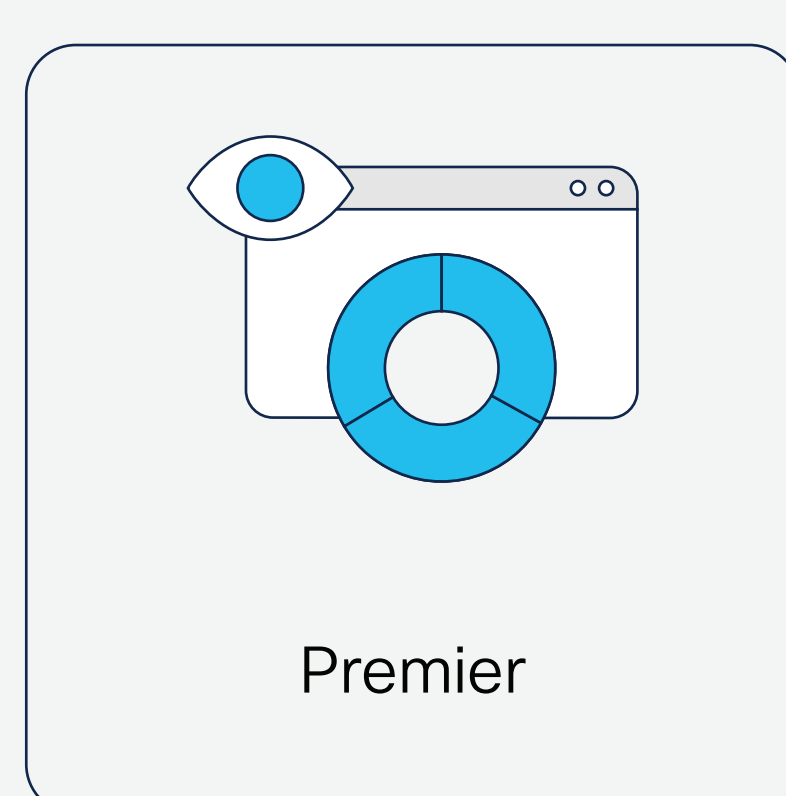

Leverage increased visibility into your data center networks with evolved licensing

Essentials

Advantage

Premier

Cisco DCN licensing tiers

Cisco offers a broad range of data center software subscription and licensing options to suit the specific needs of your data center.
