Einleitung

In diesem Artikel wird beschrieben, wie Produkte identifiziert werden, die eine bestimmte Lizenzreservierung (SLR) unterstützen.

Voraussetzungen

None.

Identifizieren von Produkten, die SLR unterstützen

Schritt 1:

Rufen Sie die [Cisco Smart Licensing](#)-Seite auf, und klicken Sie dann auf **Smart Licensing Enabled Product Family**.

Ergebnis der Schritte: Das System lädt die **Smart Licensing Feature Roadmap**-Datei automatisch auf Ihren Computer herunter.

A new way to think about software licensing

Use your Smart License with a Smart Account

A Smart Account allows you to centrally organize your licenses, devices, and specific license agreements based on your business needs.

Cisco Smart Software Manager (CSSM)

CSSM is an intuitive portal where you can activate and manage all of your Cisco licenses. An On-Prem version is available for security-sensitive customers.

Schritt 2:

Öffnen Sie die **Smart Licensing Feature Roadmap**-Datei, suchen Sie die Spalten **SLR** oder **SLR Factory Pre-Install**, und ermitteln Sie, ob das Produkt, für das Sie eine bestimmte Lizenzreservierung durchführen müssen, diese Funktion unterstützt. Stellen Sie sicher, dass Sie auch überprüfen, welche Betriebssystemversionen unterstützt werden.
