

Enhancements to Existing Cisco Unified Communications Manager Express and SRST Integrated Services Router Voice Bundles

PB455835

Cisco Unified Communications Manager Express and Cisco Survivable Remote Site Telephony (SRST) bundles for Cisco® 3800 Series Integrated Services Routers now offer more value: they now include 128-MB Compact Flash, 512-MB DRAM, and a default of Cisco IOS® Software Release 12.4(9)T.

A list of the voice bundles included with this announcement follows.

The following applies to all sales orders placed from February 8, 2008:

All Cisco Unified Communications Manager Express and Cisco Survivable Remote Site Telephony bundles for Cisco 3800 Series (Cisco 3825 and 3845) Routers are enhanced with the following changes:

- Upgrade of Cisco IOS Software image to Cisco IOS Software Release 12.4(9)T from the current 12.4(3) Mainline Release
- Upgrade of Compact Flash to 128 MB from the current 64 MB
- Upgrade of DRAM to 512 MB from the current 256 MB

Note: (Voice + Security (VSEC) versions of Cisco Unified Communications Manager Express and Cisco Survivable Remote Site Telephony bundles for Cisco 3800 Series already include 128-MB Compact Flash and 512-MB DRAM.)

All Cisco Unified Communications Manager Express and Cisco Survivable Remote Site Telephony bundles for Cisco 2800 Series (Cisco 2801, 2811, 2821, and 2851) Routers are enhanced with the following changes:

- Upgrade of Cisco IOS Software image to Cisco IOS Software Release 12.4(9)T from the current 12.4(3) Mainline Release
- Upgrade of Compact Flash to 128 MB from the current 64 MB

These configuration upgrades **do not** result in any price changes to the affected bundles, nor do they change any of the part numbers for ordering the affected bundles.

These changes provide additional value in terms of additional compact flash and DRAM to enable deployment of new Cisco Unified Communications Manager Express or Survivable Remote Site Telephony features.

Following are details of the hardware changes to the Cisco Unified Communications Manager Express and Survivable Remote Site Telephony bundles:

SKUs	Existing Bundle Hardware		Updated Bundle Hardware	
	Memory (DRAM)	Flash (CF)	Memory (DRAM)	Flash (CF)
CISCO3845-CCME/K9	256 MB	64 MB	512 MB	128 MB

Cisco IOS Software Release 12.4(9)T

Cisco IOS Software Release 12.4(9)T integrates innovations that span multiple technology areas, including Cisco IOS Infrastructure, Security, Voice, Access, High Availability, Management Instrumentation, Quality of Service, IP Multicast, Broadband, IP Routing, and IP Services. VSEC bundles now support Cisco IOS Secure Sockets Layer (SSL) VPN, VPN-SSL Advanced Integration Module, and Cisco Group Encrypted Transport (GET) VPN without requiring an image upgrade.

More information about overall feature highlights for Cisco IOS Software Release 12.4(9)T are available at:
