Migration Path

Customers currently using VXME for SUSE Linux 9.0 and 9.2.1 are encouraged to update to the latest VXME version. Product information is available at: <http://www.cisco.com/c/en/us/products/collaboration-endpoints/virtualization-experience-media-engine/index.html>.

Cisco VXME extends the Cisco Jabber collaboration experience to virtualized environments by facilitating real-time voice and video traffic processing on the local devices.

With Cisco VXME, organizations can deliver the same uncompromised user experience of Cisco Jabber to virtual desktops on thin clients and Windows PCs.

Cisco VXME:

- Can enable Jabber to run in virtualized environments
- Offers high-definition video and wide band audio using local media processing

-
- Provides quality of service for voice and video media
 - Offers integrated Cisco Unified Communications accessories

Refer to the following links for more information about the Cisco Jabber for Windows:
