Introduction

This ordering guide is designed to help Cisco sales teams, partners, and distributors order Mesh Policy Engine. This guide will help you:

- Understand various offers
- Understand specific ordering SKUs for your customers' needs
- Make sure that the right quantities are selected to reduce the risk of order rejection
- Provide information about the end-to-end quote-to-fulfillment process in Cisco Commerce

This guide is intended for Cisco sales teams, partners, and distributors qualified to sell Mesh Policy Engine on the Cisco Global Price List.

Product overview

Mesh Policy Engine refers to the intent-based policy automation feature that is made available through Cisco Security Cloud Control. Mesh Policy Engine simplifies day-to-day operations and enables organizations to deploy Cisco Secure Firewall into their existing environment without adding operational overhead. Mesh Policy Engine eliminates the complexity of policy placement and creation by translating the intent-based request from the application owner/user (after approval) into the outcome-based policy rules that need to be placed on the relevant firewall devices, then orchestrating the placement of that policy onto both Cisco and non-Cisco firewall devices.

Scope

This guide addresses the ordering experience for Mesh Policy Engine.

Product licensing overview

Mesh Policy Engine requires licensing only for non-Cisco (third party) devices. Supported Cisco devices (first party) are entitled to Mesh Policy Engine at no cost.

License Type	Description	Subscription PID	Product PID	Notes
Mesh Policy Engine for 3 rd Party Firewalls	Per device license for using Mesh Policy Engine with 3 rd party firewall devices.	MPE-SEC-SUB	MPE-3P	Required only for 3rd party firewalls.

Service and support licensing

A purchase of the Mesh Policy Engine third-party license requires Cisco Support Enhanced, with the option to upgrade to Cisco Support Signature. Customers are entitled to technical support for the term of their subscription.

Support Level	Description
Cisco Support Enhanced	<ul style="list-style-type: none"> Technical Support (24x7 access to Cisco Cloud Security Support – phone/online) Software updates Primary point of contact with software expertise Technical onboarding and adoption assistance
Cisco Support Signature	<p>Includes enhanced features plus:</p> <ul style="list-style-type: none"> Prioritized case handling over Enhanced support Assigned expert who provides incident management and proactive consultation and recommendations to ensure successful security software deployment and ongoing management and optimization Support case analytics

Quoting guidelines

Mesh Policy Engine requires a per-device license for third-party (non-Cisco) device entitlement. The licenses are offered as a subscription of 1, 3, or 5 years.

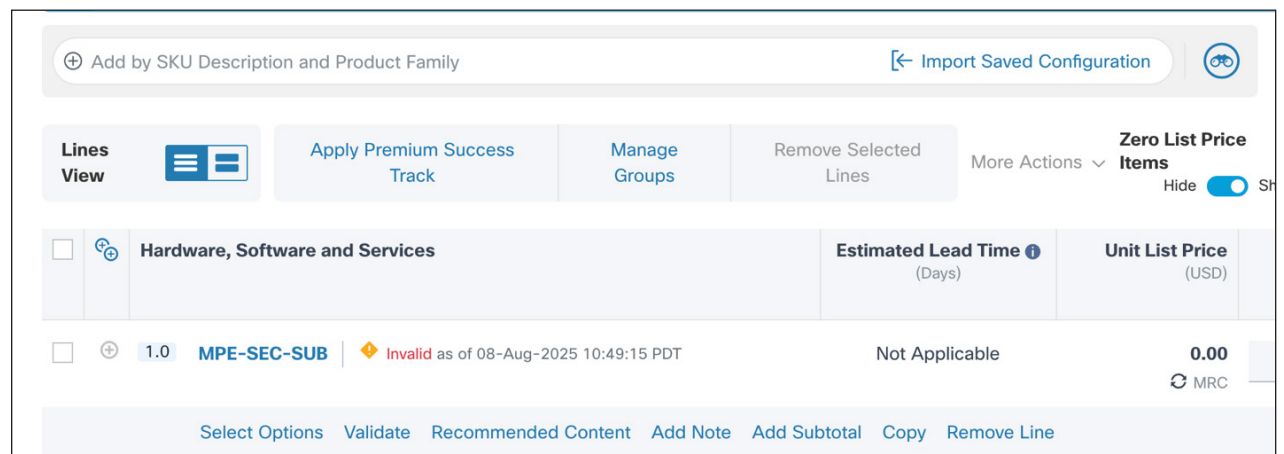

Per-Device Licensing: Device licenses are based on the quantity of third-party (non-Cisco) devices. For instance, if you want to push policy to 5 supported Cisco firewalls and 10 supported non-Cisco firewalls, you are only required to purchase 10 Mesh Policy Engine licenses, accounting for the non-Cisco firewalls.

Purchasing Mesh Policy Engine Third-Party Device Licenses

Step 1: Selecting the Subscription SKU

There is one subscription SKU for Mesh Policy Engine (MPE-SEC-SUB). There is no price for the subscription SKU. Product quantities will be entered when the product SKUs are added to the subscription.

- a. Search **MPE-SEC-SUB** and add it.

The screenshot shows a table with the following data:

	Hardware, Software and Services	Estimated Lead Time (Days)	Unit List Price (USD)
<input type="checkbox"/>	1.0 MPE-SEC-SUB Invalid as of 08-Aug-2025 10:49:15 PDT	Not Applicable	0.00 MRC

Buttons at the bottom of the table: Select Options, Validate, Recommended Content, Add Note, Add Subtotal, Copy, Remove Line.

b. Click **Select Options** to add product SKUs to the subscription.

The screenshot shows a web interface for adding product SKUs. At the top, there is a search bar with the text "Add by SKU Description and Product Family" and a button "Import Saved Configuration". Below the search bar, there are several action buttons: "Lines View", "Apply Premium Success Track", "Manage Groups", "Remove Selected Lines", and "More Actions". On the right side, there is a "Zero List Price Items" section with a "Hide" toggle switch. The main part of the interface is a table with the following columns: "Hardware, Software and Services", "Estimated Lead Time (Days)", and "Unit List Price (USD)". The table contains one row with the following data: "1.0 MPE-SEC-SUB", "Invalid as of 08-Aug-2025 10:49:15 PDT", "Not Applicable", and "0.00 MRC". At the bottom of the table, there is a row of buttons: "Select Options", "Validate", "Recommended Content", "Add Note", "Add Subtotal", "Copy", and "Remove Line". The "Select Options" button is circled in red.

Step 2: Adding Product SKUs

The next step is to add the product to the subscription (Mesh Policy Engine only has one). Here you will add the product SKU and quantity of third-party devices you want in Mesh Policy Engine.

Mesh Policy Engine for Third Party Firewalls SKU (MPE-3P)

This represents the per-third-party-device SKU for Mesh Policy Engine. This is where you enter the number of non-Cisco devices you want to bring into Mesh Policy Engine.

Step 4: Modify Term Details

Click **Terms** Tab at the top right to view the details of the Terms. By default, it is 36 months. To adjust this, click the **Edit** button and make changes required to the subscription and renewal under **New Terms and Billing** and click **Save Changes** button.

The screenshot displays the Cisco ordering interface for a Mesh Policy Engine Subscription. The top navigation bar includes the Cisco logo, the product name 'Mesh Policy Engine Subscription', and a price of USD 117,000.00. Below the navigation bar, there are tabs for 'Subscription' (USD 27,000.00) and 'Service' (USD 90,000.00). The main content area is divided into two sections: a table of products and a 'Terms and Billing' section. The 'Terms and Billing' section is highlighted with a red circle, and an 'Edit' button is also highlighted with a red circle.

Terms and Billing Messages

Suggested Actions (1)

Cisco will apply a standard lead time to your requested start date based on the selected product. Cisco may not be able to honor the requested start date (RSD). In some cases, our systems may require additional lead-time to provision your services. Submitting a RSD that is too early could cause customer subscription billing issues. Verify the requested start date with your implementation team that aligns with customer deployment readiness.

General Notifications (1)

Step 5: Validate the order

Click the **Summary** tab at the top to ensure the order reflects the desired quantity and type of SKUs. Click **Verify and Save** to proceed with the order completion.

Provisioning information

Subscription renewals, changes,
and cancellations

Provisioning information

After the order has been placed, a claim code will be created for the end customer and emailed to the address specified above for subsequent provisioning. Refer to the [Security Cloud Control user guide](#) for details. Upon activation, the end-customer administrator will receive a welcome email with instructions to log in to the Security Cloud Control tenant to enable Mesh Policy Engine. When administrators have logged in to the dashboard, they will be aided by a setup guide as well as access to support resources to make sure their accounts are properly set up.

Subscription renewals, changes, and cancellations

At time of ordering, the subscription is set to auto-renew as a default, however, auto-renew can be turned off (toggle button on lower left as shown above) without triggering the deal to become nonstandard.

Subscription changes

Changes to the products, quantities, or terms of a subscription may be made at any time during the term of the subscription. To change the subscription, please refer to this [Cisco Commerce Change Subscription Job Aide](#). Attempting to add products or quantities by creating a new subscription will result in an ordering error.

Subscription cancellations

Renewals may be cancelled up to 60 days before the start date of the new term. If the subscription is not cancelled, the subscription will automatically renew. Midterm cancellations of subscriptions for credit are not allowed.
