Cisco® 809 Industrial Integrated Services Routers, referred to here as the IR809, are compact, ruggedized routers designed for deployment in harsh industrial environments.

The IR809 is Cisco’s smallest multimode 3G and 4G LTE wireless router, making it an excellent solution for distribution automation and remote asset management across multiple industrial vertical markets (Figure 1). The IR809 has an integrated 9.6 to 60V DC power input and is designed to withstand hostile environments, including shock, vibration, dust, and humidity, and supports a wide temperature range (−40 to 60°C and type-tested at 85°C for 16 hours). The IR809 brings together:

- Enterprise-class wireline-like services, such as quality of service (QoS)
- Cisco advanced Virtual Private Network (VPN) technologies (such as Dynamic Multipoint VPN [DMVPN] and Flexible VPN [FlexVPN])
- Multiple Virtual Routing and Forwarding (VRF) instances for cellular highly secure data, voice, and video communications
- Cisco IOx, an open, extensible environment for hosting applications at the network edge

The IR809 also extends connectivity to include low-power wide-area (LPWA) access using the Cisco Interface Module for LoRaWAN.

**Figure 1.**
Cisco 809 Industrial Integrated Services Routers with 4G LTE
Product overview

The Cisco 809 Industrial Integrated Services Routers support the latest Third-Generation Partnership Project (3GPP) Release 9 Category 3 and Category 4 LTE standards. The routers provide persistent, reliable LTE connectivity transparent hand-offs between LTE and 3G networks.

The following models are available:

- **IR809G-LTE-NA-K9**: Multimode 4G, 3G, and 2G connectivity to cellular networks operating in LTE 1900 MHz (band 2 PCS), 1700/2100 MHz (band 4 AWS), 850 MHz (band 5), 700 MHz (band 17), and 1900 MHz (band 25 extended PCS) frequencies; backward-compatible with UMTS and HSPA+, at 850 MHz (band 5), 900 MHz (band 8), 1900 MHz (band 2 PCS), and 1700/2100 MHz (band 4 AWS).

- **IR809G-LTE-LA-K9**: Multimode 4G and 3G connectivity to cellular networks operating in FDD LTE 2100 MHz (band 1), 1800 MHz (band 3), 850 MHz (band 5), 2600 (band 7), 900 (band 8), 850 (band 18, band19), 1500 (band 21), 700 (band 28), and TDD LTE 2600 (band 38), 1900 (band 39), 2300 (band 40), and 2500 (band 41); backward-compatible with WCDMA 2100 MHz (band 1), 850 MHz (band 5), 800 MHz (band 6, band 19), 900 MHz (band 8), 1700 MHz (band 9), and TD-SCDMA 1900 MHz (band 39).

- **IR809G-LTE-GA-K9**: Multimode 4G, 3G, and 2G connectivity to cellular networks operating in LTE 800 MHz (band 20), 900 MHz (band 8), 1800 MHz (band 3), 2100 MHz (band 1), and 2600 MHz (band 7) frequencies; backward-compatible with UMTS and HSPA+ at 850 MHz (band 5), 900 MHz (band 8), 1900 MHz (band 2), and 2100 MHz (band 1).

The IR809 routers offer a broad range of features for industrial and enterprise Internet of Things (IoT), as listed in Figure 2.

**Table 1.** Cisco 809 Industrial Integrated Services Routers Offer a Broad Range of Features

<table>
<thead>
<tr>
<th>Feature Type</th>
<th>Feature Details</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>LTE connectivity</strong></td>
<td>LTE offers a cost-effective alternative in areas where broadband services either are not available or are very expensive.</td>
</tr>
<tr>
<td><strong>Quality of service (QoS)</strong></td>
<td>QoS enables differentiated treatment of traffic for mission-critical services and load balancing for a better user experience.</td>
</tr>
<tr>
<td><strong>Supervisory control and data acquisition (SCADA) applications</strong></td>
<td>DNP3 serial-to-DNP3/IP translation and IEC 60870 T101-to-IEC 60870 T104 protocol translation serves as a SCADA gateway and Raw Socket transport for managing remote terminal units (RTUs).</td>
</tr>
<tr>
<td><strong>Smart-grid compliant</strong></td>
<td>The routers are IEEE 1613 and IEC 61850-3 certified for distribution automation and secondary substation deployments.</td>
</tr>
<tr>
<td><strong>Industrial security</strong></td>
<td>Services include area firewall and VPN services, which require no additional hardware or client software.</td>
</tr>
<tr>
<td>Feature</td>
<td>Description</td>
</tr>
<tr>
<td>---------</td>
<td>-------------</td>
</tr>
<tr>
<td><strong>GPS.</strong></td>
<td>The routers support remote tracking asset management in a distributed network.</td>
</tr>
<tr>
<td><strong>Fog computing, management, and automation:</strong></td>
<td>Enable remote monitoring and control at the edge and improve process efficiency by moving the intelligence to the edge rather than the cloud.</td>
</tr>
<tr>
<td><strong>Network management:</strong></td>
<td>Network management tools such as Cisco IoT Operations Dashboard, Cisco IoT Field Network Director, Cisco Prime, and Cisco Application Policy Infrastructure Controller Enterprise Module (APIC-EM) simplify deployment of a secure network.</td>
</tr>
<tr>
<td><strong>Multiple packet data network (PDN) feature:</strong></td>
<td>This feature allows the router to connect to different access point names (APNs), enabling traffic segregation. For example, public Internet traffic can be kept separate from mission-critical traffic emerging from the sensors and devices connected to the router.</td>
</tr>
<tr>
<td><strong>4G LTE multiple-bearer QoS for cellular:</strong></td>
<td>The IR809 supports 4G LTE multiple bearers, enabling differentiated treatment of traffic based on the QoS policies. The QoS feature depends on a service provider’s ability to classify and enforce QoS policies and hence requires providers to launch this service in their networks.</td>
</tr>
<tr>
<td><strong>Multi-VRF:</strong></td>
<td>The IR809 supports the multi-VRF feature, which allows customers to configure and maintain more than one instance of a routing and forwarding table within the same customer edge (CE) device. For service providers, this feature enables them to support two or more VPNs, and the IP addresses can overlap several VPNs.</td>
</tr>
</tbody>
</table>

**Business benefits and application examples**

Industrial customers are looking for real-time monitoring and control of industrial assets to help increase operation efficiency.

**Utilities**

Utilities are seeking the capability to monitor thousands of miles of electrical or water infrastructure often located in harsh environments through 3G and 4G cellular networks to provide remote assets monitoring and reliable and secure SCADA traffic backhauling. Devices that enable this connectivity need to be able to be remotely monitored and configured. They also need to support traditional serial interfaces to interconnect with existing monitoring devices.

**Oil and Gas**

Oil and gas companies need to monitor pipeline infrastructure across wide geographic areas and remote locations using 3G and 4G cellular networks to collect data from remote terminal units and securely transport SCADA traffic to a network operations center (NOC).
Transportation
Highways and transportation agencies require reliable always-on communication between speed cameras, monitoring cameras, ticket terminals, etc. Wireless devices to support such continuous communication need to support 3G and 4G networks to help ensure good, wide coverage; support continuous operation in very harsh environments; be very compact for deployment in roadside cabinets; and support serial interfaces to existing traditional devices.

Primary Features and Benefits
Table 2 lists the features and benefits of the IR809.

Table 2. Features and Benefits of Cisco 809 Industrial Integrated Services Routers

<table>
<thead>
<tr>
<th>Features</th>
<th>Benefits</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>IoT Enablement</strong></td>
<td></td>
</tr>
<tr>
<td>Compact ruggedized form factor</td>
<td>Designed for hostile outdoor remote assets monitoring and machine-to-machine (M2M) communications and integrated 9.6 to 60V DC power supply.</td>
</tr>
<tr>
<td>Raw socket transport and SCADA</td>
<td>Raw Socket can be used to transport SCADA data from RTUs. This method is an alternative to the Block Serial Tunnel (BSTUN) protocol. The IR809 provides DNP3 serial-to-DNP3/IP translation and IEC 60870 T101-to-IEC 60870 T104 protocol translation to serve as a SCADA gateway to do the following: ● Receive data from RTUs (T101 or DNP3 serial) and relay configuration commands from the control center (T104 or DNP3 IP) SCADA applications. ● Receive configuration commands from the control center and relay RTU data to the control center. ● Terminate incoming T104 or DNP3 IP requests from the control center when an RTU is offline.</td>
</tr>
<tr>
<td>Cisco IOx application support</td>
<td>Provides an open, extensible environment for hosting OS and applications at the network edge.</td>
</tr>
<tr>
<td>IoT field network director</td>
<td>Available as an optional Industrial Operations Kit. This software platform manages a multiservice network and security infrastructure for IoT applications such as transportation, smart grid, services, distribution automation, and substation automation.</td>
</tr>
<tr>
<td>Cisco IoT Operations Dashboard</td>
<td>Cisco IoT Operations Dashboard is a cloud-based dashboard that enables OT staff to reduce downtime and improve safety by simply deploying, managing, monitoring and maintaining critical IoT-powered networks, assets and data using built-in IT-managed standards. By streamlining collaboration between IT and OT, this dashboard enables organizations to manage secure IoT connectivity at massive scale with existing staff.</td>
</tr>
<tr>
<td>Multiple mounting options</td>
<td>● Supports a variety of mounting options: floor mount, wall mount, and DIN rail mount.</td>
</tr>
<tr>
<td>Lightweight, compact size with low power consumption</td>
<td>● Can be deployed in many different environments where space, heat dissipation, and low power consumption are critical factors.</td>
</tr>
<tr>
<td>Increased performance to run concurrent services</td>
<td>● Performance allows customers to take advantage of broadband network speeds while running highly secure, concurrent data, voice, video, wireless, and IoT services.</td>
</tr>
<tr>
<td>Enhanced security</td>
<td>● An integrated stateful and application inspection firewall provides network perimeter security. Hardware-assisted high-speed IP Security (IPsec), Triple Data Encryption Standard (3DES), and next-generation encryption protocols such as Advanced Encryption Standard (AES) and Secure Hash Algorithm (SHA) offer data privacy over the Internet. ● Intrusion prevention enforces security policies in a larger enterprise or service provider network.</td>
</tr>
<tr>
<td>Features</td>
<td>Benefits</td>
</tr>
<tr>
<td>----------</td>
<td>----------</td>
</tr>
<tr>
<td><strong>Multiple WAN and LAN Connections</strong></td>
<td></td>
</tr>
</tbody>
</table>
| **Two Gigabit Ethernet interfaces** | - Allows multiple Ethernet device connectivity in a small office or other remote location with the capability to designate a port as the network edge.  
- Provides VLANs for Layer 3 IP subinterfaces.  
- Provides inter-VLAN routing capabilities. |
| **Two serial interfaces** | - These two asynchronous serial interfaces (one RS-232 port and one RS-232/RS485 port) can be used with Raw Socket, protocol translation, and IOx applications to provide two serial connections to local RTUs for SCADA transport and RTU management. |
| **LoRaWAN** | - Extends IR809 connectivity to include LPWA access using Cisco Interface Module for LoRaWAN. For more information, see https://www.cisco.com/c/en/us/products/routers/interface-module-lorawan. |
| **Transparent Roaming Between Wireless Networks** | |
| **Dual subscriber-identity-module (SIM) support** | - The dual SIM feature provides reliability and multihoming capabilities over LTE and HSPA networks. |
| **Cisco IOS® Mobile IP features** | - Mobile IP offers transparent roaming for mobile networks, establishing a transparent Internet connection regardless of location or movement. This feature enables mission-critical applications to stay connected even when roaming between networks.  
- Assigned IP addresses to the home network are maintained in private and public networks.  
- Both Proxy Mobile IP (PMIPv6) and Network Mobility (NEMO) are supported. |
| **Cisco IOS Mobile network features** | - This feature allows an entire subnet or mobile network to maintain connectivity to the home network while roaming. |
| **Multiple wireless WAN technologies** | - Users can use the best wireless (4G LTE, 3.7G, 3.5G, 3G, or 2G) technology or network available. IR809G-LTE-LA-K9 does not support 2G. |
| **Advanced IP Services in Standards-Based Cisco IOS Software** | |
| **Advanced security features** | - Authorization and authentication determine which individuals and devices have access to the network.  
- Firewall protection provides perimeter security when public networks are used.  
- 3DES and AES encryption provide highly secure VPNs when data is transmitted and received over public networks.  
- The next-generation protocol suites enable users to monitor potential malicious activity on the network.  
- IPsec over IPv4 & IPv6, IPsec stateful failover, VRF-aware IPsec, DMVPN, FlexVPN and PMIPv6. |
| **Routing** | - Enables advanced routing capabilities using Enhanced Interior Gateway Routing Protocol (EIGRP), Multiprotocol Border Gateway Protocol (MP-BGP), IPv4 and IPv6 on all interfaces including cellular, IPv4/IPv6 Multicast, Generic Routing Encapsulation (GRE) and multipoint GRE (MGRE), Network Address Translation (NAT), Domain Name System (DNS) proxy and spoofing, IP service-level agreement (SLA), and QoS. |
## Features

<table>
<thead>
<tr>
<th>Benefits</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>QoS features</strong></td>
</tr>
<tr>
<td>- Provides traffic precedence to delay-sensitive and mission-critical services.</td>
</tr>
<tr>
<td>- Facilitates low-latency routing of delay-sensitive industrial applications.</td>
</tr>
<tr>
<td>- Supported on all LAN and WAN interfaces including cellular.</td>
</tr>
<tr>
<td>- Provides LTE QoS with support for up to 8 concurrent bearers on each cellular WAN interface for traffic classification and prioritization.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Management and manageability</th>
</tr>
</thead>
<tbody>
<tr>
<td>- Network managers can remotely manage and monitor networks with Simple Network Management Protocol Versions 1, 2, and 3 (SNMPv1, v2, and v3); Telnet; and HTTP/HTTPS and Secure Shell Version 2 (SSHv2). They can also manage and monitor networks locally through a console port.</td>
</tr>
<tr>
<td>- Support for extensive 3G and 4G LTE-based MIBs allows centralized management of remote devices and gives network managers visibility into and control over the network configuration at the remote site.</td>
</tr>
<tr>
<td>- Network managers can reset to a predesignated golden image, as well as configure an IR809 through Cisco IOS® Software or through an external reset button.</td>
</tr>
<tr>
<td>- Network managers can upgrade 3G, 3.5G, 3.7G, and 4G LTE firmware and router configurations remotely.</td>
</tr>
<tr>
<td>- The tight integration with Cisco IOS Software enables the router to self-monitor the LTE WAN link and automatically recover from a radio link failure.</td>
</tr>
<tr>
<td>- Network management tools such as Cisco IoT Field Network Director, Cisco Prime, and APIC-EM simplify deployment of a secure network head end using the Cisco Industrial Operations Kit.</td>
</tr>
</tbody>
</table>

| ANT-4G-OMNI-OUT-N¹ | **Description:** Cisco outdoor omnidirectional antenna for 2G, 3G, and 4G LTE cellular services.  
  - UV-stable radome  
  - Mast-mounting bracket  
  - Applicable for both 2G and 3G solutions  
  - Domestic LTE 700 band and global LTE 2600 band  
  - Domestic cellular and global GSM  
  - WiMAX 2300 and 2500  
  **Electrical specifications:**  
  - Frequency ranges: 698 to 960 MHz, 1710 to 2170 MHz, and 2300 to 2700 MHz  
  - Nominal gain (dBi): 698 to 960 MHz = 1.5 dBi, and 1710 to 2700 MHz = 3.5 dBi  
  - 3 dB beam width (E plane): 698 to 960 MHz = 81 degrees, 1710 to 2170 MHz = 75 degrees, and 2300 to 2700 MHz = 100 degrees  
  - 3 dB beam width (H plane): 360 degrees, omnidirectional  
  - Polarization: Vertical and linear  
  - Normal impedance: 50 ohms  
  - VSWR: < 2.5:1 (698 to 960 MHz) and < 2.0:1 (1710 to 2690 MHz)  
  - Radiation pattern: Omnidirectional  
  **Mechanical specifications:**  
  - Mount style: Mast mount, upright position only  
  - Environment: Outdoor  
  - Connector: N-type socket  
  - Antenna length (height): 9.8 x 1 in. (24.9 x 2.45 cm)  
  - Weight: 1.5 lb (0.68 kg)  
  - Dimensions (H x Outside dimensions): 9.8 x 1 in. (248 x 24.5 mm)  
  - Operating temperature range: -22 to 158°F (-30 to 70°C)  
  - Storage temperature: -40 to 185°F (-40 to 85°C)  
  - Maximum power: 20W  
  - Radome: polycarbonate, UV, white  
  - Material substance compliance: ROHS compliant  |
| ANT-4G-PNL-OUT-N¹ | **Description:** Cisco multiband panel outdoor 4G LTE antenna.  
  - Supports 3G and 4G LTE solutions  
  - Supports bands  
  - Wall mount and mast mount  
  - Indoor and outdoor  
  - Dual type-N socket connector  
  **Electrical specifications:**  
  - Frequency ranges: 698 to 960 MHz and 1710 to 2700 MHz  
  - VSWR: 2.0:1 maximum  
  - Gain: 8.0 to 10.0 dBi (698 to 960 MHz) and 6.0 to 9.5 dBi (1710 to 2700 MHz)  
  - 3 dB beam width (vertical plane): 55 to 70 degrees = 698 to 960 MHz, 53 to 98 degrees = 1710 to 2200 MHz, 60 to 70 degrees = 2200 to 2500 MHz, and 55 to 70 degrees = 2500 to 2700 MHz  
  - 3 dB beam width (horizontal plane): 55 to 70 degrees = 698 to 960 MHz and 50 to 90 degrees = 1710 to 2200 MHz  
  - F/B ratio: > 15 dB, typical 20 dB = 698 to 960 MHz; and > 17 dB, typical 23 dB = 1700 to

**ANT-4G-DP-IN-TNC**

**Description:** Cisco indoor swivel-mount dipole antenna
- Low-profile blade style sheath
- Applicable for both 3G and 4G solutions
- Domestic LTE 700 and global LTE 2600 bands
- Domestic cellular and global GSM
- Conformance to RoHS
- Complete cellular and 3G and 4G data communications in a single antenna

**Electrical specifications**
- Operating frequency ranges: 698 to 806 MHz, 824 to 894 MHz, 880 to 960 MHz, 1710 to 1880 MHz, 1850 to 1990 MHz, 1920 to 2170 MHz, 2100 to 2500 MHz, and 2500 to 2690 MHz
- Peak gain: 0.5 dBi (698 to 960 MHz) and 2.2 dBi (1710 to 2700 MHz)
- Average efficiency: 55% (698 to 960 MHz) and 73% (1710 to 2700 MHz)
- Maximum input power: 3W
- VSWR: < 2.5:1
- Characteristic impedance: 50 ohms
- Polarization: Linear

**Mechanical specifications**
- Type: Dipole
- Antenna dimensions (L x W x D): 229 x 30.5 x 15 mm
- Mount style: Direct mount
- Environment: Indoor
- RF connector: TNC (m)
- Antenna weight: 49g
- Temperature rating: -31 to 158°F (-35 to 70°C)
- Material substance compliance: RoHS compliant

^1 -N antenna works with -N cables and -N lighting arrestor.

### Cisco and Partner Services for the enterprise networks architecture

Enable Cisco Enterprise Networks Architecture and the business solutions that run on it with intelligent, personalized services from Cisco and our partners. Backed by deep networking expertise and a broad ecosystem of partners, these services can help you plan, build, and run a network that enables you to expand geographically, adopt new business models, and promote business innovation. Whether you are seeking to transition to a Cisco ONE™ enterprise networks architecture, solve specific business problems, or improve operation efficiency, we have a service that can help you get the most from your IT environment. For more information, visit [https://www.cisco.com/go/services](https://www.cisco.com/go/services).

### Warranty Coverage and Technical Service Options

The IR809 comes with the Cisco 5-year limited hardware warranty. Adding a contract for a technical service offering, such as Cisco SMARTnet™ Service, provides benefits not available with the warranty, including access to OS updates, Cisco.com online resources, and Cisco Technical Assistance Center (TAC) support services. Table 8 shows the available technical services.

For information about Cisco warranties, visit [https://www.cisco.com/go/warranty](https://www.cisco.com/go/warranty).

Table 9. Cisco Technical Services for the Cisco 809 Industrial Integrated Services Routers

<table>
<thead>
<tr>
<th>Technical Services</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Cisco SMARTnet Service</strong></td>
</tr>
<tr>
<td>• Global access to the Cisco TAC 24 hours a day</td>
</tr>
<tr>
<td>• Unrestricted access to the extensive Cisco.com resources, communities, and tools</td>
</tr>
<tr>
<td>• Next-business-day (NBD), 8 x 5 x 4, 24 x 7 x 4, and 24 x 7 x 2 advance hardware replacement and onsite parts replacement and installation available1</td>
</tr>
<tr>
<td>• Ongoing operating system software updates within the licensed feature set2</td>
</tr>
<tr>
<td>• Proactive diagnostics and real-time alerts on Cisco Smart Call Home-enabled devices</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Cisco Smart Foundation Service</th>
</tr>
</thead>
<tbody>
<tr>
<td>• NBD advance hardware replacement as available</td>
</tr>
<tr>
<td>• Business-hours access to small and medium-sized business (SMB) Cisco TAC (access levels vary by region)</td>
</tr>
<tr>
<td>• Access to Cisco.com SMB knowledge base</td>
</tr>
<tr>
<td>• Online technical resources through the Cisco Smart Foundation portal</td>
</tr>
<tr>
<td>• OS software bug fixes and patches</td>
</tr>
</tbody>
</table>

1 Advance hardware replacement is available in various service-level combinations. For example, 8 x 5 x NBD indicates that shipment is initiated during the standard 8-hour business day, 5 days a week (the generally accepted business days within the relevant region), with NBD delivery. Where NBD is not available, same-day shipment is provided. Restrictions apply; review the appropriate service descriptions for details.

2 Cisco OS updates include maintenance releases, minor updates, and major updates in the licensed feature set.

Cisco environmental sustainability

Information about Cisco’s environmental sustainability policies and initiatives for our products, solutions, operations, and extended operations or supply chain is provided in the “Environment Sustainability” section of Cisco’s Corporate Social Responsibility (CSR) Report.

Reference links to information about key environmental sustainability topics (mentioned in the “Environment Sustainability” section of the CSR Report) are provided in the following table:

<table>
<thead>
<tr>
<th>Sustainability topic</th>
<th>Reference</th>
</tr>
</thead>
<tbody>
<tr>
<td>Information on product material content laws and regulations</td>
<td>[Materials]</td>
</tr>
<tr>
<td>Information on electronic waste laws and regulations, including products, batteries, and packaging</td>
<td>[WEEE compliance]</td>
</tr>
</tbody>
</table>
