

Cisco TelePresence Content Server

PB680465—June 2011

Introduction

The currently shipping version of Cisco TelePresence® Content Server (Content Server) software is Version 5.1.

Development of new features and functions for this product continues apace. Many of the new functions make extensive use of the advanced platform features of the Generation 2 hardware platform (Figure 1).

Generation 1 Appliance

Generation 2 Appliance

Required Hardware and Software Levels

This bulletin applies to Version 5.1 and all previous versions of Content Server software.

Notification

The currently shipping version of Content Server Software Version 5.1 is the last version that will be supported by Cisco to run on the older Generation 1 hardware platform.

All future versions of Content Server software will be supported by Cisco to run **only** on the Generation 2 hardware platform.

Action Required

No immediate action is required by current users of Cisco TelePresence Content Server.

Action Recommended

Cisco recommends that customers with Generation 1 Content Server platform appliances take advantage of the [Premium Resolution Option Upgrade Bundle Promotion](#) to trade in their Generation 1 hardware appliance for the Generation 2 appliance.

This promotion makes it possible for customers to upgrade to enable premium resolution outputs and receive the Generation 2 hardware platform for roughly the price of the Premium Resolution Option itself.

For More Information

Please contact your local Cisco representative or reseller for more information about Cisco TelePresence Content Server and this promotion.
