

# Cisco TelePresence Extended Height Cart for MX200 or MX300

**Figure 1.** Cisco TelePresence Extended Height Cart for Cisco TelePresence MX200

## Product Overview

The Cisco TelePresence<sup>®</sup> Education portfolio creates an immersive, face-to-face experience - empowering you to collaborate with others like never before. By combining Cisco<sup>®</sup> Collaboration application technologies with education-specific designs, participants all feel as if they are in the same room whether they are in person or joining from a remote classroom. The Cisco TelePresence Education portfolio is designed to transform the way students learn and the way instructors present material in a collaborative, distributed environment. Schools are using these education solutions to take full advantage of scarce expertise, extend the reach of subject-matter experts, control costs, make administrative decisions faster, reduce travel costs, increase student retention, and enhance staff development. With the advent of Cisco TelePresence conferencing, many organizations have realized the advantages of maintaining a virtual learning environment with a remote site, while still being able to collaborate using high-quality presentations.

Specifically designed for an educational institution, Cisco TelePresence Extended Height Cart for the MX200 and MX300 (Extended Height Cart for MX200, Extended Height Cart for MX300) offers the ability to create a value priced, mobile TelePresence solution by incorporating the Cisco TelePresence MX200 (MX200)\* or MX300\* the unique design of this versatile system helps ensure stability while easily transporting the system throughout commercial and educational institutions. The extended height of the display is well suited for classroom environments, enabling participants seated toward the back of the room to view the display (Figure 1).

\* The codec package is not included in the price of the cart and must be specified at the time of order. Please reference the MX200 or MX300 data sheets for the latest system specifications and options:

## Features and Benefits

The Extended Height Cart for MX200 and MX300 offers the following features and benefits:

- Integrated column mounting hardware for the MX200 and MX300 helps ensure stability and differentiation with no VESA mount required.
- The product has full UL 60950-1 safety approvals.
- A gas assist-lift cylinder allows for up to 8" of vertical travel for easy height adjustment helping ensure that students in the back of a classroom can participate in the videoconference.
- Egress holes in the column simplify cable management.
- A lockable storage shelf secures the Cisco TelePresence Touch interface, microphone, and XGA cable.
- The cart has heavy-duty 4-inch premium casters with a rear locking mechanism.
- The MX200 and MX300 systems can be ordered and optioned together with the Extended Height Cart.
