

Cisco Configuration Engine Version 3.5

The Cisco[®] Configuration Engine provides configuration management, image management, and zero- or near zero-touch deployment in a highly scalable package targeted at networks that consist of a large number of remote branch offices.

Licensing for the Cisco Configuration Engine comprises two parts:

- The server software:** This part is Cisco Configuration Engine Software and includes all the software and user documentation needed to install and use the configuration engine. You need one server CD for each server instance.
- The Device Right to Use (RTU) license:** This part is a legal document that entitles your installed Cisco Configuration Engine to manage devices. You need to purchase the number of device licenses that covers the devices to be managed by the Cisco Configuration Engine. A device is defined as a unique entity within the Cisco Configuration Engine space. A standalone router or switch running a single image is counted as one device. A Cisco Integrated Services Router (ISR) with a network-module switch module counts as two devices because the router and switch modules are separate entities within Cisco Configuration Engine.

Note: For zero-touch deployment using the Auto-Install bootstrapping option, please ensure that you order the ISR and Cisco Integrated Services Routers Generation 2 (ISR G2) routers with the option of no configuration. Please use the ISR-CCP-EXP-NOCONF or ISR-CCP-CD-NOCONF option when ordering Cisco 1900, 2900, and 3900 Series Routers, which are part of the Cisco ISR G2 portfolio; use the CCP-EXPRESS-NOCF or CCP-CD-NOCF option when ordering Cisco 800, 1800, 2800, and 3800 Series Routers.

Table 1 gives ordering information.

Table 1. Ordering Information

	How Do I Order It?	How Many Do I Buy?
Media kit	<p>You can order the Cisco Configuration Engine 3.5 server software directly using the online Cisco Ordering Tool.</p> <p>CE-3.5-KIT-K9</p>	You need one server software CD for each management server.
RTU	<p>You can order the RTU directly using the online Cisco Ordering Tool.</p> <p>CE-3.5-RTU-100</p> <p>CE-3.5-RTU-1000</p> <p>CE-3.5-RTU-10000</p>	You must purchase one RTU for every managed device. A device is defined as an entity within the Cisco Configuration Engine space.
SDK	<p>You can order the SDK directly using the online Cisco Ordering Tool.</p> <p>CE-3.5-SDK</p>	You need one SDK per development workstation.
Upgrades	<p>You can order upgrades directly using the online Cisco Ordering Tool.</p> <p>CE-3.5-KIT-U-K9</p> <p>CE-3.5-RTU-1000U</p> <p>CE-3.5-RTU-10000U</p> <p>CE-3.5-SDK-U</p>	For each Cisco Configuration Engine 2.0 you have, you need to purchase one Cisco Configuration Engine 3.5 Media Kit.

Tables 2 and 3 contain all the part numbers referred to in Table 1. Table 2 lists part numbers for Cisco Configuration Engine 3.0 and Table 3 lists part numbers for Cisco Configuration Engine 3.0 Software Application Support Services (SAS).
