Cisco Wide Area Virtualization Engine

Product Overview

The Cisco® Wide Area Application Virtualization Engine (WAVE) product line consists of cost-effective, cloud-ready, video-enabled solutions for the branch office and the data center (Figure 1). With the industry's broadest product portfolio and flexible deployment models, Cisco Wide Area Application Services (WAAS) cost-effectively addresses the WAN optimization needs of small, medium-sized, and large customers.

Cisco WAVE Appliances for Branch-Office and Core Deployments

In Cisco WAAS Software Release 5.2 and later, the Cisco WAVE 294, 594, and 8541 can optionally be equipped with solid-state drives (SSDs). SSDs provide more reliable storage than existing hard disk drives (HDDs). Table 1 lists the supported SSD sizes for these platforms.

</table>

For more information, refer to the hardware specifications in Table 3 later in this document.

Benefits include the following:

- Improve employee productivity by enhancing the user experience for important business applications delivered over the WAN.
- Reduce the cost of branch-office operations by centralizing IT resources in the data center and lowering the cost of WAN bandwidth and by hosting Microsoft Windows applications on the Cisco WAVE branch-office appliance.
- Deliver enterprise-class video while reducing WAN bandwidth consumption with the Cisco WAAS video application optimizer or hosted Cisco Application and Content Networking System (ACNS) virtual blade.
- Increase IT agility by reducing the time and resources needed to deliver new IT services to the branch office.
- Simplify branch-office data protection for regulatory compliance purposes.

**Cisco WAVE Appliances for the Data Center**

Cisco WAVE data center appliances provide the high performance and scalable WAN optimization that data center solutions require. Benefits include:

- User-selectable I/O modules with support for 10 Gigabit Ethernet fiber, 1 Gigabit Ethernet copper, and 1 Gigabit Ethernet fiber
- Flexible deployment models including inline and Web Cache Communication Protocol (WCCP) for high performance, scalability, and network availability
- High performance for video, virtual desktop infrastructure (VDI), and cloud applications as well as traditional enterprise applications; using context-aware data redundancy elimination (DRE), Cisco WAVE appliances can adapt caching behavior on the basis of the characteristics of individual applications, resulting in higher throughput and lower application latency

**Main Features**

Table 2 summarizes the main features of the Cisco WAVE appliances, and Table 3 summarizes the main features of I/O options modules.

**Table 2. Cisco WAVE Appliances**

<table>
<thead>
<tr>
<th>Platform</th>
<th>Deployment Scenarios and Features</th>

</table>
| Cisco WAVE 294 Wide Area Virtualization Engine (WAVE-294-K9 or WAVE-294-SSD-K9) | ● Excellent for edge deployments at small branch and remote offices  
 ● Supports up to 200 TCP connections (upgradable to 400)  
 ● Offers 250-GB HDD and 200-GB SSD (SSD) data storage options  
 ● Has 2 onboard Gigabit Ethernet ports  
 ● Provides 4-port inline I/O module (IOM) bundled by default, with optional upgrade to 8-port inline IOM  
 ● Hosts up to 2 virtual blades |
| Cisco WAVE 594 Wide Area Virtualization Engine (WAVE-594-K9) | ● Excellent for edge deployments at small and medium-sized branch offices  
 ● Supports up to 750 TCP connections (upgradable to 1300)  
 ● Offers 500-GB HDD and 400-GB SSD data storage options (with optional second HDD or SSD for RAID 1 redundancy)  
 ● Has 2 onboard Gigabit Ethernet ports  
 ● Provides 4-port Gigabit Ethernet copper inline, 8-port Gigabit Ethernet copper inline, or 4-port Gigabit Ethernet SX fiber  
 ● Offers optional second power supply for 1 + 1 redundancy  
 ● Hosts up to 4 virtual blades |
| Cisco WAVE 694 Wide Area Virtualization Engine (WAVE-694-K9) | ● Excellent for edge deployments at large enterprise branch offices  
 ● Excellent for core deployments at small data centers  
 ● Supports up to 2500 TCP connections (upgradable to 6000)  
 ● Offers 600-GB HDD data storage with RAID 1 redundancy  
 ● Has 2 onboard Gigabit Ethernet ports  
 ● Offers optional 4-port Gigabit Ethernet copper inline, 8-port Gigabit Ethernet copper inline, or 4-port Gigabit Ethernet SX fiber inline  
 ● Offers optional second power supply for 1 + 1 redundancy  
 ● Hosts up to 6 virtual blades |
Platform | Deployment Scenarios and Features
--- | ---
Cisco WAVE 7541 Wide Area Virtualization Engine (WAVE-7541-K9) | - Excellent for core deployments at medium-sized data centers and large enterprise branch offices
- Supports up to 18,000 TCP connections
- Offers 2.2-TB HDD data storage with RAID 5 redundancy
- Has 2 onboard Gigabit Ethernet ports
- Offers optional 8-port Gigabit Ethernet copper inline, 4-port Gigabit Ethernet SX fiber inline, or 2-port 10 Gigabit Ethernet Enhanced Small Form-Factor Pluggable (SFP+)

Cisco WAVE 7571 Wide Area Virtualization Engine (WAVE-7571-K9) | - Excellent for core deployments at large data centers
- Supports 60,000 TCP connections
- Offers 3.2-TB HDD data storage with RAID 5 redundancy
- Has 2 onboard Gigabit Ethernet ports
- Offers Optional 8-port Gigabit Ethernet copper inline, 4-port Gigabit Ethernet SX fiber inline, or 2-port 10 Gigabit Ethernet SFP+

Cisco WAVE 8541 Wide Area Virtualization Engine (WAVE-8541-K9) | - Excellent for core deployments at large data centers and for service providers and cloud providers
- Supports 150,000 TCP connections
- Offers 4.2-TB HDD or SSD data storage with RAID 5 redundancy
- Has 2 onboard Gigabit Ethernet ports
- Offers optional 8-port Gigabit Ethernet copper inline, 4-port Gigabit Ethernet SX fiber inline, or 2-port 10 Gigabit Ethernet SFP+

Table 3. I/O Modules for Cisco WAVE Appliances

<table>
<thead>
<tr>
<th>I/O Module</th>
<th>Features</th>
</tr>
</thead>
</table>
| 4-port Gigabit Ethernet copper module (WAVE-INLN-GE-4T) | - Fail-to-wire capability
- Support for inline and WCCP deployments |
| 8-port Gigabit Ethernet copper module (WAVE-INLN-GE-8T) | - Fail-to-wire capability
- Support for inline and WCCP deployments |
| 4-port Gigabit Ethernet fiber module (WAVE-INLN-GE-4SX) | - Fail-to-wire capability
- Support for inline and WCCP deployments |
| 2-port 10 Gigabit Ethernet module WAVE-10GE-2SFP | - Support for Cisco SFP+ short reach (SR) transceivers
- Support for WCCP interception only |
Table 4 lists the hardware specifications for the Cisco WAVE appliances.

| Maximum weight             | 16.40 lb (7.44 kg) | 22.51 lb (10.21 kg) | 47.66 lb (21.62 kg) | 47.66 lb (21.62 kg) |
| Shipping dimensions (with packaging) | 21.69 x 19.88 x 7.75 in. (55 x 50.5 x 19.7 cm) | 26.50 x 21.69 x 7.75 in. (67.3 x 55 x 19.7 cm) | 30.75 x 21.69 x 10.19 in. (78 x 55 x 25.9 cm) | 30.75 x 21.69 x 10.19 in. (78 x 55 x 25.9 cm) |
| Shipping weight            | 22.0 lb (10.0 kg) | 28.50 lb (12.93 kg) | 53.0 lb (24.0 kg) | 53.0 lb (24.0 kg) |

Operating Specifications

- Universal input: ● Range line voltage: 90 to 132 VAC  
● 180 to 264 VAC
### Operating temperature
- **Cisco WAVE 294**: 32 to 104°F (0 to 40°C)
- **Cisco WAVE 594 and 694**: 32 to 104°F (0 to 40°C)
- **Cisco WAVE 7541 and 7571**: 32 to 104°F (0 to 40°C)
- **Cisco 8541**: 32 to 104°F (0 to 40°C)

### Nonoperating temperature
- **Cisco WAVE 294**: (-22 to 140°F (-30 to 60°C))
- **Cisco WAVE 594 and 694**: (-22 to 140°F (-30 to 60°C))
- **Cisco WAVE 7541 and 7571**: (-22 to 140°F (-30 to 60°C))
- **Cisco 8541**: (-22 to 140°F (-30 to 60°C))

### Humidity
- **Operating**: 10 to 90% RH (noncondensing)
- **Nonoperating**: 5 to 95% RH (noncondensing)

### Altitude
- **Operating**: 10,000 ft (3050m)
- **Nonoperating**: 15,000 ft (4572m)

### Regulatory Compliance

<table>

<tbody>
<tr>
<td>EMC</td>
<td>47 CFR Part 15 Class A, AS/NZS CISPR22 Class A, CISPR22 Class A, EN 55022 Class A, ICES 003 Class A, VCCI Class A, EN 55024, EN 61000-3-2, EN 61000-3-3, CISPR24, GB9254-2008, KN22 Class A, and KN24 (all platforms)</td>
</tr>
</tbody>
</table>

### Notes:
1. Existing systems cannot be upgraded to use SSDs. When ordering, SSDs can optionally be added to Cisco WAVE 294, 594, and 8541 when ordering with initial system only. Cisco WAAS Software Release 5.2 or later is required for SSDs.
2. All temperature ratings shown are for sea level to 3281 feet (1000 meters). If operating location is above 3281 feet (1000 meters), deduct 5.4°F (3°C) from the maximum operating temperature for each additional 3281 feet (1000 meters).

### Services and Support
Cisco offers a wide range of services to accelerate customer success, delivered through a unique combination of people, processes, tools, and partners, resulting in high levels of customer satisfaction. Cisco Services helps you protect your network investment, optimize network operations, and prepare your network for new applications to extend network intelligence and the power of your business. For more information about Cisco Services, visit [Cisco Technical Support Services](http://www.cisco.com/go/technicalsupport) or [Cisco Advanced Services](http://www.cisco.com/go/advancedservices).

### For More Information
For more information about Cisco WAAS, visit [http://www.cisco.com/go/waas](http://www.cisco.com/go/waas) or contact your local Cisco account representative.
