

Cisco Breach Protection Suite

More accurate decision making for threat response at AI speed.

Combat increasing security complexity and reduce breach risk with integrated protection.

Security teams face sophisticated adversaries who exploit the lack of integration across the security stack. Cisco Breach Protection Suite provides a unified approach that empowers your teams to accelerate detection and response, stopping attackers quickly with more accurate, AI-driven decisions and faster response times, before the damage is done.

Take the attack to the attackers

In the hybrid multi-vector, multi-vendor reality, a comprehensive and robust detection and response solution is essential. Cisco Breach Protection Suite, designed by security practitioners for security practitioners, unifies threat detection, investigation, mitigation, and hunting solutions by integrating the Cisco security portfolio and select third-party tools across endpoint, email, network, identity, firewall, and cloud.

Bolstered by actionable threat intelligence and AI-driven enrichment, your team can now detect, prioritize, and mitigate threats across your entire environment with speed, efficiency, and confidence.

What it delivers

- **Better efficacy:**
Stop threats like ransomware with high fidelity telemetry and agentic AI that provide clear verdicts and decisive action.
- **Better economics:**
Elevate analysts skills with response guidance and automation, and consolidate defenses for simplified management.
- **Better experiences:**
Reduce time to investigate and recover with clear prioritization, streamlined investigations, and unified capabilities that simplify user experience.

Tiers to match your business needs

Breach Protection Essentials

- Cisco XDR Essentials
- Secure Email Threat Defense
- Secure Endpoint Advantage
- Software Support Enhanced

Breach Protection Advantage

Everything in *Essentials*, plus:

- Cisco XDR Advantage
- Secure Endpoint Premier
- Secure Network Analytics
+ Telemetry Broker

Breach Protection Premier*

Everything in *Advantage*, plus:

- Cisco XDR Premier (Managed XDR)
- Cisco Talos Incident Response
- Cisco Technical Security Assessments

Why Cisco? Why suites?

- **Unified, Intelligent Protection:**
Our cloud-based platform leverages AI, cross-domain telemetry *including native network visibility*, and the power of Cisco Talos for intelligent, integrated protection across your environment.
- **Simplified Security Operations:**
Our solutions are designed to reduce the burden on your SecOps team and simplify operations while providing world-class protection.
- **Strategic Value & Comprehensive Coverage:**
Cisco Security Suites bring together the right tools for comprehensive protection and vendor consolidation, delivering exceptional value for your evolving security needs.

Why managed services?

For organizations facing security talent gaps or needing 24/7 coverage, Breach Protection Premier delivers turnkey SOC operations with managed XDR (MXDR) services delivered by an elite team of security experts.

Whether you are looking for round-the-clock support or to extend your team's capabilities, Cisco can help you operate with confidence, future-proof your security, and realize faster time to value without a significant investment.

Defend against sophisticated threats with Cisco Breach Protection Suite.
