

The bridge to possible

Cisco Day 2 Operations and Application Service Engine Promotional Offer

Cisco Assurance and Insights running on Cisco Application Service Engine platform provides the operators the confidence that the network meets their business intent, ensuring performance and uptime. Using Cisco advance data telemetry and analytics operators can reduce Mean Time To Repair (MTTR), reduce outages, and provide increased reliability for Data Center (DC) operations.

SE-VAPPL-1Y (Virtual Appliance Software Package)

How to Buy

Find a Partner

1

Benefit from significant cost savings with the promotional Cisco Day 2 Operations Apps + Multi-Site Orchestrator (MSO) license offer versus buying a-la-carte.

2

Enable seamless expansion from a single fabric to multifabric with the built-in Cisco ACI® Multi-Site Orchestrator (MSO) license.

3

Scale to any fabric size for performance and High Availability (HA) with a Unified Cisco Application Service Engine (SE) hosting platform for your Cisco Day 2 Operations Apps.
