

CiscoWorks Health and Utilization Monitor 1.1

PB478606

Cisco announces the availability of CiscoWorks Health and Utilization Monitor (HUM) 1.1 for Windows and Solaris. CiscoWorks HUM is an application that monitors the performance attributes of devices in an enterprise network. CiscoWorks HUM monitors the availability and utilization levels of devices, CPUs, memory, and interfaces.

CiscoWorks HUM 1.1 is an application add-on that extends the capabilities of CiscoWorks LAN Management Solution (LMS) 3.1. CiscoWorks HUM 1.1 installs on top of CiscoWorks LMS 3.1. Users can expect the level of consistency and the rich graphical user interface that CiscoWorks LMS already provides.

Key Features

CiscoWorks HUM 1.1 provides compelling features that network administrators can use to better understand, monitor, and analyze the utilization and availability levels of devices in the network.

The following key features are provided by CiscoWorks HUM 1.1:

- Monitors CPU, memory, interface/ports for utilization and availability levels
- Historical trending on a daily, weekly, monthly, and annual basis
- Supports integration with CiscoWorks LMS 3.1
- Offers comprehensive reporting such as the device dashboard, custom reports, Top-N/Bottom-N reports
- Threshold breach event notification, reporting, and event handler support

Product Availability

CiscoWorks Health and Utilization Monitor 1.1 will begin shipping on July 1, 2008. Customers can order these new products through normal Cisco sales channels as of June 24, 2008.

CiscoWorks HUM 1.1 is offered as an add-on product to CiscoWorks LMS 3.1. Existing CiscoWorks LMS 3.0/3.01 customers with HUM 1.0 can update their CiscoWorks HUM installations to version 1.1 simply by obtaining the new CiscoWorks LMS 3.1 minor or service release updates.

The CiscoWorks HUM 1.1 software is bundled with CiscoWorks LMS 3.1 new, upgrade, and update kit DVDs. It can be installed as part of the CiscoWorks LMS 3.1 installation, so no additional distribution media will be delivered with the CiscoWorks HUM 1.1 packaging. Only a Product Authorization Key (PAK) ID will be provided as part of the paper claim certificate and license. Customers can easily register their PAK ID online in order to have a full serial license key sent to them by email.

New or existing CiscoWorks LMS customers have the option of installing CiscoWorks HUM 1.1 with their CiscoWorks LMS 3.1 installations, but in order to use CiscoWorks HUM beyond the default 90-day trial period, a purchase of the full use CiscoWorks HUM 1.1 license package is required.

Details on CiscoWorks LMS 3.1 ordering and availability can be found at

<http://www.cisco.com/go/lms>.

Service and Support

Using the Cisco Lifecycle Services approach, Cisco and its partners provide a broad portfolio of end-to-end services and support that can help increase your network's business value and return on investment. This approach defines the minimum set of activities needed, by technology and by network complexity, to help you successfully deploy and operate Cisco technologies and optimize their performance throughout the lifecycle of your network.
