PB406106

Cisco® announces Cisco IOS® Software updates for the Cisco Catalyst® 2950, 2940, and 2955 Series Switches.

This product bulletin contains content and delivery information for Cisco IOS Software Release 12.1(22)EA10.

The following new features are available with Cisco IOS Software Release 12.1(22)EA10:

- Dynamic Host Configuration Protocol (DHCP) snooping statistics:** Provides visibility into DHCP snooping for proactive management. In addition, rate-limited SYSLOG messages can be generated for notification.
- DHCP auto-install with saved configuration:** Simplifies deployment by enabling DHCP-based configuration on the switch, though a basic configuration file is present on the switch.
