

Technical Product Documentation Change for Cisco Transceiver Modules: From CD to Pointer Document

PB563593

In alignment with Cisco's green vision and customer feedback, the Transceiver Module Group will stop the shipment of technical product documentation in CD version along with parts ordered as spares. Instead, a pointer document with the cisco.com links to technical product documentation will be provided to customers along with the products.

Major characteristics and benefits of this shipping method change include:

- One pointer document per shipment
- Pointer document made from recycled paper
- Pointer document containing the most important cisco.com links to technical product documentation for all Cisco[®] transceiver modules (from TMG)
- All technical product documentation in electronic format and up to date

This initiative will be deployed between late October and early November 2009.

For More Information

For more information about the Cisco Transceiver Modules, visit
