Einführung

In diesem Dokument wird beschrieben, wie die Integration der Cisco Identity Services Engine (ISE) 2.3 mit Facebook-Anmeldeinformationen für den authentifizierten Gastzugriff konfiguriert wird.

Voraussetzungen

Anforderungen

Cisco empfiehlt, über Kenntnisse in folgenden Bereichen zu verfügen:

- Identity Services Engine (ISE)-Konfiguration
- Grundlegende Konfiguration von Facebook-Anwendungen

Verwendete Komponenten

Die Informationen in diesem Dokument basieren auf den folgenden Software- und Hardwareversionen:

- Cisco ISE Version 2.3
- Facebook-Social-Login
- Cisco Wireless LAN Controller (WLC) Version 8.3.102.0

Die Informationen in diesem Dokument wurden von den Geräten in einer bestimmten Laborumgebung erstellt. Alle in diesem Dokument verwendeten Geräte haben mit einer leeren (Standard-)Konfiguration begonnen. Wenn Ihr Netzwerk in Betrieb ist, stellen Sie sicher, dass Sie die potenziellen Auswirkungen eines Befehls verstehen.

Netzwerkdiagramm

Konfiguration

Die dargestellte Facebook-App-Konfiguration ist ein Beispiel und keine von Cisco empfohlene Konfiguration.

1. Facebook-Anwendung konfigurieren

Rufen Sie https://developers.facebook.com auf, und registrieren Sie die neue App.

Das Dashboard der Anwendung zeigt die **App-ID** und den **App Secret**-Schlüssel an, die auf der ISE zum Erstellen der externen Social-Anmeldung verwendet werden.

Veröffentlichen Sie die erstellte App.

	LOGIN PERMISSIONS		

2. Integration der ISE in die Facebook-Anwendung

Verwenden Sie die unten genannten Informationen, um die Facebook-App in die Cisco ISE zu integrieren.

Navigieren Sie zu Administration > Identity Management > External Identity Sources > Social Login, und fügen Sie einen neuen Speicher hinzu.

Konfigurieren Sie das ISE-Gastportal so, dass Sie sich bei Social Media anmelden können.

Nachdem das ISE-Gastportal so konfiguriert wurde, dass eine Social-Media-Anmeldung möglich ist, wird der Social-Media-Anmeldename mit URLs versehen, die den Facebook-App-Einstellungen hinzugefügt werden müssen. Die **URLs** für die **Umleitung** von **gültigem OAuth müssen** hinzugefügt werden.

Fügen Sie **Facebook-Anmeldung** von Produkten hinzu, und fügen Sie **gültige URLs für die Umleitung hinzu**.

URLs werden automatisch auf der ISE generiert, nachdem das ISE-Portal erfolgreich mit Facebook External Social Login verknüpft wurde.
