

Cisco ONS 15454 MSTP Protection Switch Module

Product Overview

The optical Protection Switch Module (PSM) for the Cisco® ONS 15454 Multiservice Transport Platform (MSTP) provides protection against a fiber cut by optically splitting an optical signal over two diverse paths. The PSM (Figure 1) allows three types of protection: single-channel or channel protection (Figure 2); amplified or non-amplified Multiplex Section Protection across the composite C- or L-band (Figure 3); and amplified or non-amplified Path Section Protection across the composite C- or L-band (Figure 4).

Features and Benefits

- **Flexible protection options:** The PSM is an addition to the extensive array of protection mechanisms on the Cisco ONS 15454 MSTP, which gives customers the flexibility to choose the appropriate level of protection based on cost and their requirements for network resiliency.
- **Cost effectiveness:** PSM-based protection is one of the most cost-effective means to provide service resiliency in an optical network. The PMS gives customers an affordable entry-level solution.
- **Fast switchover performance:** The PSM completes the service switchover in less than 50 milliseconds, which helps ensure minimal disruption to data traffic.
- **Easy provisioning and management:** The PSM fully integrates with the Cisco ONS 15454 MSTP through Cisco Transport Controller.
- **Support for amplified networks:** The PSM also works with the Cisco ONS 15454 MSTP amplifiers to extend the reach of the network.

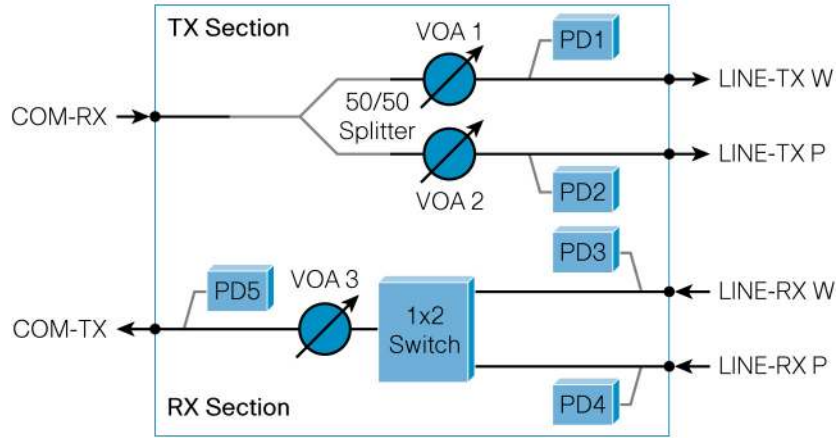

Product Specifications

Table 1. Product Specifications

Optical Specifications	Minimum	Maximum	Unit
Insertion loss (Com-RX → Line TX) <small>See Figure 5</small>	–	4.6	dB
Insertion Loss (Line RX → Com-TX) <small>See Figure 5</small>	–	2.3	dB
VOA attenuation resolution	0.1	0.1	dB
VOA attenuation range	0	15	dB
VOA attenuation settling time	–	10	ms
VOA shut-off attenuation	–	35	dB

Optical Specifications	Minimum	Maximum	Unit
Maximum optical input power	300	–	mW
Attenuation setting accuracy	–0.5	0.5	dB
Attenuation setting precision	–0.2	0.2	dB
Cross-talk	50	–	dB
Return loss	40	–	dB
Photodiode 1 & 2 <small>See Figure 5</small>	–25	17	dB
Photodiode 3 & 4 <small>See Figure 5</small>	–38	20	dB
Photodiode 5 <small>See Figure 5</small>	–40	19	dB
Power Specifications			
Typical	25W		
Maximum	32W		
Reliability Specification			
MTBF	333,292		
Operating Environment Specification			
Temperature	–5 to 55°C	23 to 131F	
Humidity	5 to 95 percent noncondensing		
Storage Environment Specification			
Temperature	–5 to 55°C	23 to 131F	
Humidity	5 to 95 percent noncondensing

System Requirements

Table 2. Product Specifications

Description	Specification	
Component	Cisco ONS 15454 ANSI	Cisco ONS 15454 ETSI
Processor	TCC2P and TCC2	TCC2P and TCC2
Cross-connect	All (not required)	All (not required)
Shelf assembly	15454-SA-HD or 15454-SA-HD-DDR shelf assembly with CC-FTA version fan-tray assembly	15454-SA-ETSI shelf assembly with SDH CC-FTA version fan-tray assembly
System software	Release 9.0 or later	Release 9.0 or later
Slot compatibility	1 to 6 and 12 to 17	1 to 6 and 12 to 17

Cisco Services

Cisco Services make networks, applications, and the people who use them work better together.

Today, the network is a strategic platform in a world that demands better integration between people, information, and ideas. The network works better when services, together with products, create solutions aligned with business needs and opportunities.

The unique Cisco Lifecycle approach to services defines the requisite activities at each phase of the network lifecycle to help ensure service excellence. With a collaborative delivery methodology that joins the forces of Cisco, our skilled network of partners, and our customers, we achieve the best results.

For More Information
