Work Is Changing. Is Your Network Ready?

People want to be protected, productive, and engaged wherever they choose to work

A distributed workforce needs a network that works for it

hybrid work models

Organizations are adopting

is in full swing

The return to the office

And personal safety and wellness are top of mind

Most employees expect increased work flexibility (64%)¹

measures (87%) as they transition back to the workplace¹ 58% will work 8 or more days each month from home

Organizations' highest focus is on improving workplace safety

(Post-COVID)² Employees want intelligent workplace technology (96%)²

for a better work environment

To keep up, networks need to power

- Flexible: by adapting to users needs as they move between locations and applications
- Supportive: by enabling workspaces designed for safety and wellbeing
- their data wherever they work Managed: by using automation and Al-enabled

Secure: by enhancing the security of employees and
