

Advanced Malware Protection Everywhere

A leader in the NSS Labs Breach Detection Systems Security Value Map

Today's constantly evolving malware and advanced persistent threats can evade point-in-time defenses to penetrate networks.

Security professionals must evolve their strategy in lockstep to confront these threats before, during, and after attacks. NSS Labs recently cut through the noise surrounding advanced threats and the tools that fight them in the industry's most rigorous testing to date of breach detection systems.

Advanced Malware Protection (AMP) from Cisco is the only solution that goes beyond point-in-time detection to also offer continuous analysis, retrospective security, and multisource indicators of compromise for protection before, during, and after attacks. AMP is available everywhere—including networks, endpoints, email, web, mobile devices, the cloud, and virtual systems—for integrated, best-in-class advanced threat protection. It's why we're a leader in the NSS Labs Breach Detection Systems Security Value Map (SVM) for total cost of ownership and security effectiveness, protecting against 99 percent of all attacks tested and the lowest total cost of ownership as measured by protected megabits. AMP also excelled in time to detection, meaning it caught threats faster than competing breach detection systems.

Following our success in other NSS Labs testing for the Cisco® ASA with FirePOWER™ Services next-generation intrusion prevention system (NGIPS) and next-generation firewall (NGFW), AMP proves again our commitment to deliver the best protection for your security budget.

To see exactly why we received a **Recommended** rating from NSS Labs, get your free copy of the 2014 NSS Labs Breach Detection System Product Analysis for Sourcefire (Cisco) Advanced Malware Protection. Simply visit www.sourcefire.com/NSS_BreachDetection.

About Sourcefire

Sourcefire, now part of Cisco, is a world leader in intelligent cybersecurity solutions. Together with Cisco, Sourcefire provides a broad portfolio of integrated solutions that deliver unmatched visibility and continuous advanced threat protection across the entire attack continuum—before, during, and after an attack. For more information about Sourcefire, please visit www.sourcefire.com.
