

# Cisco IP DECT 6800 Series Phones

## Connecting your key workers

Some of your most important workers are constantly on the move. Without time to get to a desk, important calls could be missed. Cisco® IP DECT 6800 Series phones provide a robust enterprise calling solution that enables workers to stay connected with the range, mobility and security features you need.

Our DECT handsets provide up to 17 hours of talk time and up to 200 hours of standby time. These devices also give mobile workers features like Bluetooth, texting, and conferencing. Plus, you get peace of mind with an easy to access emergency button.

Stay connected to your organization, regardless of where you are: in the field, in the warehouse, at the nursing station, on the shop floor, or in the hotel lobby. Whether it's a quick text for information, a call for help, or even a conference call, the DECT series offers simple all-day use.

Our innovative DECT base stations provide impressive range and capacity, meaning your solution can scale as your organization grows.

## Benefits

- **Provide cost-effective mobile voice and texting** with wireless DECT handsets
- **Increase productivity** as your staff may answer and make calls from anywhere in your worksite
- **Keep staff safe and stay in contact** during an emergency with one-button to press for emergency calling
- **Reduce operations complexity** by providing your IT staff with one simple solution to manage
- **Enable staff to share information** from anywhere without the need for hand-written notes

## Designed for daily life

The Cisco IP DECT 6800 handsets have a sturdy construction and sleek design that looks great, feels great, and will withstand the rigors of your daily routine. The product is designed to provide retail, transportation, hospitality, and medical industry professionals with a simple, intuitive user experience to make mobile workers more productive and effective. The ruggedized 6825 handset also offers enhanced protection from dust and moisture.

### Scalable solution with investment protection

The single cell and multicell capabilities of the DBS-210 Multi-Cell base station let you start with a simple solution and a small coverage area to an area as big as football field by reusing the same hardware. Handsets may be mixed and matched on the same systems. For areas requiring a simple system, the cost-effective DBS-110 Single-Cell base station provides a solution that can expand its coverage area by adding RPT-110 Repeaters. The Repeaters also work with the DBS-210 base stations. The 6823 and 6825 handsets may be mixed and matched in systems using either base station model.

### Secure and reliable

The Cisco IP DECT 6800 series is a secure, closed system that doesn't get impacted by neighboring Wi-Fi access points. The call encryption, device authentication, and overall system security protects your system from hacking.
