Cisco Certified DevNet Associate

Cisco Certified DevNet Specialist

8 DevNet Specialist Concentrations*

Cisco Certified DevNet Professional

DevNet Expert

*DevOps, IOT and Edge, Webex, Enterprise, Security, Service Provider, Collaboration, Data Center

Ensuring developer success with community and resources

Half a million members and growing

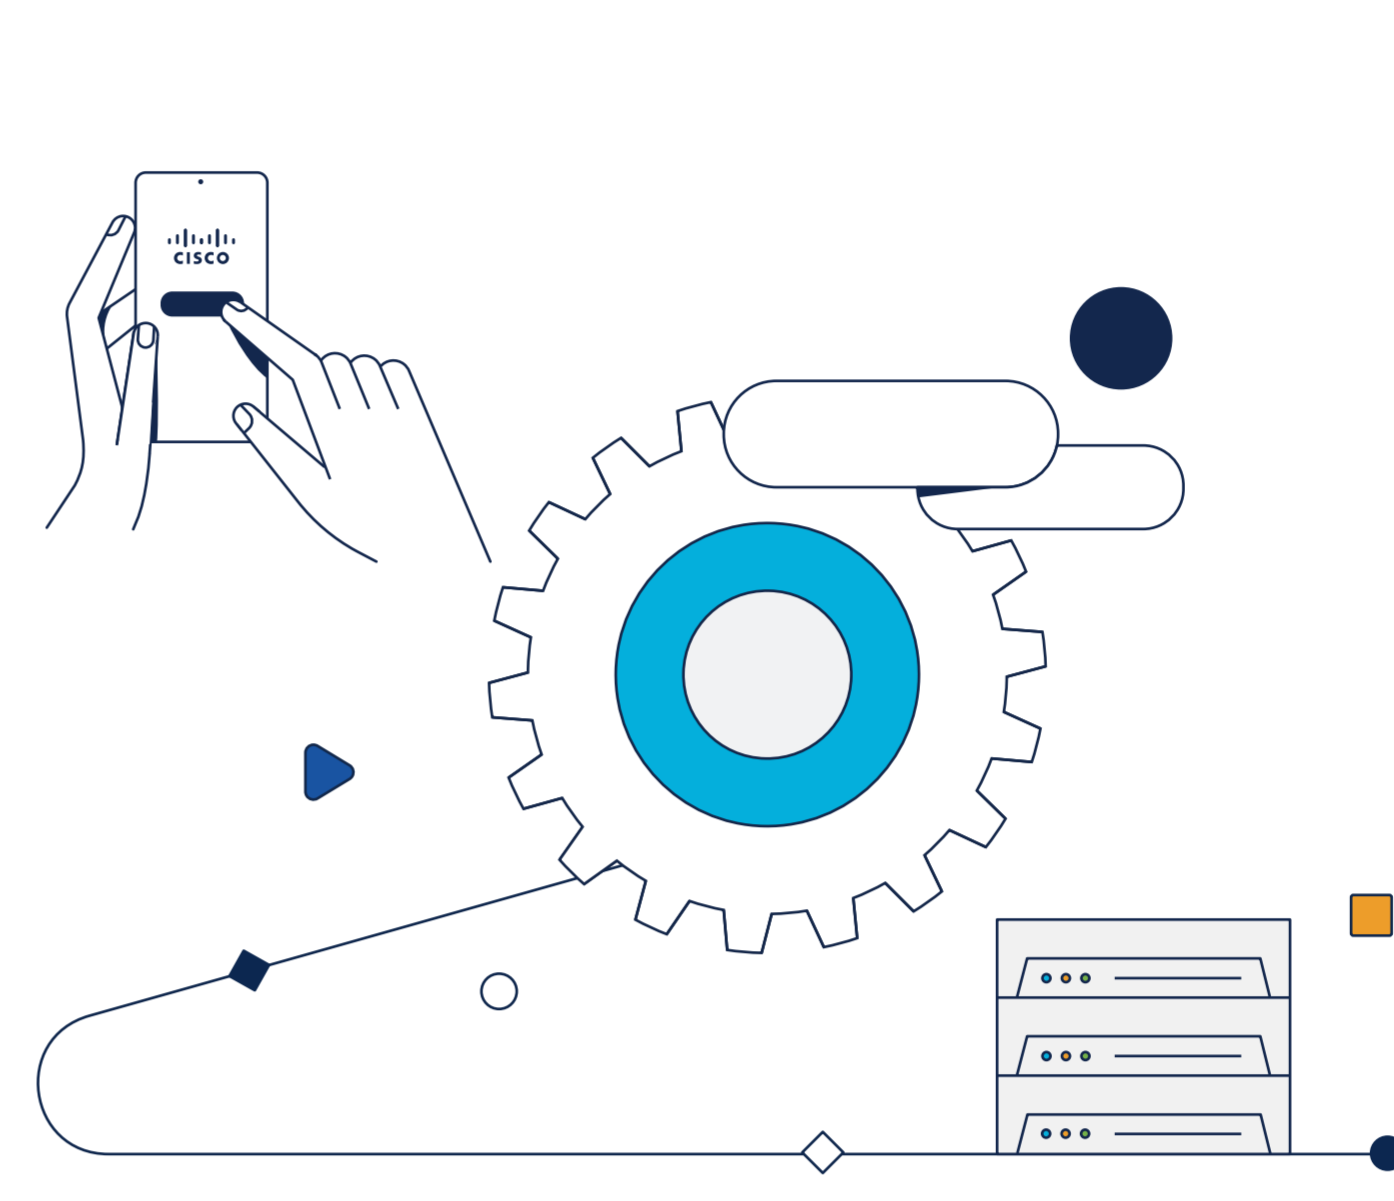

Hundreds of learning labs

Over 100,000 hours monthly of sandbox environments

12 DevNet Certifications

Cisco Cloud Networking platforms provide full-coverage automation and IaC tooling with APIs

- All Cisco Cloud networking products are API-enabled
- Developers, network engineers, and SREs can benefit from these APIs

Cisco Cloud Networking supports leading infrastructure as code tools

Cisco Network Services Orchestrator (NSO)

Ansible

Terraform

Cisco Cloud Networking-enabled infrastructure is completely programmable, fitting seamlessly into every IT organization's DevOps toolchain.

With Cisco Cloud Networking platforms you can:

Program directly with

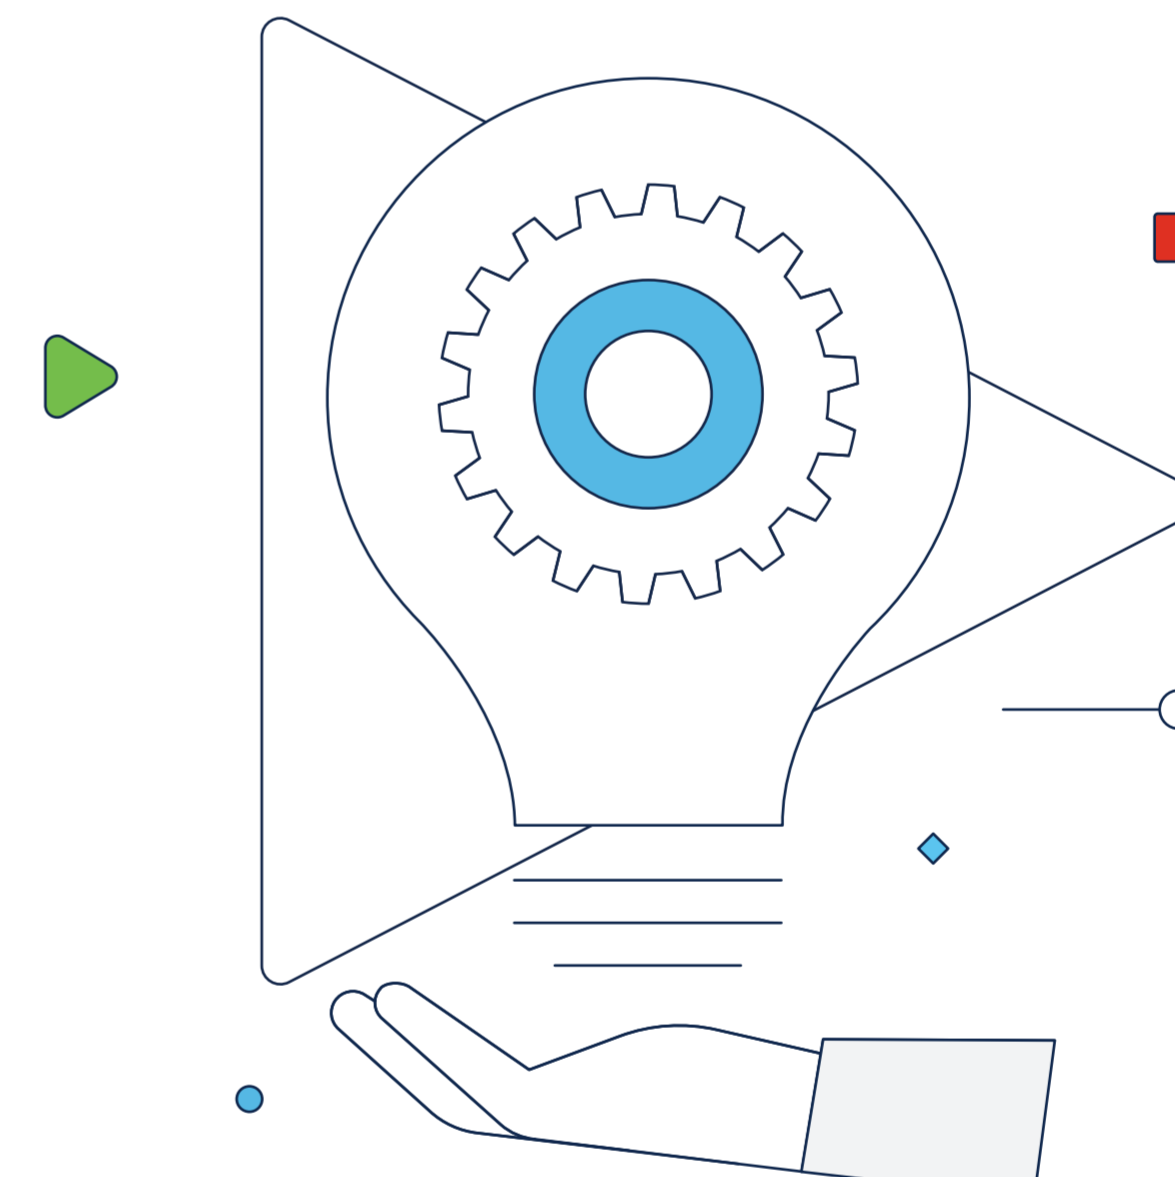

REST API (any language)

SDK (using Python or Go bindings as a language wrapper)

Infrastructure as Code (IaC) (using Terraform, Ansible for minimum-code workflow-based automation)

Power up with Cisco's APIs, expert developer capabilities, and valuable resources

- Full-coverage APIs
- Expert networking knowledge

Developer resources

Learning labs

Sandboxes

API documentation

Certifications

Code exchange

Automation exchange

Everyone benefits

Engineers

Developers

Customers

Partners

Cisco Cloud networking APIs + Developer Resources = Accelerated Network Automation

- Cisco Nexus Dashboard (ND)
- Cisco ACI
- Cisco Nexus Dashboard Orchestrator (NDO)
- Cisco Nexus Dashboard Fabric Controller (NDFC)
- Cisco Nexus Dashboard Insights (NDI)

Automate application deployment

Add capacity and capability

Learning and developing resources

Quantifiable knowledge
