

Hybrid Learning and Teaching

Cisco is committed to powering inclusive learning for all. We believe that education is not about where you learn; it's about what you learn. We are guided by the vision that all students can have equal access to education, no matter where they are.

The industry is quickly changing

Educational organizations are pivoting their services and work environments to be more flexible and resilient.

Hybrid work improves the learning experience

Cisco sits at the intersection of an unmatched virtual classroom experience and unparalleled portfolio breadth that spans collaboration, security, networking, cloud, and applications.

Hybrid work use cases

-  **Hybrid administration and work**
Boost your administrators' productivity and enable them to work from anywhere.
-  **Remote research and collaboration**
Support research innovation with seamless, secure collaboration and access to computing resources.
-  **Hybrid learning**
Expand teaching and learning, both virtually and across physical campus and classroom locations.

Build a secure learning environment

Prepare your organization for the future with a suite of flexible, supportive, and inclusive hybrid work tools. No matter where learning is delivered, have the confidence that connections are secure.

A better student experience

Hybrid work isn't just beneficial for your faculty. Intelligent self-service capabilities when and where it's most convenient improve the student experience, too.

Cisco hybrid work

Hybrid work helps organizations power an inclusive future for all.
